SENTINEL

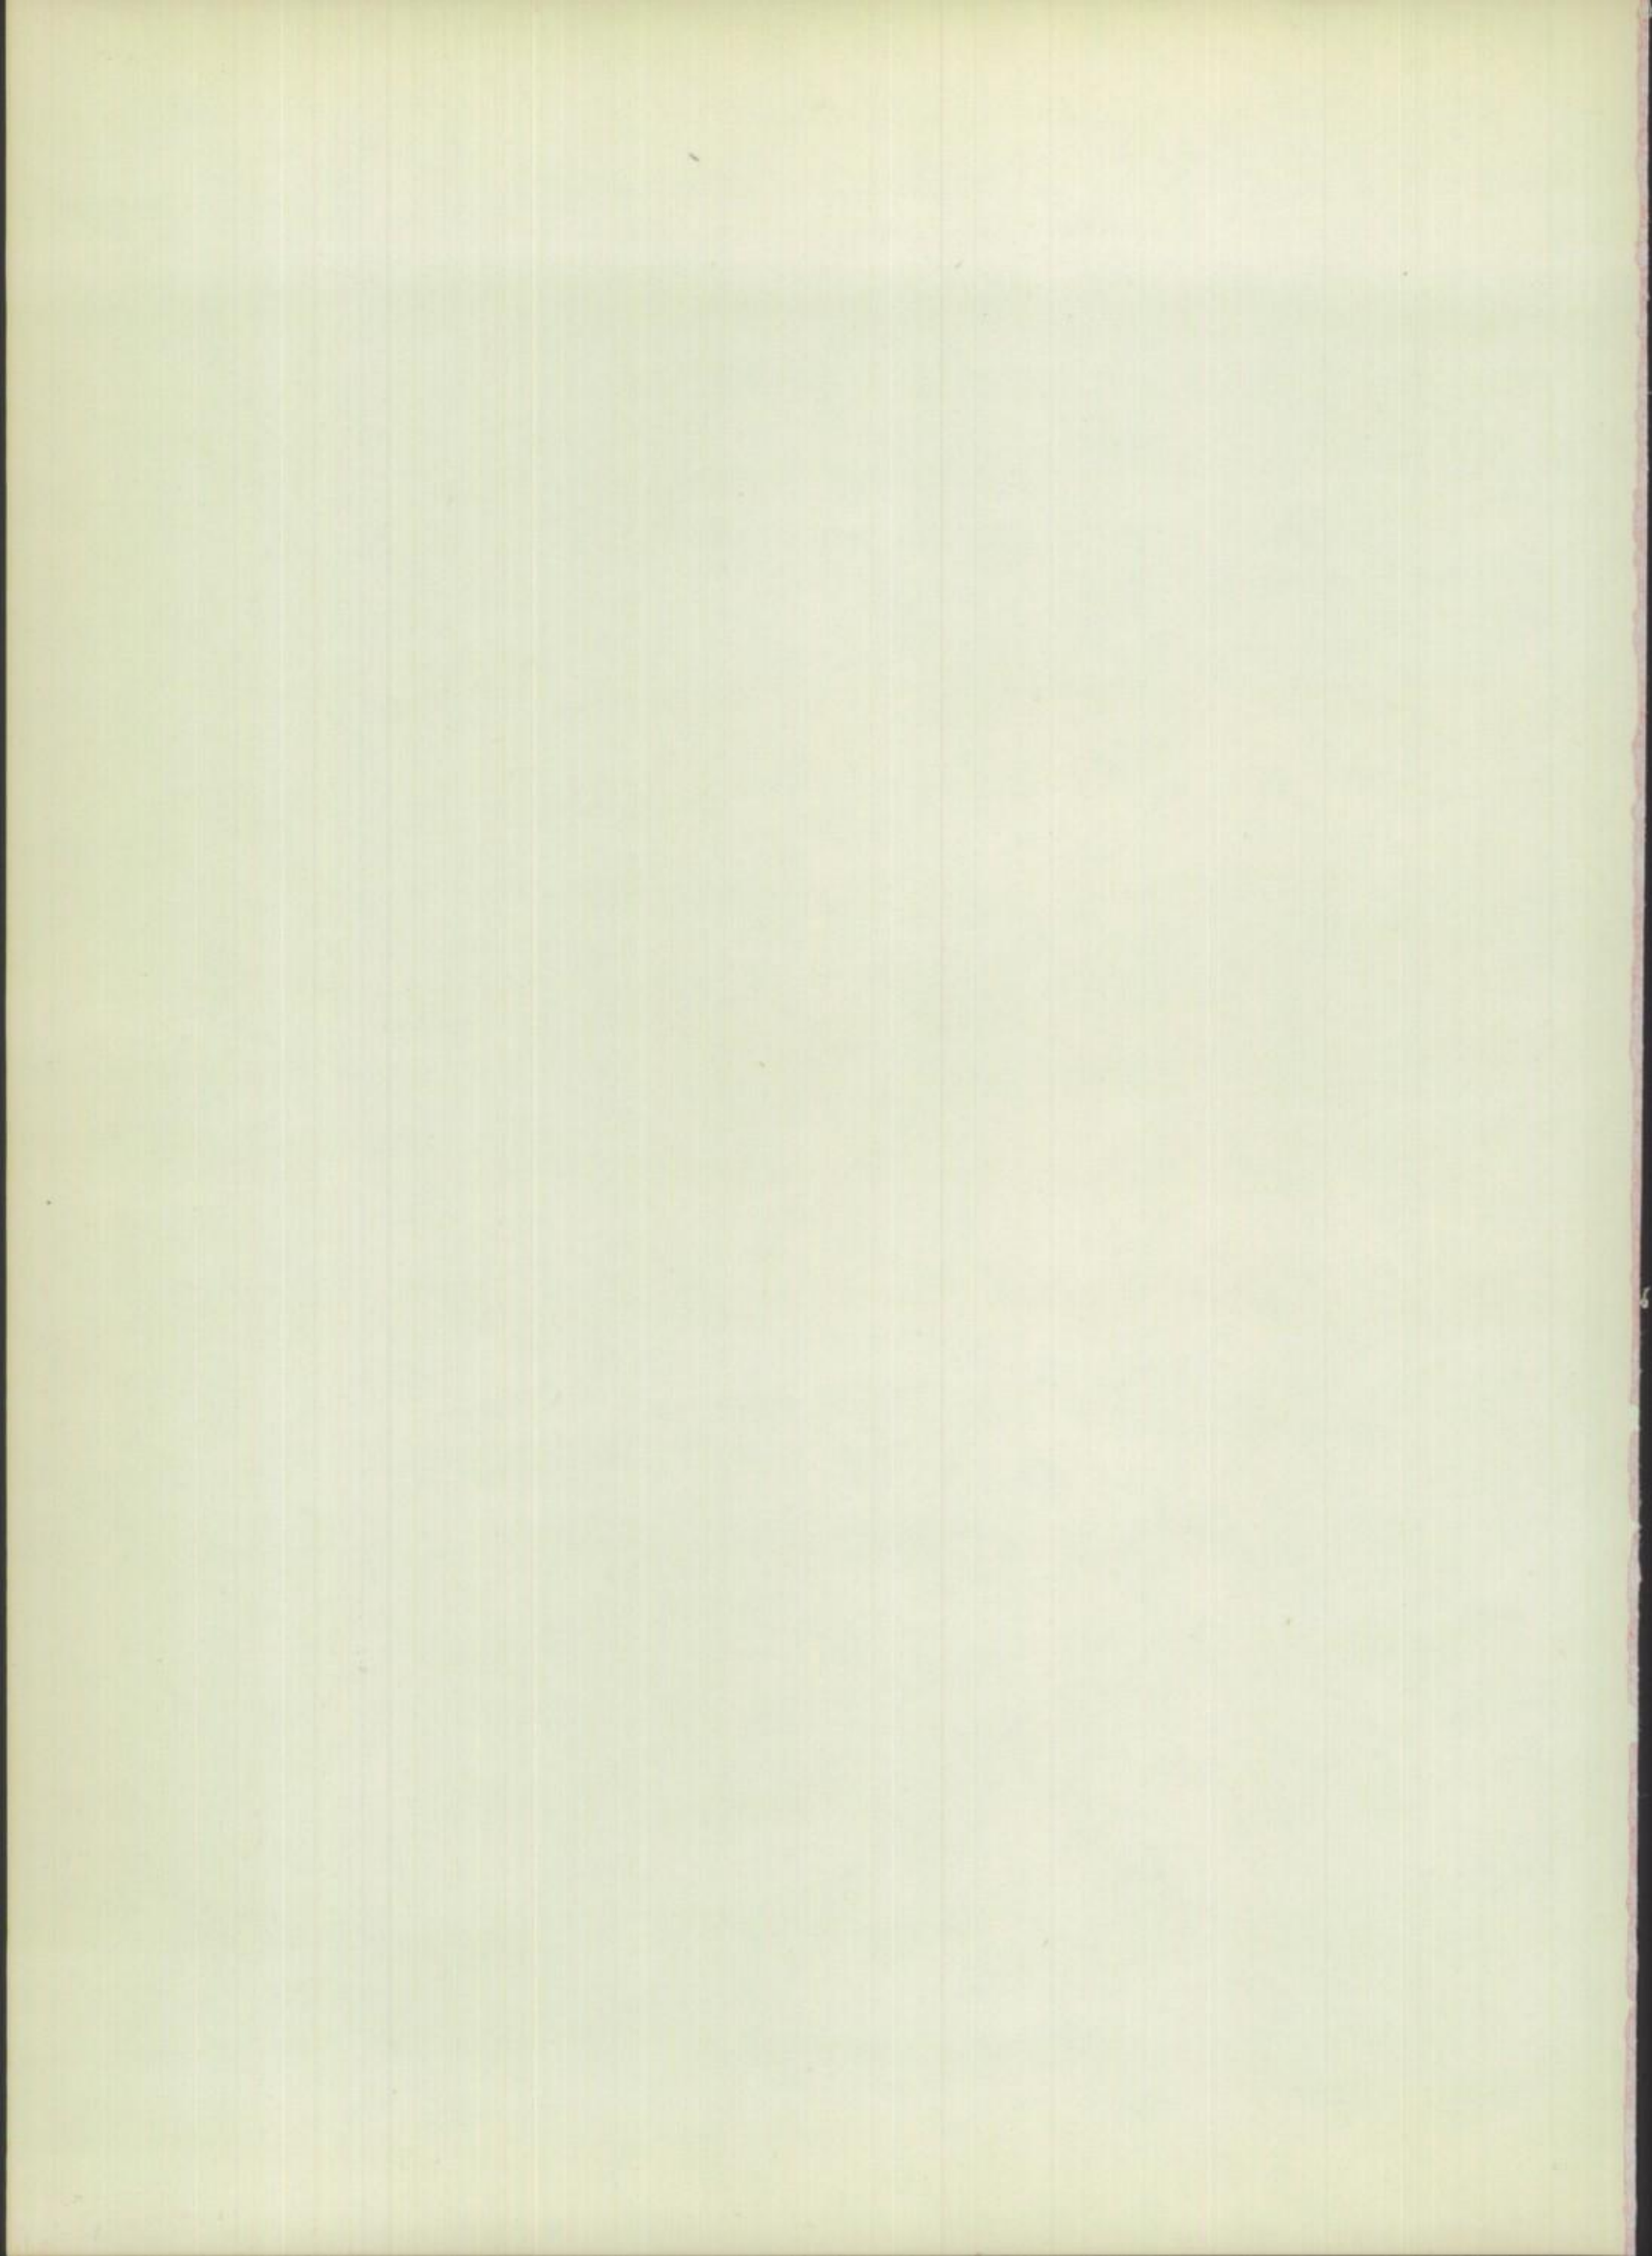

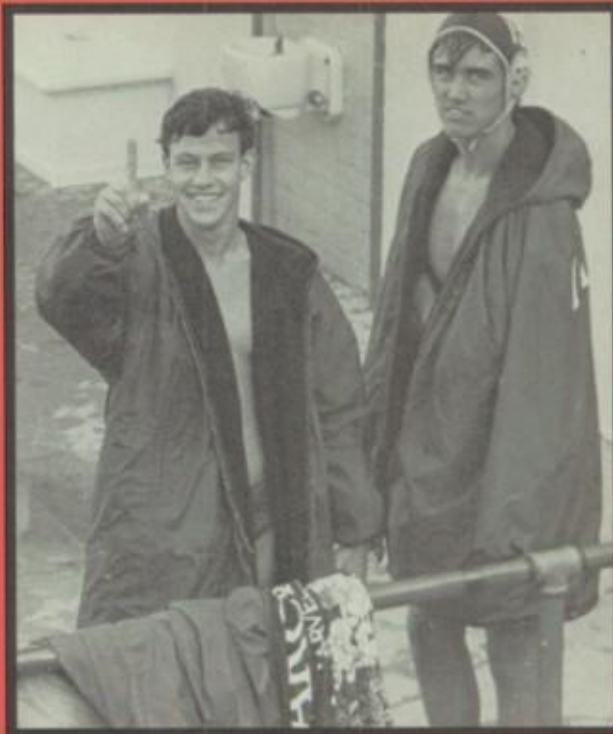

SPECIAL ISSUE

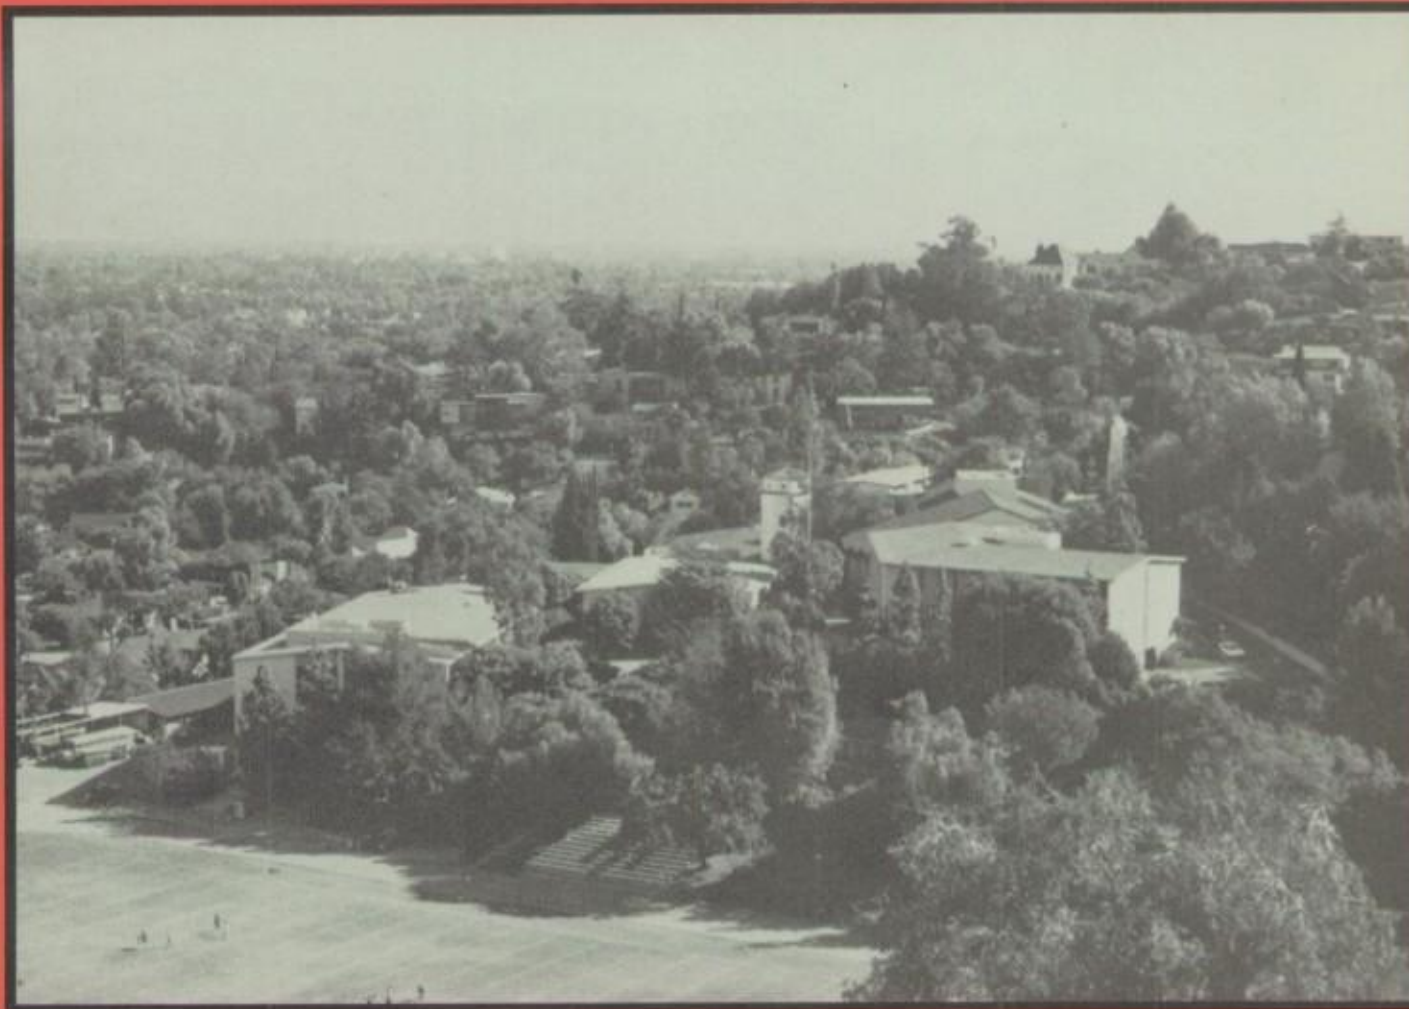

HARVARD SCHOOL

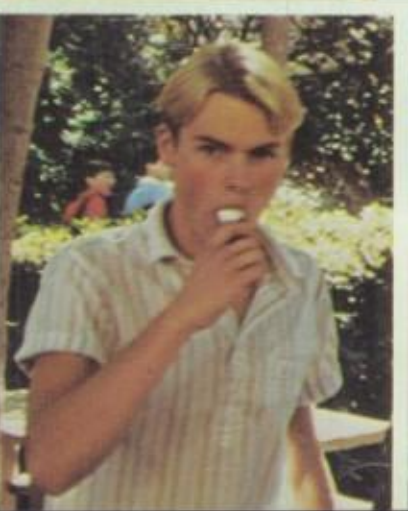

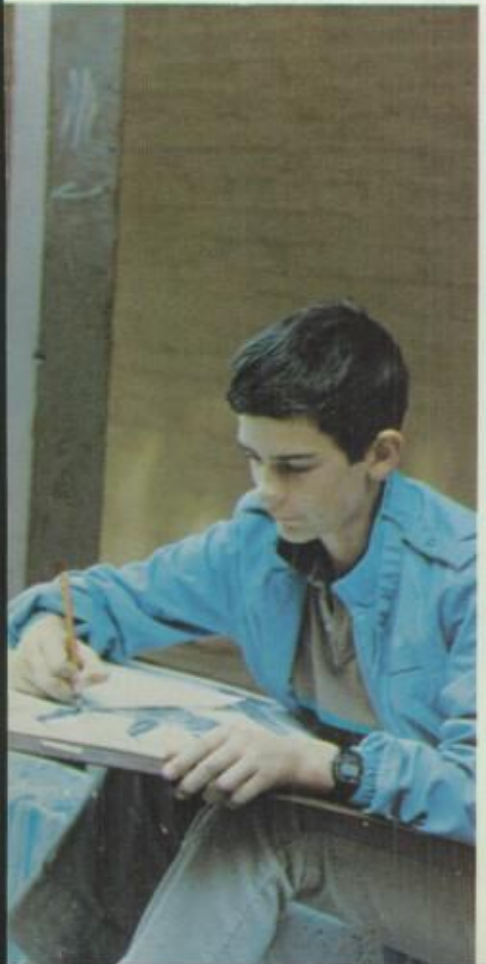

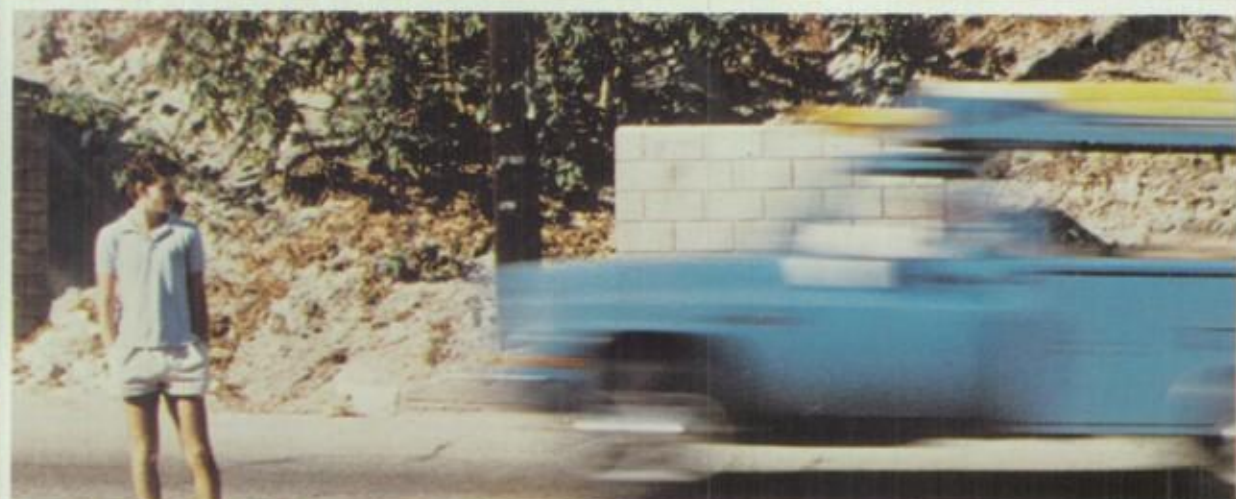

SENTINEL  
1985

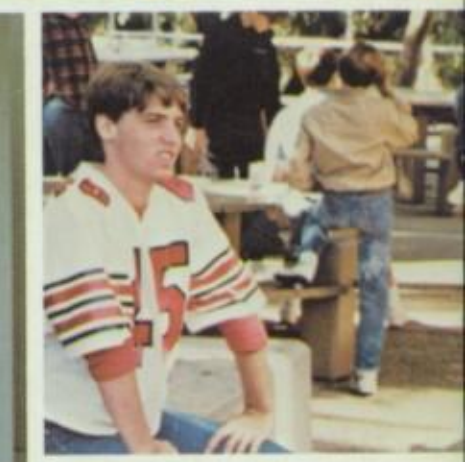

3700 Coldwater Canyon Road  
North Hollywood, California 91604

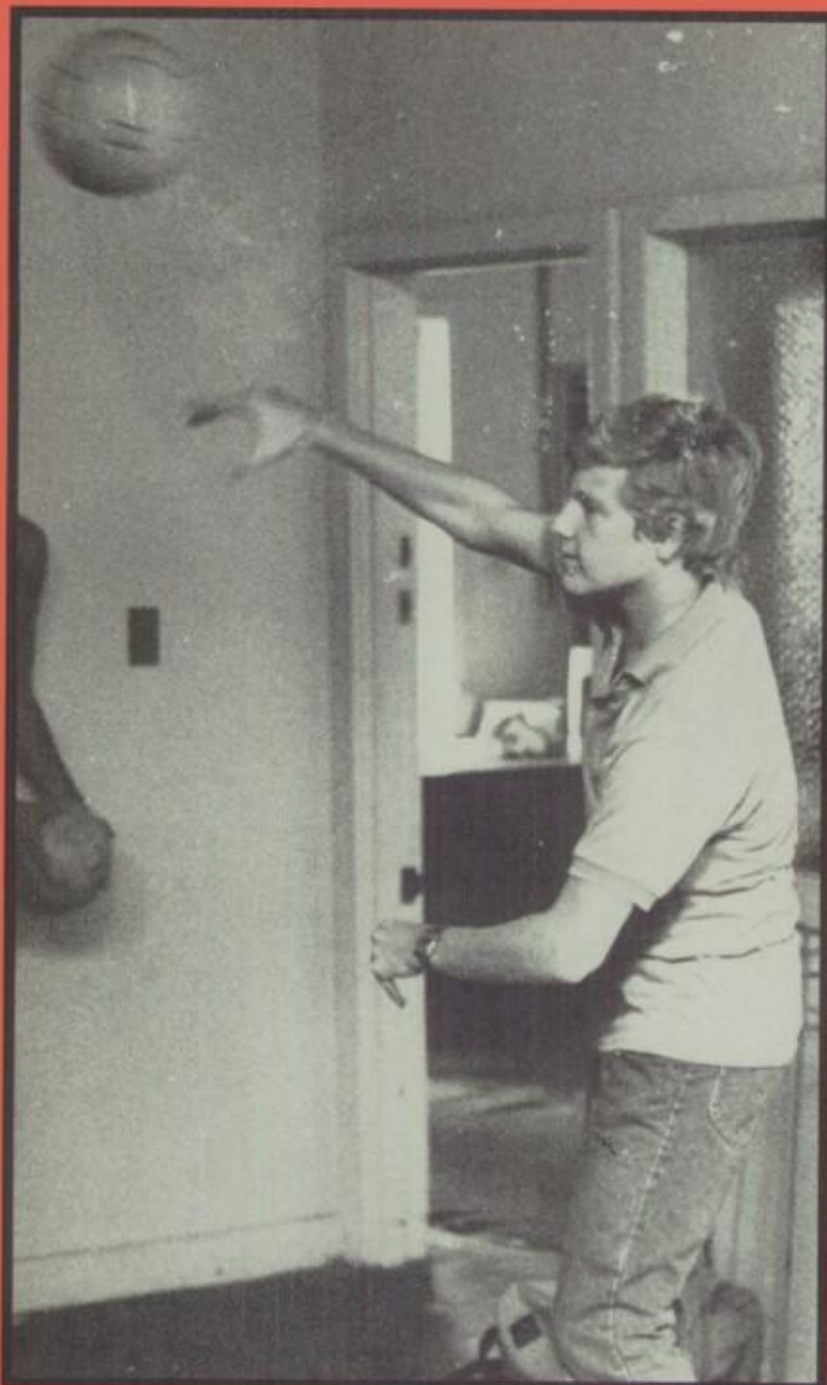

Bret Haller absorbs both the sun's rays and yesterday's U.S. History notes during a free period.

First Prefect Richie Rothenberg recruits even more student support for the '88 presidential race.

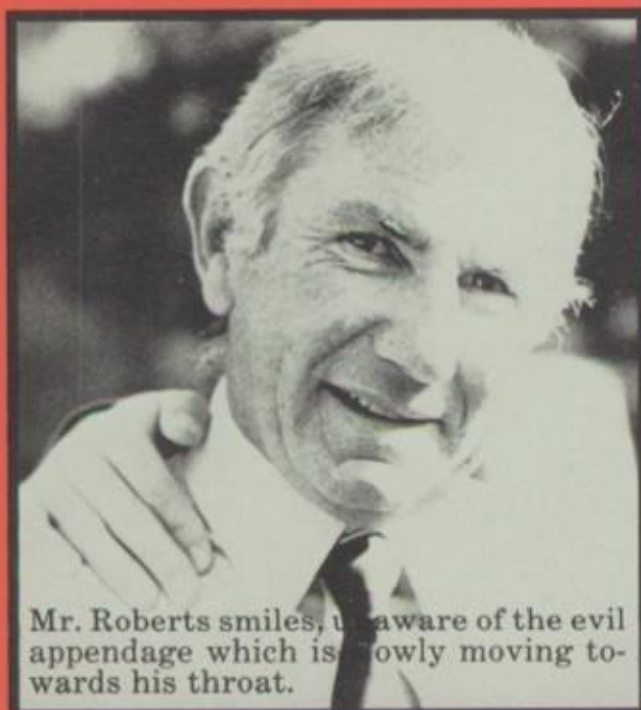

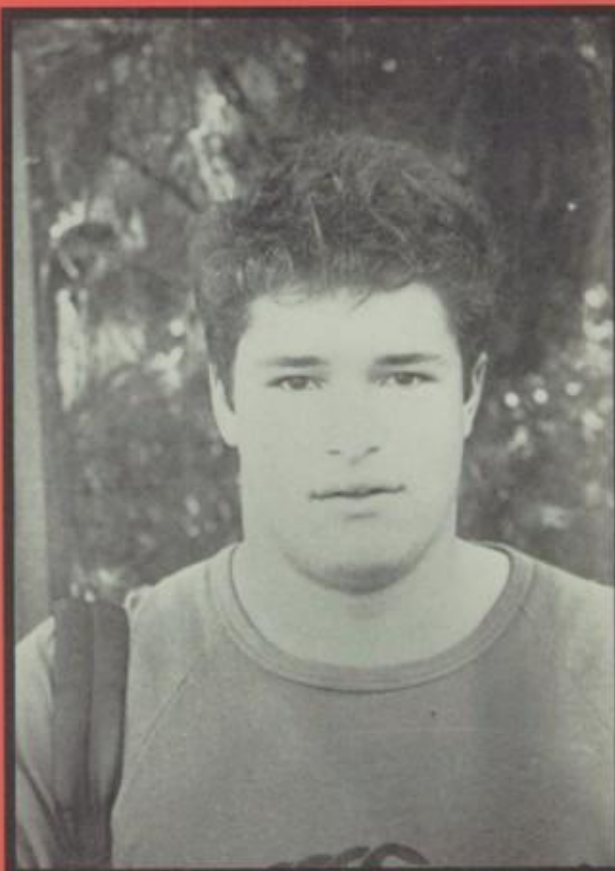

Tom Lin, overwhelmed by Mr. Clark's A.P. Physics lecture, realizes too late that he has stumbled into the wrong class.

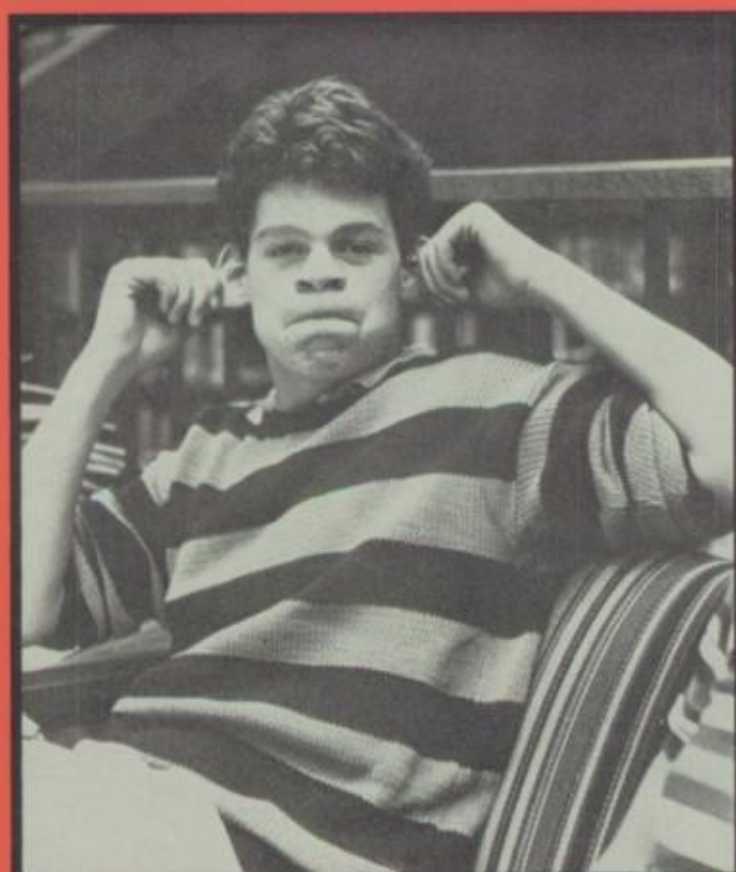

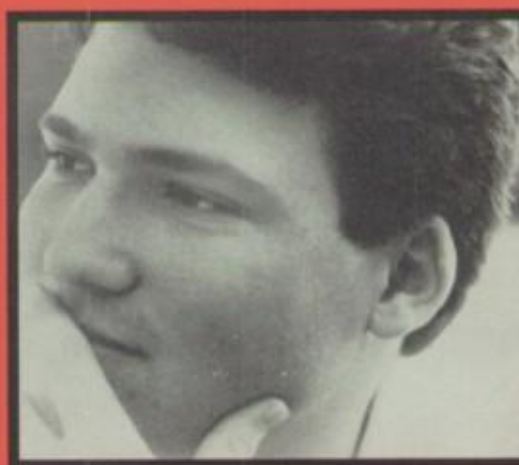

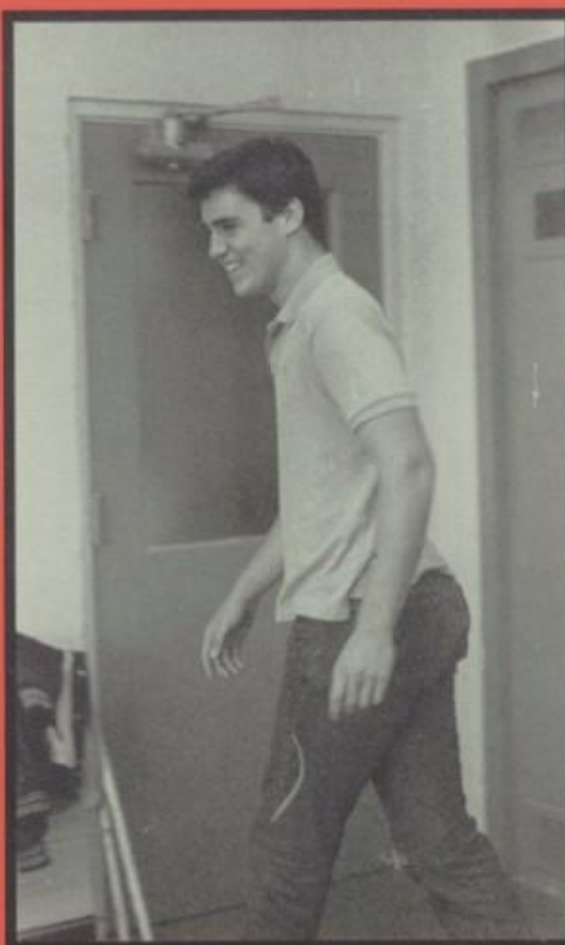

R.C. McCuskey

Mr. Roberts smiles, unaware of the evil appendage which is slowly moving towards his throat.

Monkey see, monkey do (Harvard's 'missing link').

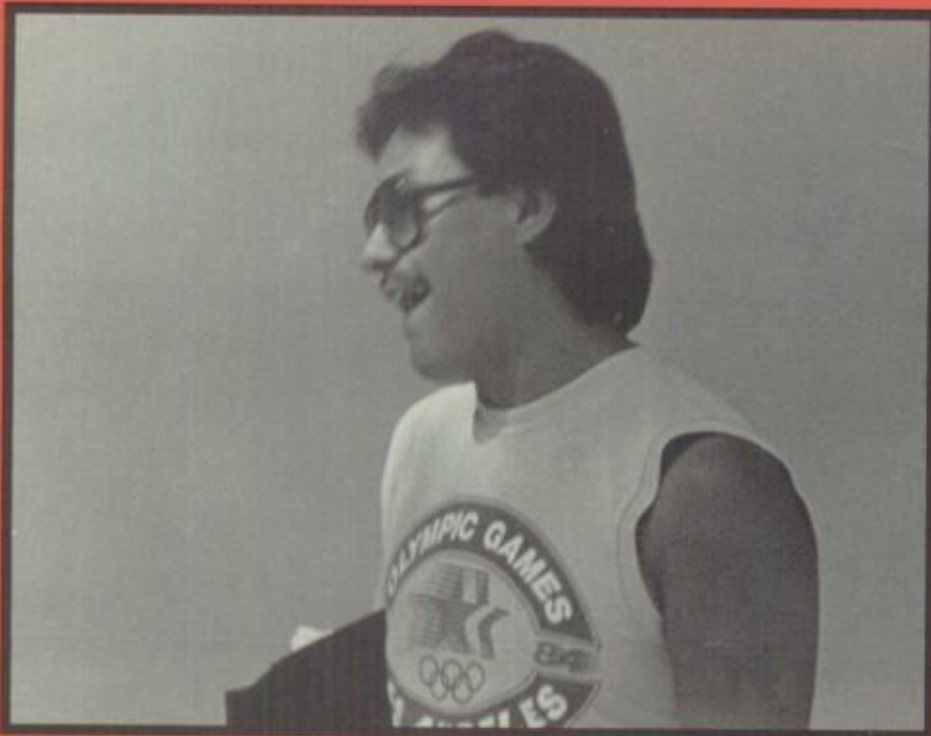

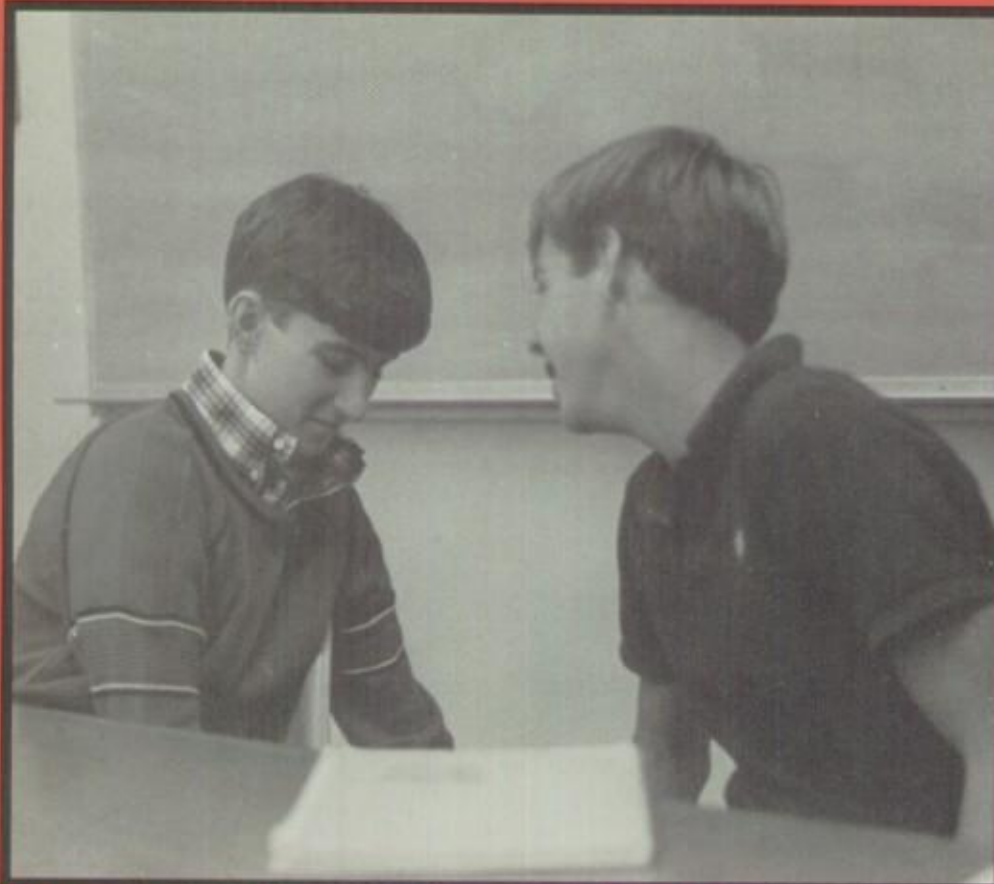

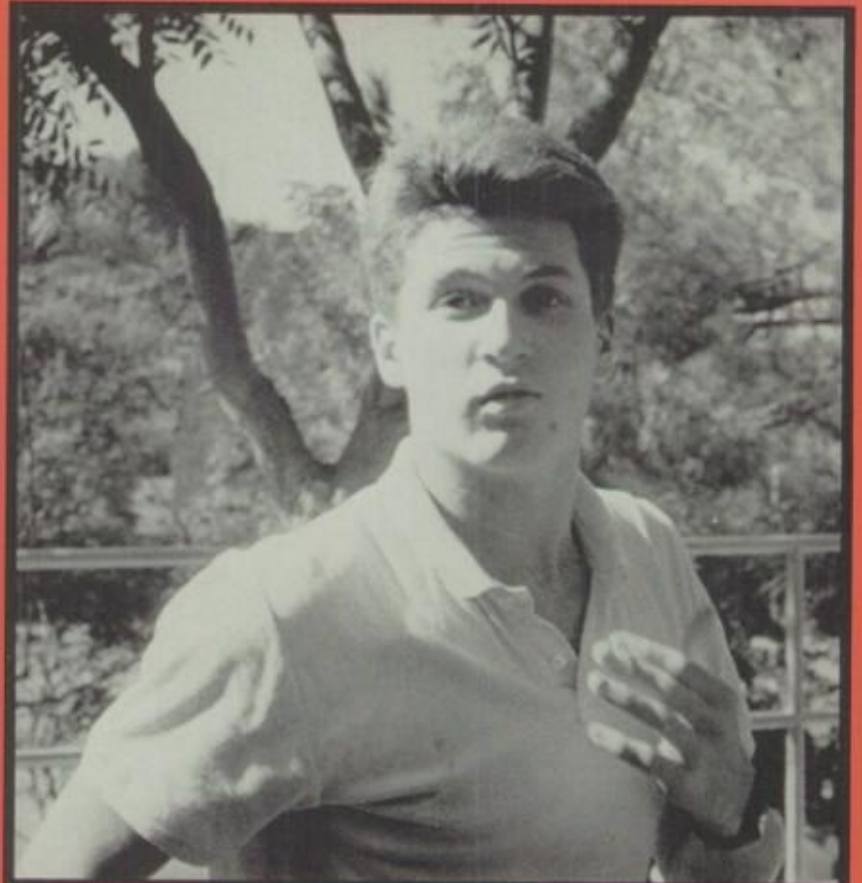

David Kopple watches as Kevin Kelly attempts to inhale the garbage can through a straw.

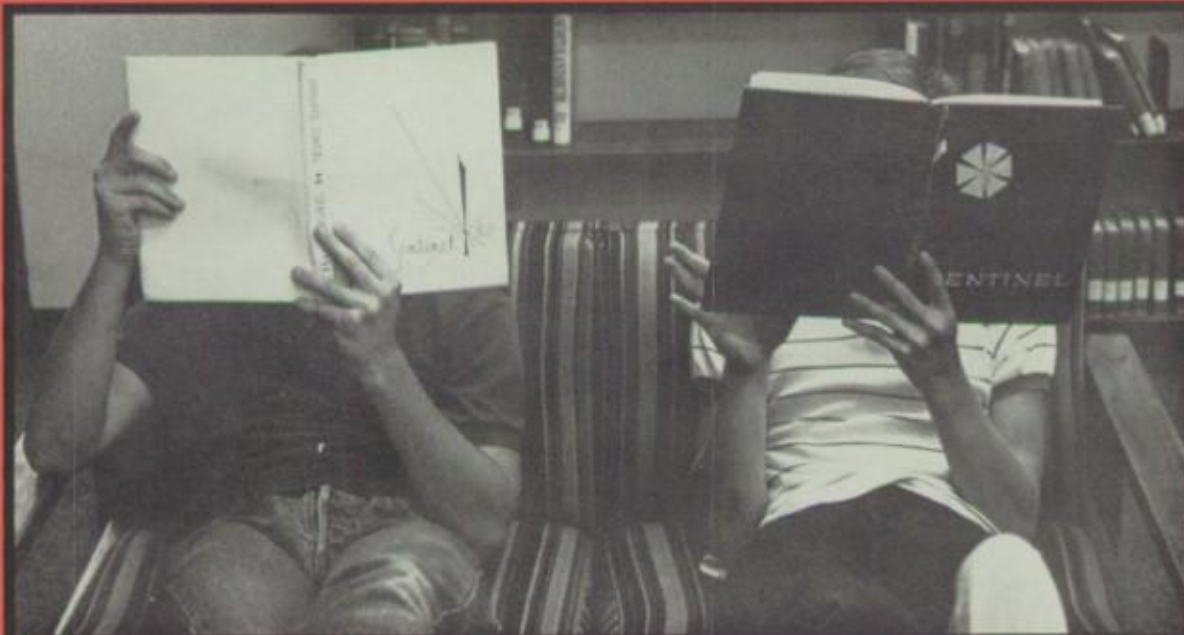

John Rosati and an accomplice put the finishing touches on the H-bomb they've planted behind Miss Mabie's desk.

"She told me she was 18!"

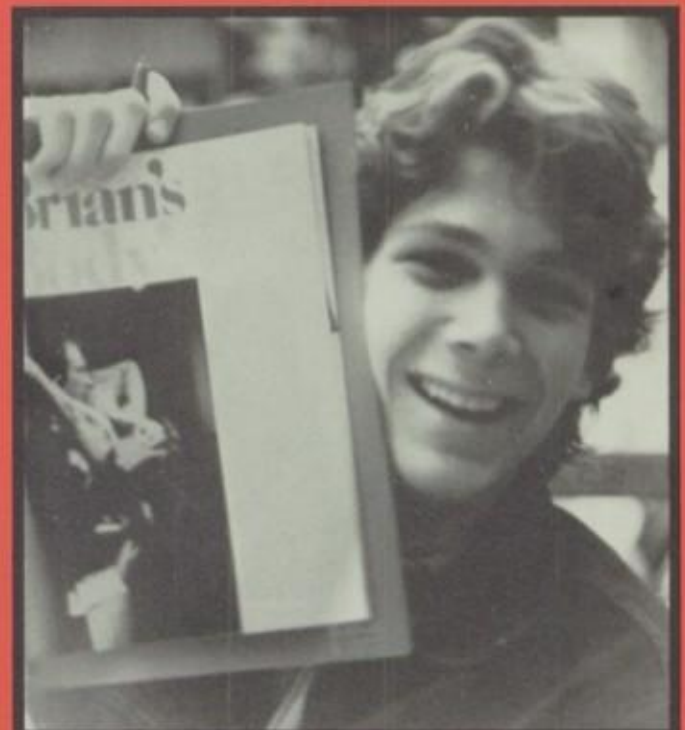

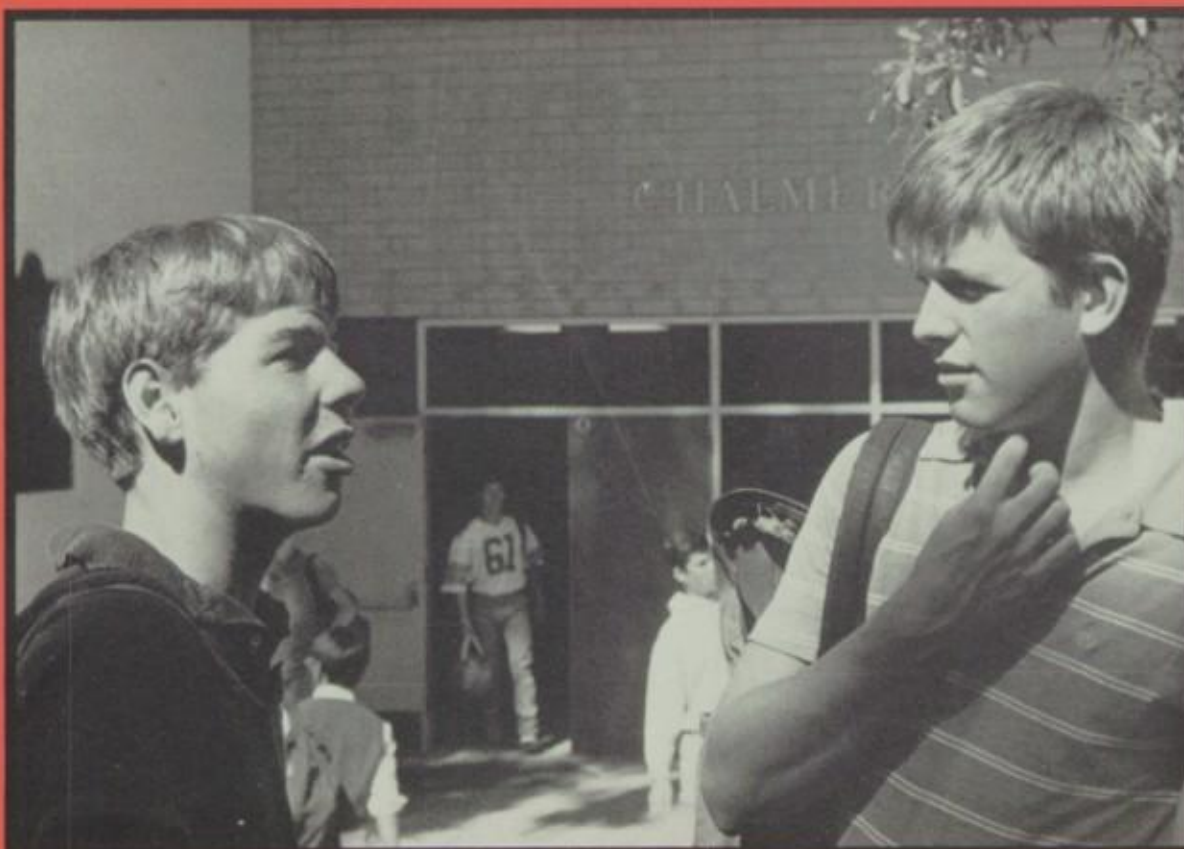

Salzman and Satenberg sleep surreptitiously behind Sixties Sentinels.

Lower schoolers place bets on the Monday night Raiders-Seahawks game.

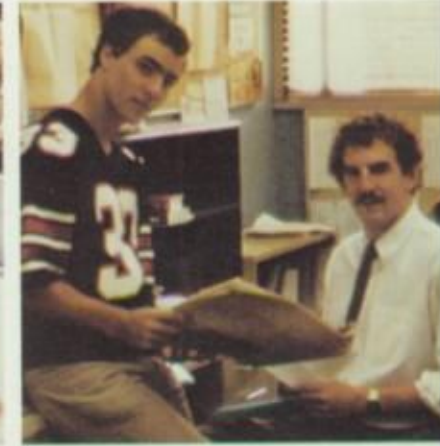

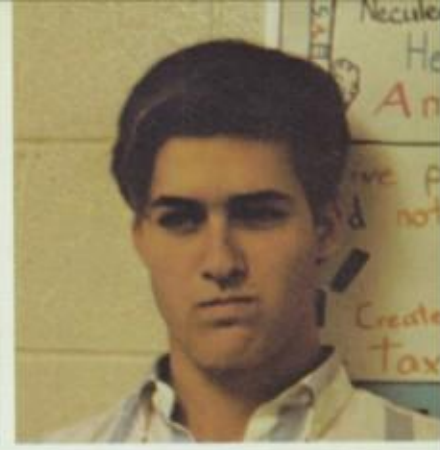

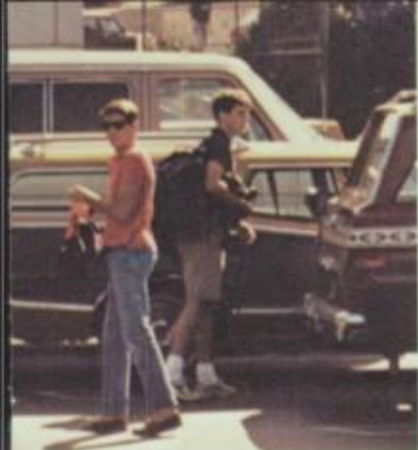

A gleeful Andy Rice displays his expose of classmate Brian McCuskey's secret porn career.

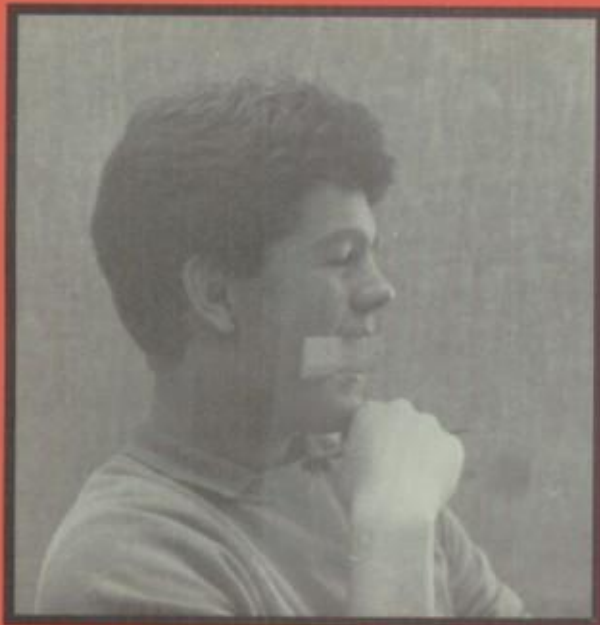

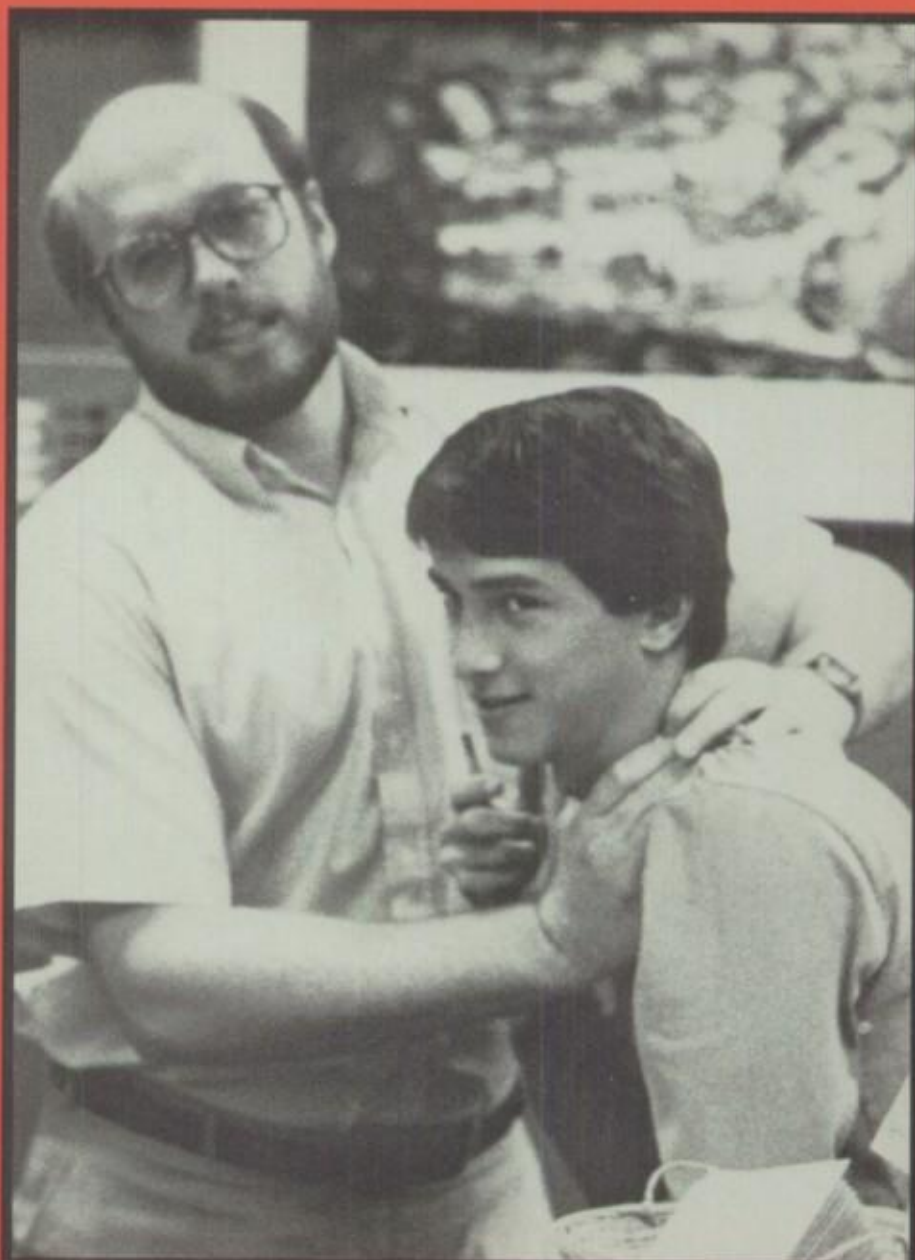

David Reiner uses a ruler as a pacifier during his painful teething.

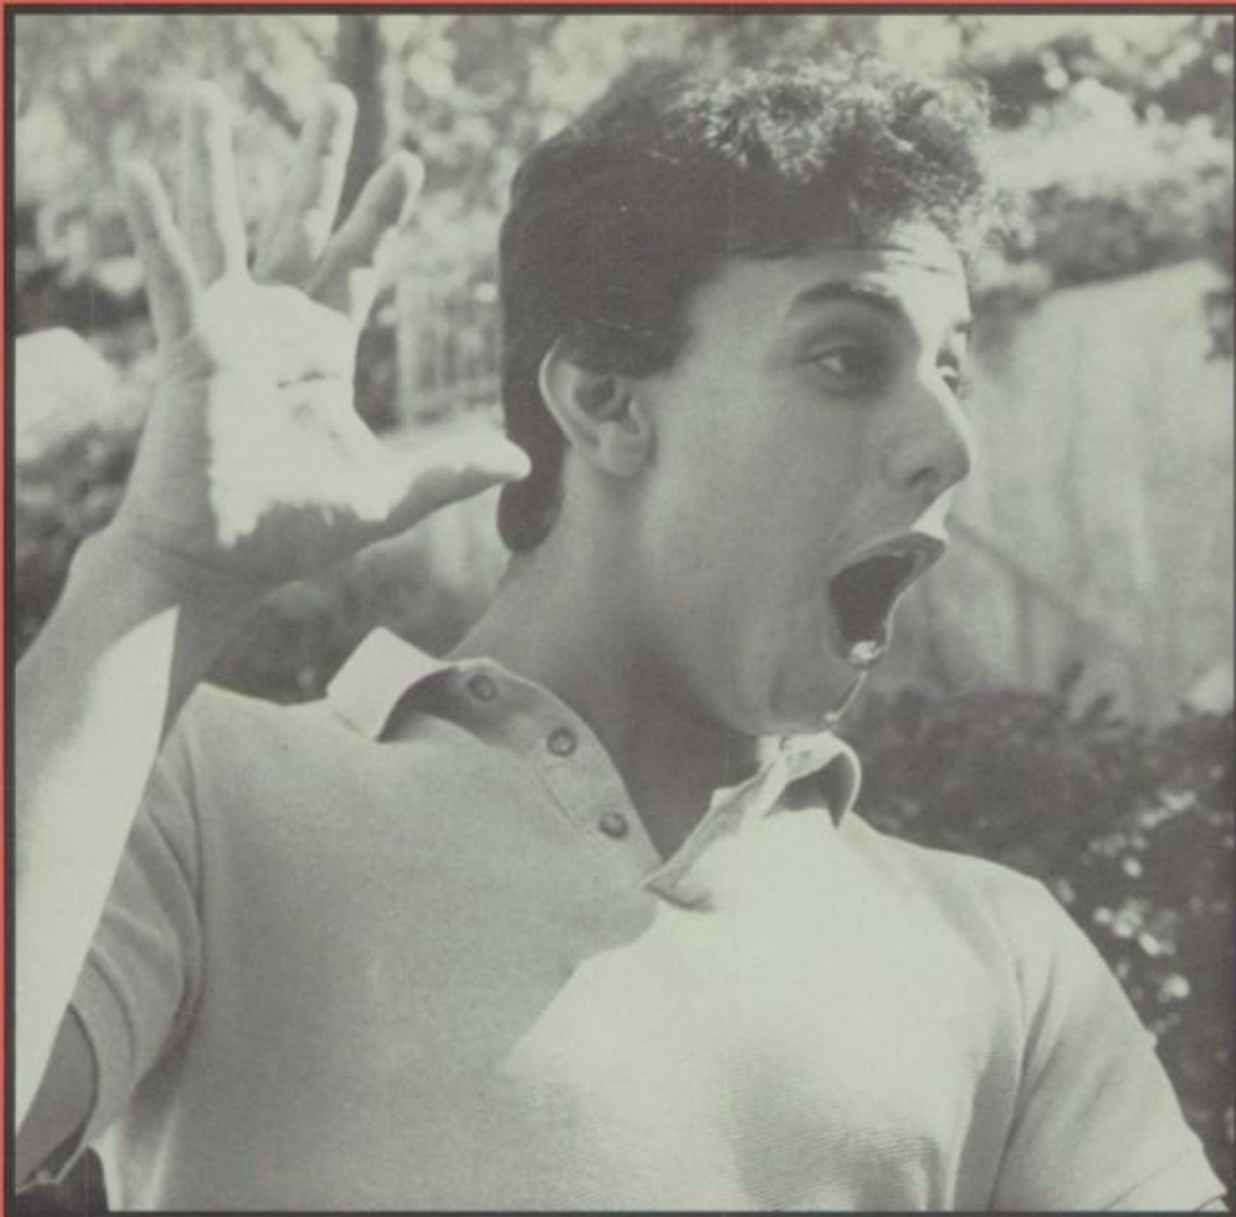

Chippendales' emcee Brian McCuskey introduces Richie Rothenberg to the waiting Westlake crowd.

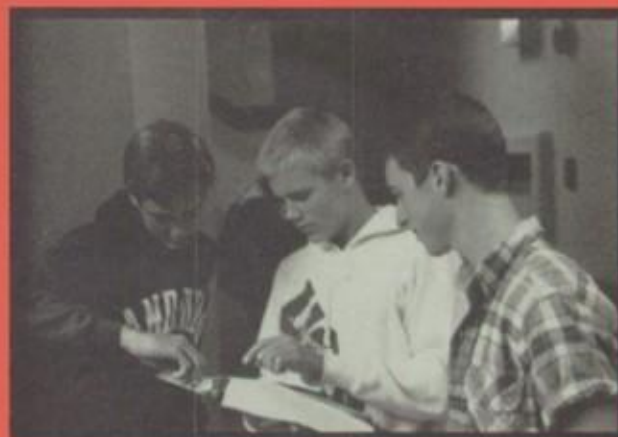

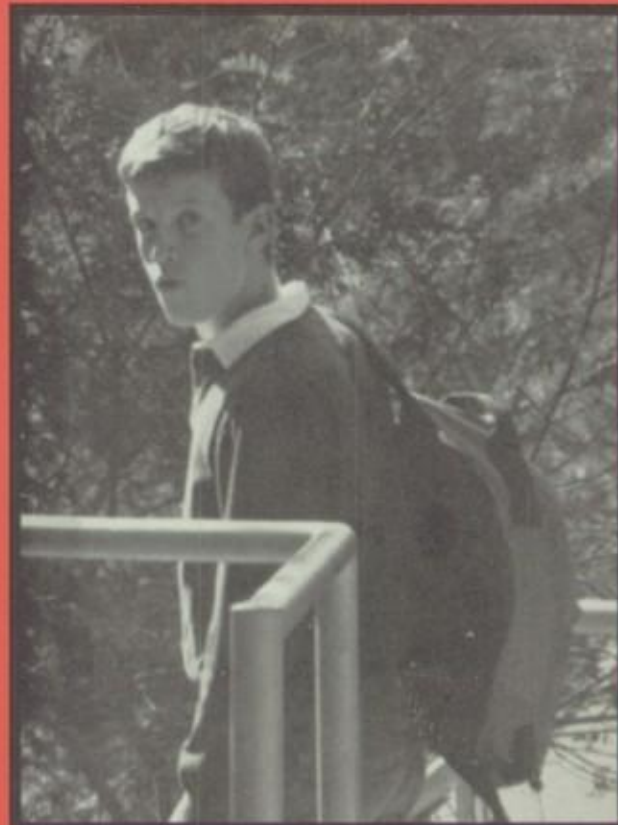

Dean Graves, driven to violence by his jealousy of Josh Plager's full head of hair, slowly squeezes the life out of the helpless senior.

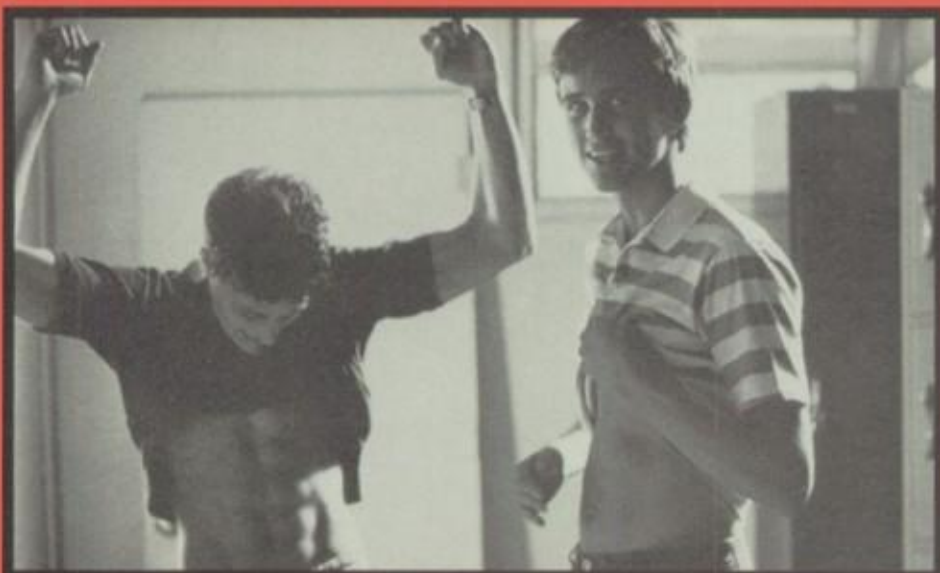

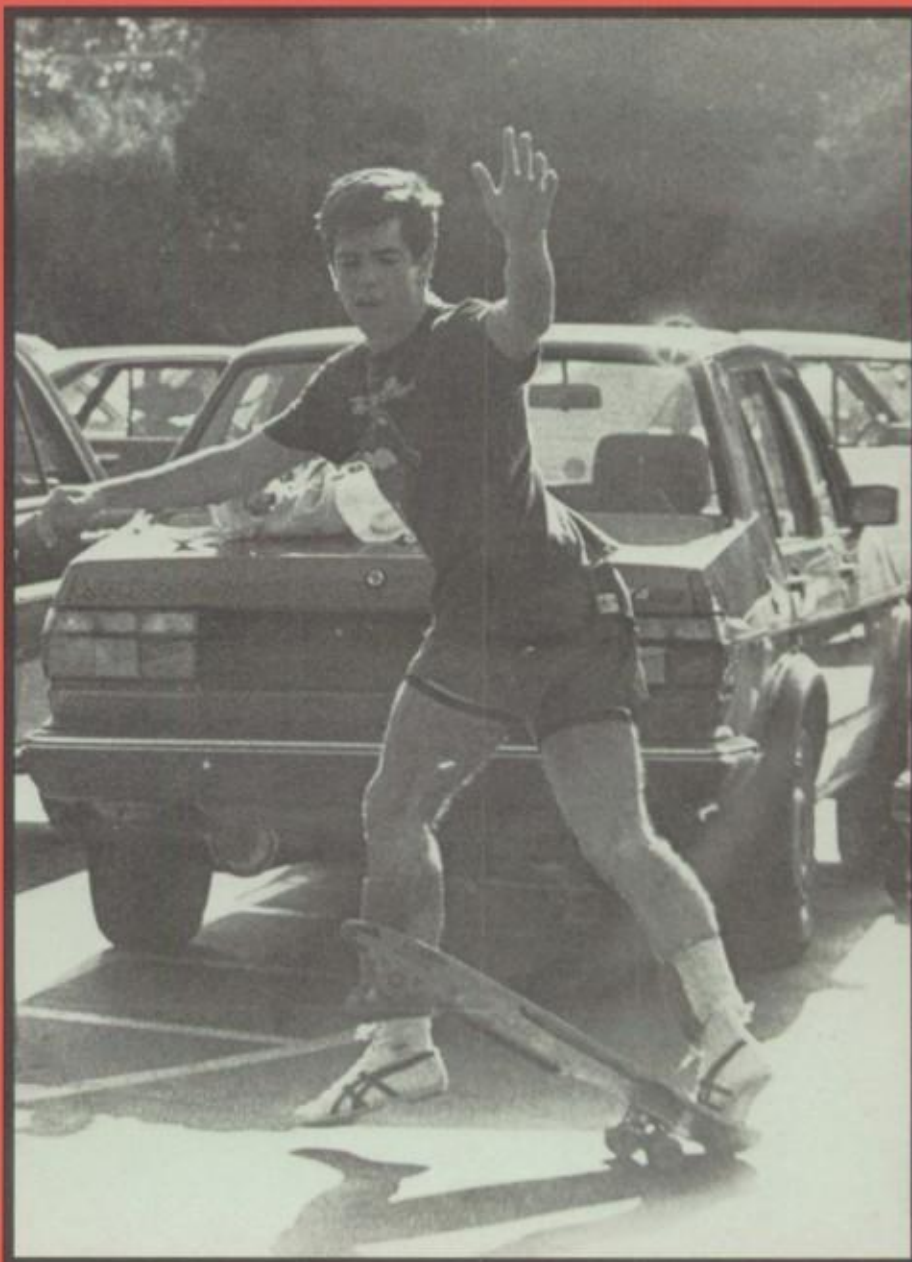

Chris Silberman exuberantly displays his I.Q. to his friends.

Jared Wolff strives to realign his tongue.

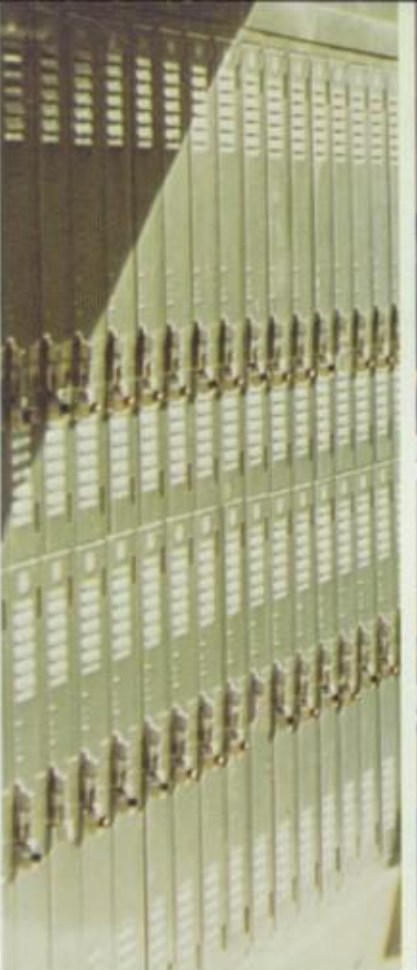

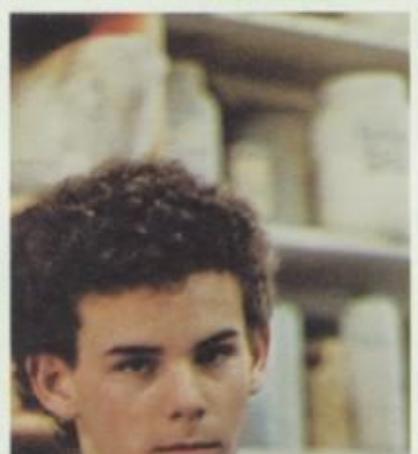

Kurt Woelfl displays his iron stomach muscles while Fred Brende can only smile at his own inadequacy.

Dominic Sandifer is startled by the U.S.A. Today's latest centerfold.

Mike Gillinger takes aim.

Alex Norman says, "Let's call it E.T."

Bret Haller does his English homework.

# Headmaster's Address

Congratulations to every member of the Class of 1985.

In your group there are many talents. The scholars among you have set a record that few classes anywhere can match. You have competed and participated. You have enjoyed your sports, your speech-making and your arts. Thanks to your abundant collective energy, there have been more constructive activities on campus this year than ever before.

As juniors, you organized Harvard Carries the Torch. As seniors you have promoted a fund drive to help relieve the famine in Ethiopia. Those were the big, noticeable contributions to the community. Yet, day by day, many of you have been helping others, both on and off the campus, wherever you could be of assistance. Keep that sense of caring and the many different worlds you are about to enter will be the richer for your presence, just as Harvard School has been during the past six years.

You are fine people and you leave us with fond memories. Good luck.

— Christopher Berrisford

# TIME

MAN OF THE YEAR

**Walter Stewart**

The past 34 years have revealed quite a number of physical and philosophical changes at Harvard School. Yet, one institution at Harvard has remained relatively unaltered — Walter Van Vechten (V<sup>2</sup>) Stewart. For 34 years Walt Stewart's booming voice, generous spirit, and absolute loyalty — to Harvard and Michigan — have stood strong through the changes which time brings. The Class of 1963 dedicated the Sentinel to Walt, and it is no surprise that he continues to pattern his life after the very standards the Class presented over 20 years ago.

In the years to come, when we of the class of '63 recall the memorable good times we have had at Harvard and the acquaintances we have made here, the image of one person will be foremost in our thoughts. This man has done the most to help us through our years at Harvard; but his interests do not rest in our particular class, rather he provides a guiding influence upon every member of the student body, and his work in countless aspects of Harvard's life has made him the backbone of the school.

Before Walt came to Harvard he earned a distinguished record as a swimmer. In 1938, '39, and '40 he was the La Jolla Rough Water Swim Champion, as well as, at different times during his career, champion of at least 10 other rough water competitions. In 1940 Walt placed high in the C.I.F. championships and placed first in the Junior National AAU One Mile Swim. Walt was a three year varsity letterman at the University of Michigan, and he was voted an All-American for all three years. Walt Stewart is an elected member of the San Diego Hall of Fame.

Walt taught and coached at Brown Military Academy for three years before beginning at Harvard in 1951. While at Harvard he has held the positions of Dean of Students, chairman of the Department of Mathematics, Dorm Master, Athletic Director, and Director of Aquatics. In each and every one of these capacities, Walt received the utmost respect for his efforts. Walt has coached eleven Prep School All-Americans.

I have the unique opportunity to have had Walt as a teacher, coach, colleague, and friend. I will truly miss him as he begins a well-earned retirement this year. On behalf of the class of 1985 and all the Classes you have touched since 1951, we dedicate this Sentinel to you. Happy retirement and SETTLE DOWN AND KNOCK OFF THE GRABBLER.

The initial euphoria of the election had worn off over the summer, and we approached the 1984-85 year with the simple aim of making the Harvard student body a more unified group and of representing that group's beliefs and desires to the school administration. Simply said, but not simply done. It took pep rallies and Homecoming plans, Grad Night meetings and Curriculum Committee reports, and much more. Perhaps the ideal can be seen best in the highly successful Feed the World Day, in which the student body came through in total force to contribute to the Ethiopian Relief Fund an amazing amount of money, more than the student council members had ever hoped for when the day was in the planning stages. To give credit where credit is due, we could not have done any of it without the assistance of Dean Graves, who provided invaluable advice and ideas all year, and backed us all the way. But the real credit goes to the student body as a whole, for enthusiastically turning up for school functions and taking the council's pools with at least a marginal degree of seriousness. We did our best, and all of us can look back on this successful and simply great school year with a great deal of satisfaction.

"This is the end, my friend. My friend this is the end." Bah Humbug! This is just the beginning of individuality, of real responsibility, and the beginning of having girls in the classroom. Oh Baby!

But all things end sometime, even high school. It seems like yesterday that we were seventh graders in homeroom for the first time, excited and nervous. We had fun our first three years, but we complained of the lack of females and the ridiculously long homework assignments. Then we discovered the godliness that came with a driver's license. No more relying on our parents for rides. Unfortunately there loomed a presence just as strong as the search for women — college. We spent roughly two years panicking about our grades and our future. For those of us who got senioritis a few months early, we were able to get back to partaking in those activities which led others to call us "juvenile delinquents."

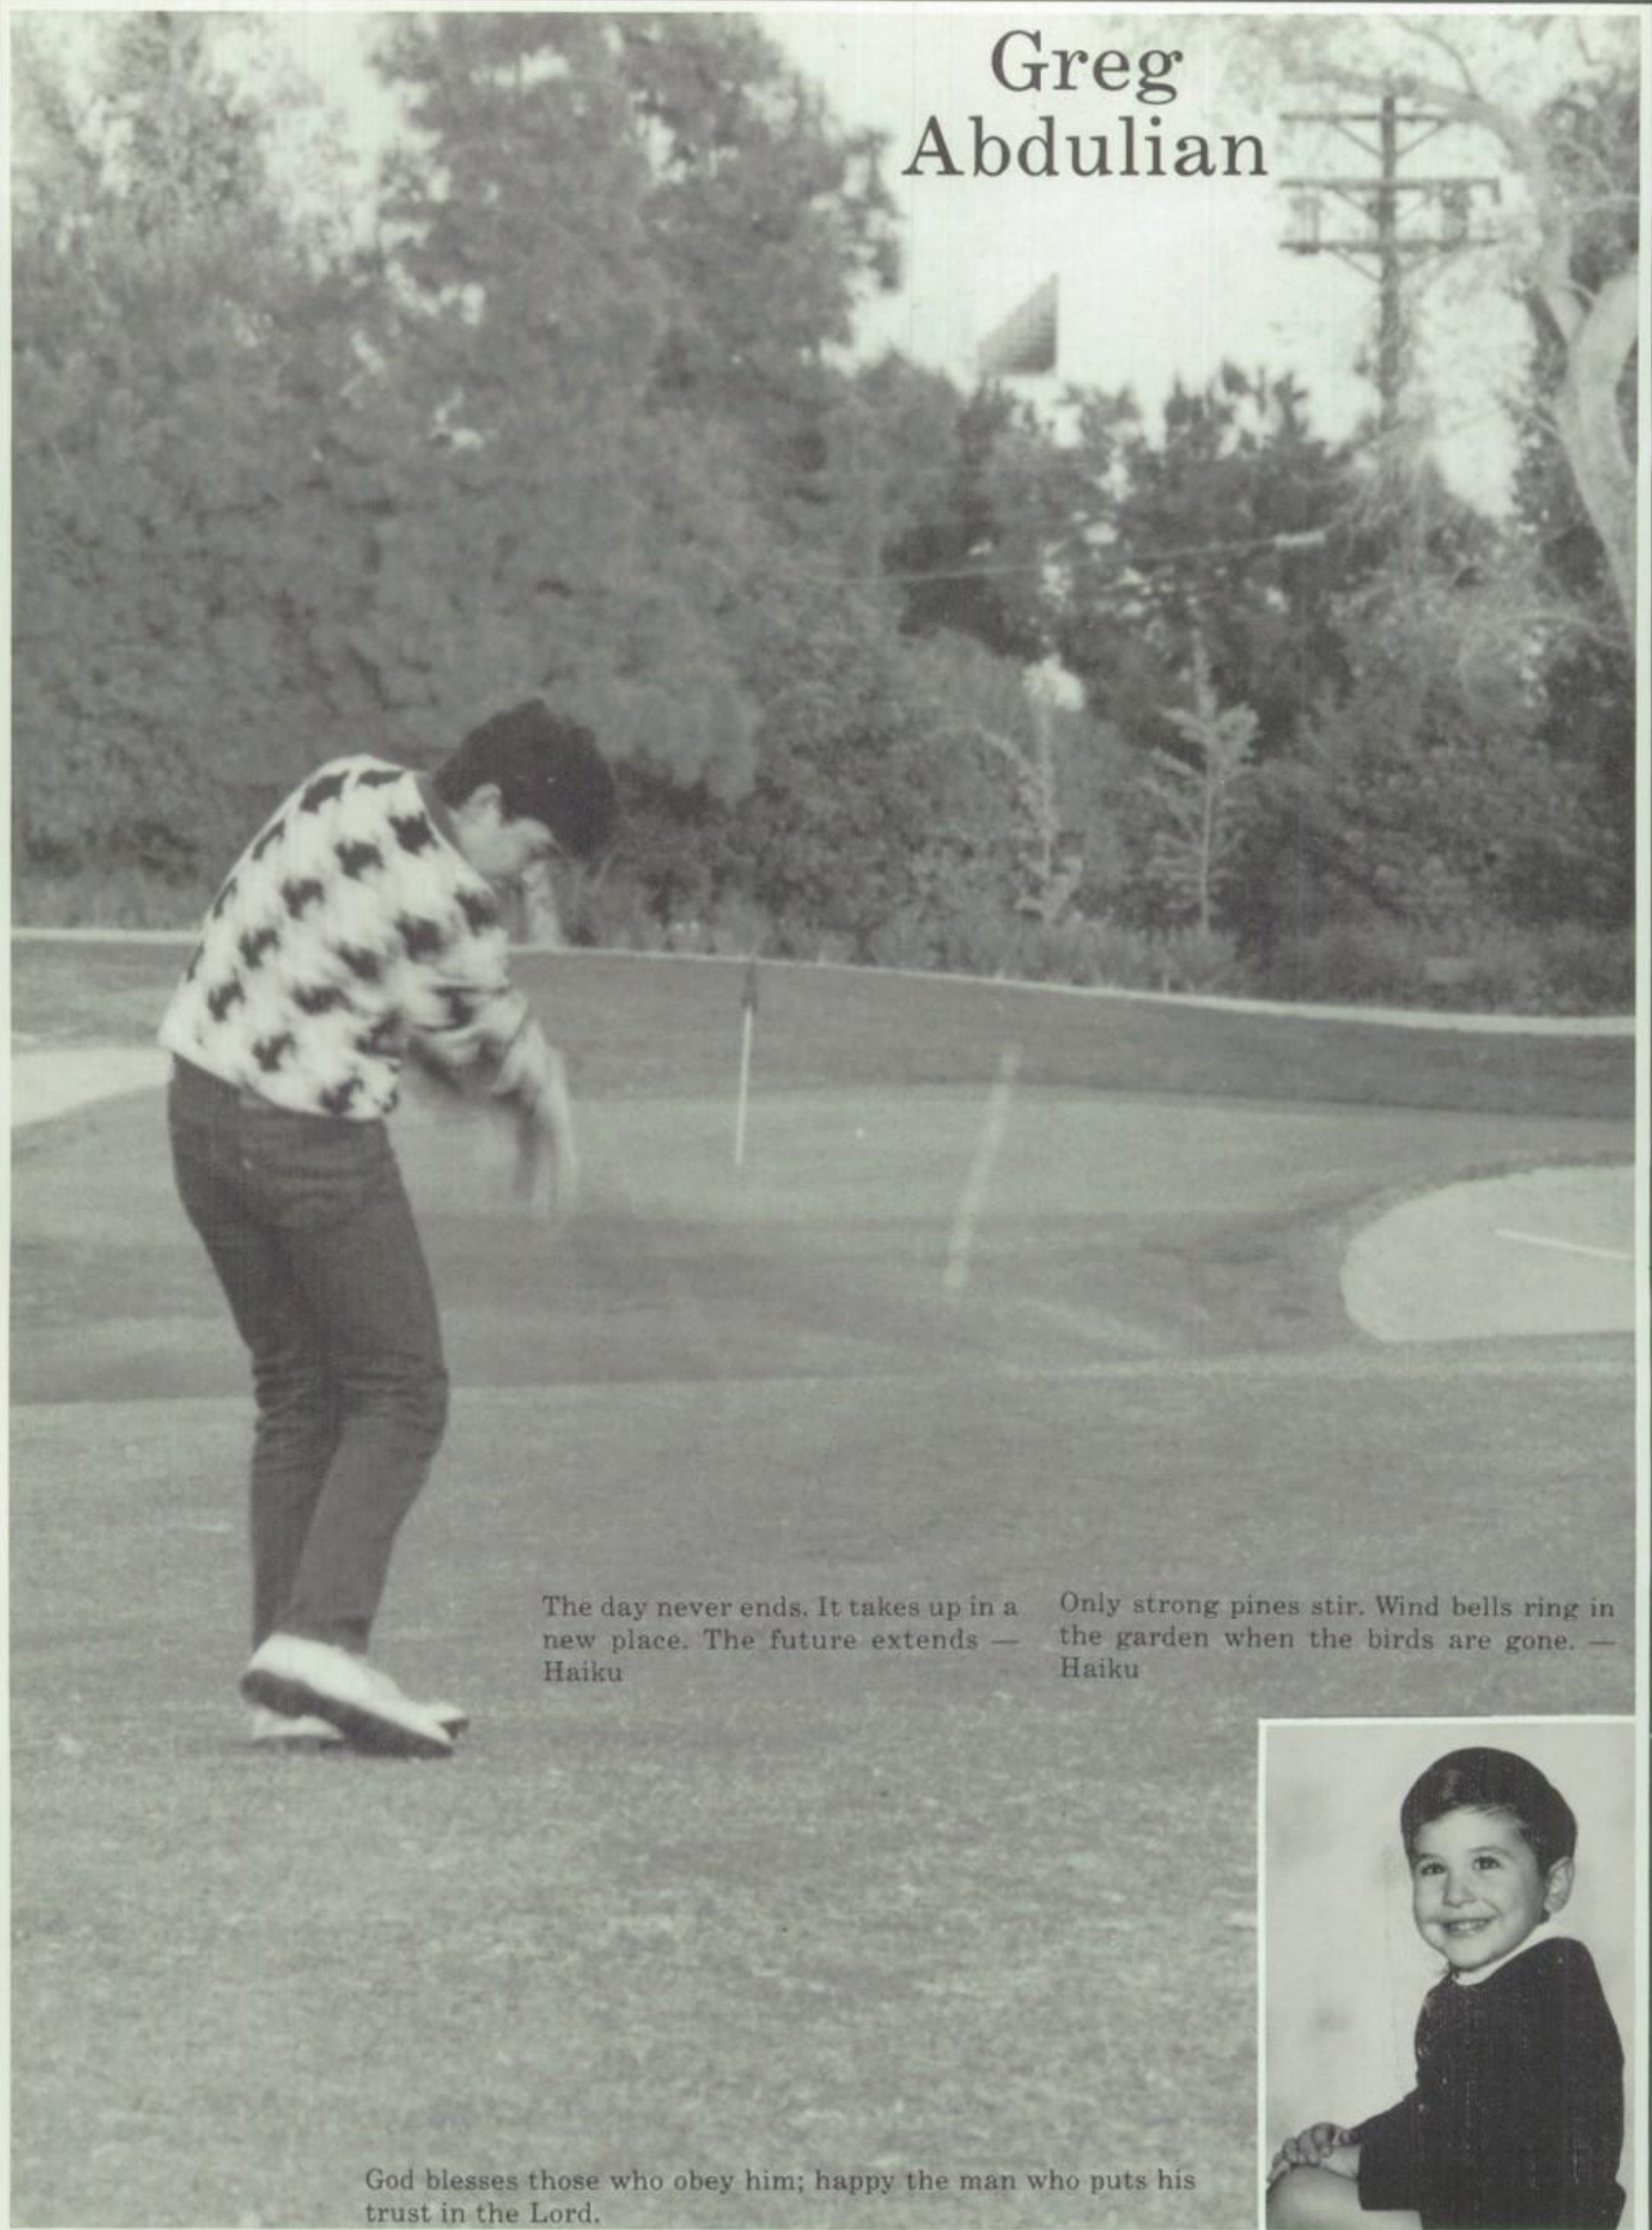

By the time December 18, 1984 came around, the entire class experienced a few changes. Of interest was the way unity spread through the class. We found ourselves referring to each other only with nicknames. We had a class trip to a Clippers game and a Kazoo band that added new meaning to the word "dignified."

So maybe the six years did go by really fast. But the senior class will one day realize that in this short time we packed a lot of memories.

Only parents' love can last our lives.

— Robert Browning

Sunrise, the beginning of a new day, ends night. We leave behind the innocence and bliss of childhood and pass into the responsibility of adulthood. Six years of education prepares us for the "coming of age," but dark clouds hand over the future, the future we now must face. With our departure from Harvard, we face the perils and joys of a new day.

Mom and Dad — For all the love and care you have given, for all the hardships you have endured, I thank you. Someday, I hope to repay all of your kindness, love, and understanding.

Larry — Thanks for the long conversations and many invitations, and for curing me of my apathy.

Paul — Stay cheerful and brighten the lives of others.

Andy (and Mr. Steve Wilson) — Thank you (?) for forcing me out of my quiet world. I can NEVER forget what you did!

To all my teachers — Thank you for kindling the joy of learning and for keeping the flame burning. I would not have survived for even one year without you, and your guidance. You have made Harvard worth (well, almost worth) the six hard years.

Special thanks to: Ms. Moser who made me strive for clarity and grace. Mr. Corsello who endured me for four years. Mr. Feulner whose class taught me physics and abuse. Mrs. Wardlaw who could hardly force me to speak. Ms. Kocan who taught me Calculus but lost a bet. Ms. Tsuda who waited so long for my Senior Page.

As you go through life you are going to have many opportunities to keep your mouth shut. Take advantage of all of them.

**GAMES answer:** Lucky should go for it. Killer's also got two pair (jacks and fours) but Lucky's two pair (aces and sevens) are higher. The Five clues to Killer's hand are as follows: the Jax beer can on the diamond-patterned coaster suggests the jack of diamonds; the oversize toy jack in the heart-shaped box suggests the jack of hearts; the woman's four-diamond necklace suggests the four of diamonds; the golf clubs suggest the four of clubs; and the Lions Club calendar suggests the king of clubs.

I would also like to thank Brian Wright, although I'm not quite sure exactly what for ...

Brian — What can I say, dude, 9 years of friendship; from St. Augustine's through Harvard, we've always been friends, and no matter where we are, I know we always will be. Memories — Greek tavern; The Who, Heads and Police; Tollhouse; "When famine reached Israel ..."; countless days at the beach; Mi casa es su casa.

George — Hey man, we made it. We did stumble a few times along the way, but being SF80's, we always recovered. I'm gonna miss you. Don't forget — "Fiesta a mi casa," Fubar, stankiness, proms, N.B., "This is such a Gatsby party," the purple room, and Billy and Ozzy — amigos, siempre. — Pepe

To my parents: Words cannot express the thanks I owe you two for your guidance, love, and support. Thank you for allowing me the opportunity to enjoy growing up. I love you both very much.

To Jeff: You're a great brother. Thanks for letting me tag along on the ski trips, golf games, etc.

To my friends: Thanks for making these last few years seem bearable.

# Christopher Johnson

To my friends — Thanks for the good times.

Thanks to my family for always supporting me when I needed it, and for leaving me alone when I needed to be alone. You're the best.

Thanks to my teachers, especially Ms. Moser, Mr. Donahue, Coach Taplin, and Mrs. Wardlaw.

to some remarking.

The campus's parking boundaries have not really been changed, but they are going to be more clearly marked and enforced. Other parking for all students is strictly limited to the following areas: the St. Michael's parking lot and the curbside spaces along Goldwaite Canyon Boulevard. A few spaces in the St. Michael's parking lot are reserved for the carpooling of students. The boundaries and penalties for parking anywhere else are expressly forbidden. The

Jane and Bernard: You two will be a success in whatever you do so don't worry. You have been the best sister and brother a person could have. Thanks.

To My Friends: You know who you are. I would not have been able to survive life at Harvard without you, especially Grant. Thanks.

To Mom and Dad: I do not know what I could have done without you. First of all, I wouldn't be here, but other than that I wouldn't be in the Harvard yearbook. Thank you for your support and belief in me, without which I wouldn't be doing what I am now doing, graduating.

To All the Teachers: Over the past six years, I have received a love of learning. I thank you for this precious gift and also for your guidance throughout the six years.

Twas brillig, and the slithy toves  
did gyre and gimble in the wabe.  
All mimsy were the borogoves,  
And the mome-raths outgabe.  
Beware the Jabberwock my son,  
The jaws that bite, the claws that catch;  
Beware the Jub-Jub bird  
And shun the frumious Bandersnatch.

He took his vorpal sword in hand;  
Long time the manxome foe he sought,  
So rested he by the tum-tum tree  
And stood awhile in thought.  
And as in uffish thought he stood  
The Jabberwock with eyes of flame  
Came whiffling through the tulgey wood,  
And burbled as it came.

One — two! One — two! And through and through.  
The vorpal blade went snicker-snack.  
He left it dead and with its head  
He went galumphing back.

Oh hast thou slain the Jabberwock!  
Come to my arms my beamish boy!  
Oh frabjous day, calloo, callay!  
He chortled in his joy.  
Twas brillig, and the slithy toves  
Did gyre and gimble in the wabe.  
All mimsy were the borogoves,  
And the mome-raths outgabe.

Friends and other members of 'the community:' Thanks for making my two years here great. I will have fond memories of this place.

Teachers:

Mrs. Wardlaw: Your infectious enthusiasm has given me a new outlook, not only on literature, but on learning. Yours was perhaps the best class I have ever taken. Thank you.

Mr. Clark: What a crazy two years it has been! Between E.H. and A.R., birthdays and bagels, and card-carrier tortures and fines, it is to your credit that I have learned anything at all. Thank you for making Physics understandable to a lost soul.

Miss Farr: I know our class has been inconvenient at times (often?). Thanks for putting up with me and especially for giving life to math (not to mention my Calc AP score).

Coach Sweeney: I may not have set any records, but track, even the hill-workouts, were fun. Thanks for making it so and for being a friend. (You have made my whole-hearted recommendation of Oxy's DWA Day.)

Dad, Mom, and Ed: Thanks for putting up with me these last few years. Please forgive me. I wish I could tell you how much I love you. Let me just say that under this cool and sarcastic exterior, I do.

Again, thank you for everything you have done for me.

This is the place where I am supposed to thank everybody. But I'm not going to. I did it all on my own! (huh..huh) I might thank Harvard school, but I wouldn't still be here if I didn't appreciate it. I might thank my parents, but they don't need three lines of love and devotion on my senior page to let them know I care. TO THE FUTURE!

Hip ho! I saw the hooptiest hobart yesterday. I said, "Joe mama looks!" Then I realized it was a mean kajak woman. So I said, "DE-NIED" and headed towards the pier. But the pier is lame. "No way!" "Oh yeah!" Wait a minute. If you stand behind the table you will look like you are really shrinking. "Oh man!" That was a serious dud. So anyways, there was a dog walking slowly, moving to a trot, bounding towards him. He looked like hercules unfed. No ... you look like hercules ... unfed. But I think I'm making quite a statement. Just shut up and keep your eyes forward. But grandpa says everything. That's nasty. Not as nasty as professor Sciveys or was it scibeys? "Oh ... oh ... oh n' ... n' ... no no!" I'm hungry. Would you like some mayonaise? I don't know what that is. How about some sourdough flutes? "Got the cash!" I look into your coat and I see the universe. My name is Michael Caine. Spirit House forever! Wasn't that cool guys?

Dad, you are only far in distance.

Thanks to my mom for giving me the chance to come to this great country and this great high school. A picture says more than a thousand words (these don't). May I introduce my lovely sister, please? Her name is Karolina. She is on the right side of the picture. If you smile, the whole world smiles.

Thanks to the Shermans and the Reiners for everything they did for me.

Thanks to coach Sweeney and the cross country team for making hard work enjoyable. Thanks to the basketball team. I had a great time.

Thanks to Jeff Rosenbluth, Alex Olmedo, and his family, Dr. Dworkoski, the Silva family, and Chris Johnson.

Also, thanks to all my teachers. You really helped me.

Mom and Dad: I cannot even begin to express how much love and support you have given me. These past eighteen years have been wonderful. I love you both very much.

David and Edwin: Two great brothers. Thanks for your brilliant insights, your witty comebacks, and all of the good times.

My teachers, especially Mr. Carlson, Mr. Clark, Ms. Farr, Mr. Margolis, Mr. Smith, Ms. Wardlaw, and Mr. Woods: Thanks for trying to teach me more than I could ever learn. Thanks for making school almost enjoyable. Thanks for being such special people. Ms. Moser: Thanks for being the best teacher anyone could ever have. I learned so much in your class, about reading, about writing, about my limitations.

Mom and Dad: You've led me through life and helped me with my problems and for that I love you. You also gave me more freedom than I saw any of my friends get; you let me make my own mistakes, and for that I am proud to call you my friend.

I've been all around Europe and into Japan, and those places have taught me, calmed me, and enriched me. I wouldn't trade those experiences for anything.

I know it hasn't always been easy to take me as I am, but to those of you who did you will always be special, for you made Harvard fun for me, and you, though not always knowing it, helped me through some rough times.

Mr. Dunn and Mrs. Boyd: The best teachers I ever had. You taught me more in one year than I learned the whole rest of the time at Harvard. You are my friends. I love you. I miss you.

Kurt: From 7th grade and Yosemite to J.D. in Taos we've been together. Thanks for sticking with me all those years.

Jon: What can you say about friendship except that you should never lose it. You were there in 9th grade when I felt I turned my Harvard career around and you helped me care about school and about other people than myself. For that, Greece, JHUFs, and Dodger Baseball, I hope we will always be friends.

Brian: Turn around jumpers in the rain.

Josh: Midnight B. Ball games and frisbee on the beach.

Terry: All night at the computer.

Andy: See you in Europe ACE!

I'm not the same after six years of Harvard. How could anyone be? I have developed huge calf muscles from the stairs, an iron stomach from the cafeteria, and permanent writers' cramp from the English essays, not to mention the strange ability to smell females at a distance of half a mile. However, from "scrubbing" to senior-hood, from lunch cards to Latin, from Chemistry to college applications — I survived. Who knows? Some day I might get my very own plaque in the chapel! **T**he first thing you notice is his smile. As he continually grins like the Cheshire Cat, people inevitably dismiss him either as a hopeless Dr. Pangloss, ignorant of life's grim realities, or as a walking advertisement for Crest toothpaste. The ambiguity of the smile only reflects a small part of the enigmatic nature of the little known person named Scott Sherman.

Late last week shockwaves reverberated throughout Encino when it was learned that the Harvard senior would graduate. The news sent ripples of excitement all the way to Fresno as official confirmation arrived.

But questions remained unanswered ...

There were rumors, denied by Sherman but confirmed by confidential sources high up in the Los Angeles Lakers hierarchy, that Scott had been drafted to play cen-

ter and was about to sign a lucrative six-year contract. Mrs. Sherman insisted the stories were false. "My Scott's going to college!" she told reporters at a hastily announced press conference.

More recently, controversy has stemmed from Sherman's alleged involvement with sex goddess Clara Peller of Wendy's hamburger fame. Last month Scott filed a \$12.5 million law suit against *The National Enquirer* for its scandalous article entitled "Has Clara Finally Found the Beef?"

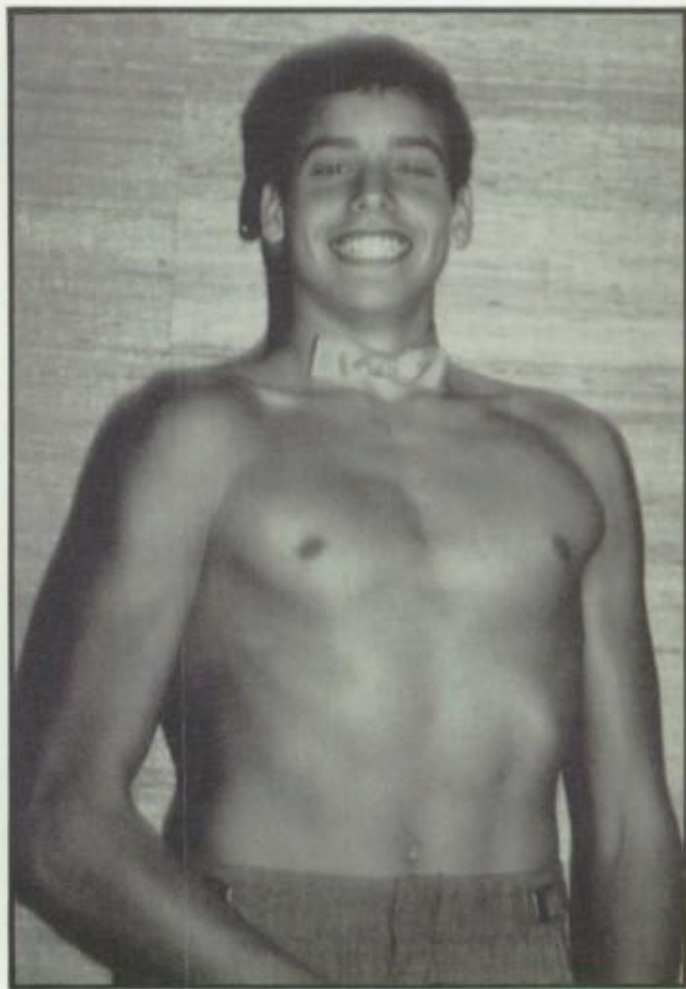

Sherman has refused to comment on these recent developments, but, in a rare NEWSWEEK interview, agreed to discuss his role as America's newest graduate, ready to take on the world. "To quote Shirley MacLaine, 'I'd like to thank everyone I've ever

met in my life,'" the future Berkeley student said.

But what about the smile? Does Sherman subscribe to the theory that "Ignorance is bliss?" What about all of life's trials and failures, the stress and the misery, the agony and the, well, even more agony? Sherman, of course, responds with a sly smirk. "To quote another entertainer, Tom Cruise in *Risky Business*," he explains, "Sometimes ya just gotta say 'What the

— Emerson

One climbs and sees. One descends and no longer sees but has seen so why bother? Just this-what is above knows what lies below, but what is below knows not what lies above. There is an art to conducting oneself in the lower regions by what one has learned higher up. When one can no longer see, one can still know.

**Mom** — Thank you for all the love and support you have shown me over the last six years. You have given me a lot, and I truly appreciate it. Make that eighteen years.

**Dad** — Even though we have not spent that much time together over the last six years, I don't mind. Hopefully we will become closer in the future.

**Artie** — The day for me to get completely even with you has not yet appeared, but I have faith. Thank you for patience, and all that you have taught me. I appreciate your concern.

**Paul** — You have taught me the importance of driving an expensive sports car and dressing well at the same time. Thank you for the knowledge and experience you have given me — things only a "middle brother" could.

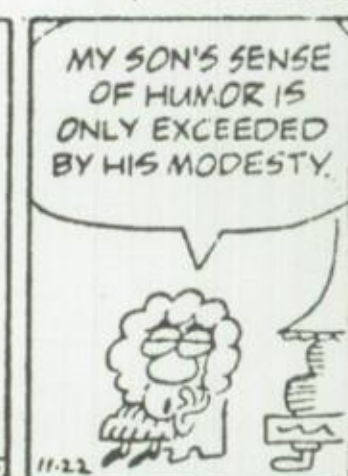

I love you all very much!

**Morgan** — You are, and always will be special to me. You helped me to grow in many ways no other person could have. Take care. I love you.

**Becky** — Thank you for having the ear and time to listen to my problems. You are a good "doctor" and a great girl. I treasure our friendship.

**Tricia** — My Westlake friend. Even though you are 5'0", you think like a giant. I admire and respect you. You are a special friend. Take care shorty, you will go a long way.

Into my heart an air that kills  
From yon far country blows:  
What are those blue remembered hills,  
What spires, what farms are those?

That is the land of lost content,  
I see it shining plain,  
The happy highways where I went  
And can never come again.

We're sleeping long and far too late;  
And so it's time to change our ways,  
But I've loved these days.

So, before we end and then begin,  
We'll drink a toast to how it's been;

# Memories ...

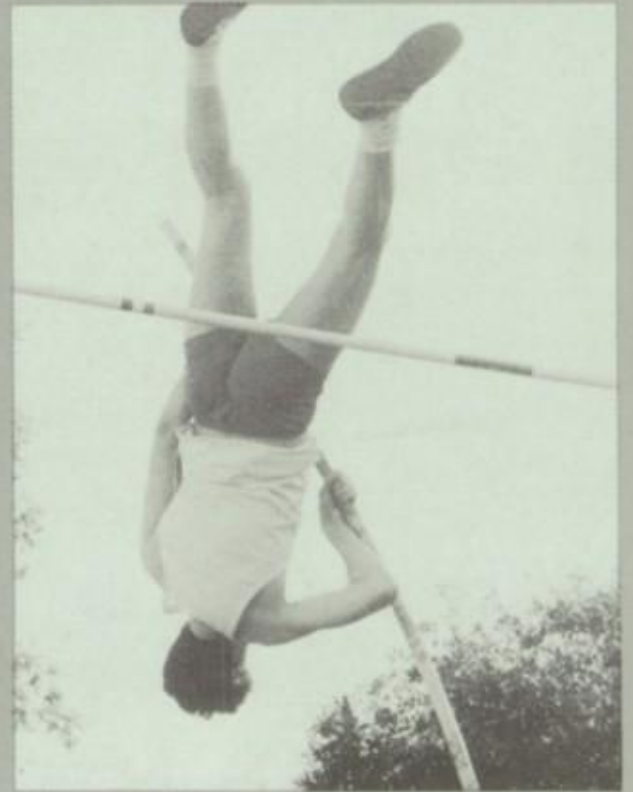

Who are these kids? Can these be the leaders of tomorrow? Braces, glasses, hair shaggy and hanging over the forehead, chubby cheeks, arms like sticks, feet turning slightly inward as they stand waiting for the RTD bus to pick them up in the rain. LaCoste shirts and corduroys hiked well above the ankles, revealing crumbling Nike sneakers. A backpack with its straps hung over both shoulders. Sneaking down to Hughes on a free period, ditching a Religious Studies class. We were them. Thank God they're only photos now.

# Varsity Water Polo

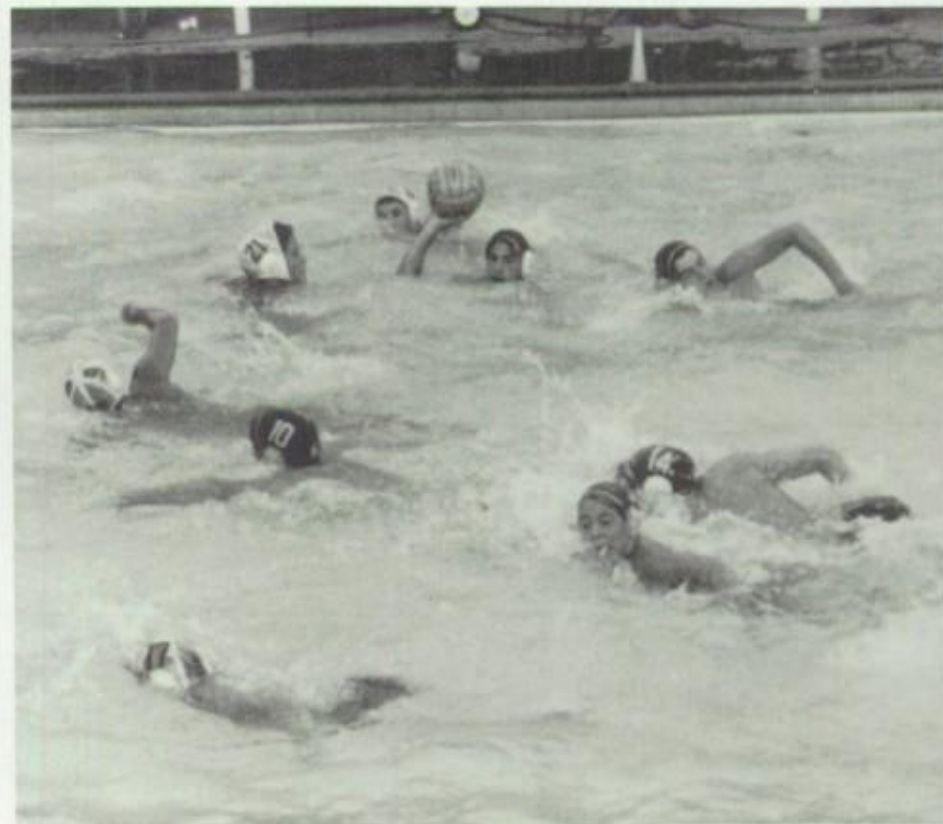

In this, Coach Stewart's last year of coaching, the Varsity Water Polo team was the best ever. The team had a great pre-season posting a 9-5 record including the highest finish ever in the La Puente tournament becoming champions of the consolation bracket. When league began the team split their first four games by losing to Beverly Hills in the double overtime and to second ranked Miraleste but gained confidence with convincing wins over Culver City and El Segundo. The second round of league held the highlight of the season when the Saracens defeated the Beverly Hills Normans in overtime in front of the biggest and loudest crowd in Harvard Water Polo history. After posting a 5-3 record and a Second place finish, the Varsity team crushed La Salle 13-2 in the first round of the CIF playoffs, most of the Varsity Water Polo squad got flat-tops at Al's Head Hunters in Van Nuys ... Thanks to Coach Stewart's and Coach Shedd's leadership and a lot of unselfish play, this team played beyond its potential to underwater greatness ...

# Frosh-Soph Water Polo

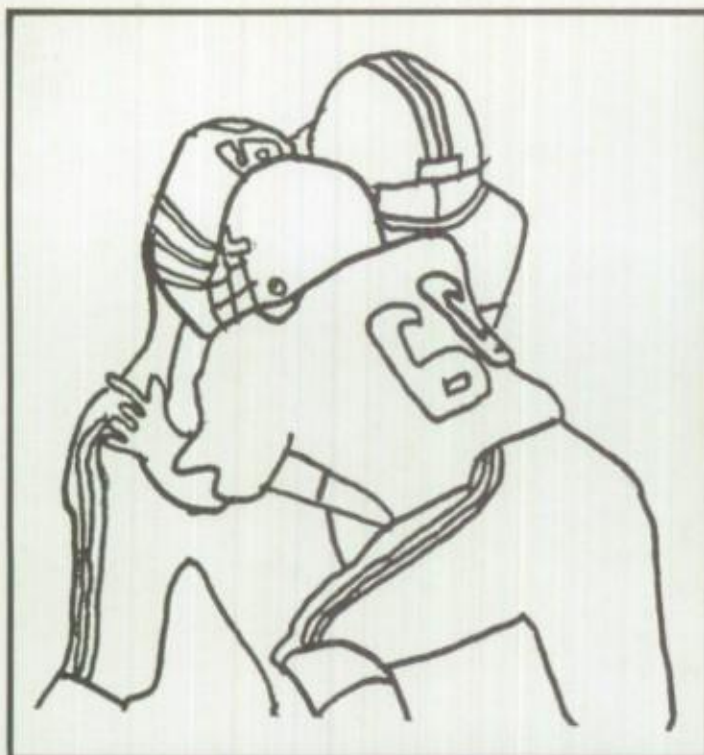

Once again, the Frosh/Soph Water Polo Team embarked on a successful season. Under the flawless direction of Head Coach Michael Segal and Assistant Coach Jonathan Sappey, the Frosh/Soph finished with a 4-4 league record for the second consecutive year. Captains Alex Norman '87 and Ivan El Sayed '87, provided constant inspiration and leadership in the water. The team's prospects appeared good as they astounded parents, coaches, and themselves with impressive early season victories over Agoura and Westlake. Harvard managed to split its eight league matches to finish in third place overall. Parental support of the team was tremendous, with almost all the parents turning out for one of Harvard's eight home games, and several even following the team on its road games. A feeling of comradery developed among all the players, coaches, and parents of the team, with all thoroughly enjoying the season and looking forward to next year.

# Varsity Football

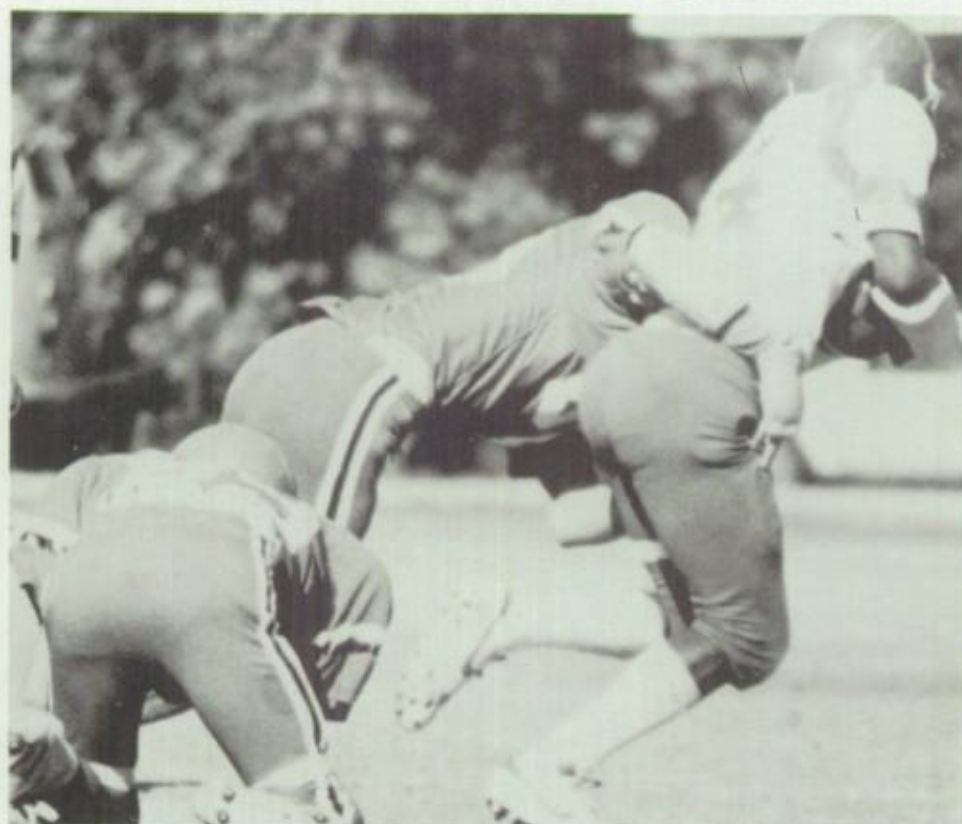

The 1984 Football team opened up summer practice with great uncertainty about their upcoming season. But a talented Head Coach Gary Thran, along with coaches Jim Brink and Lee Carlson, quickly transformed an inexperienced group of kids into a competitive and cohesive Football team. The Saracens hard-work and sacrifice paid off as they opened up their season with a convincing win over Oak Park, 20-0. Harvard went on to finish their difficult pre-season with a 2-3 record and entered league play with the goal of capturing another league Championship. The Saracens defeated El Segundo in the league opener but suffered close losses to both Morningside and Leuzinger. The highlight of the season was Harvard's big victory over Centennial at Homecoming. Everything the team had worked on all season finally came together in the last game. The Saracens closed the season with a 4-6 record, failing to make the playoffs by only a half a game. This year's team played like Champions and should be very proud of their accomplishments.

# Sophomore Football

The 1984 Sophomore football team showed their potential by achieving a 9-1 record. The team's only loss was an upsetting 6-7 defeat to Beverly Hills. The team consisted of an exceptionally outstanding and powerful defense backed by a strong offense. The defense only allowed 57 points in ten games compared to our 222 points.

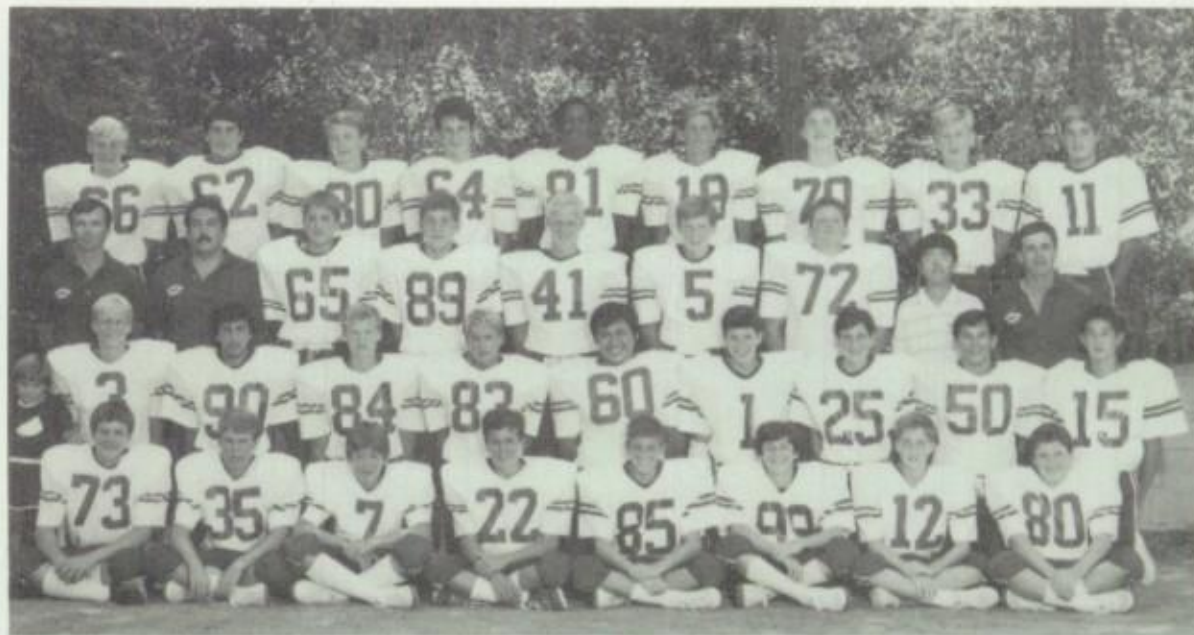

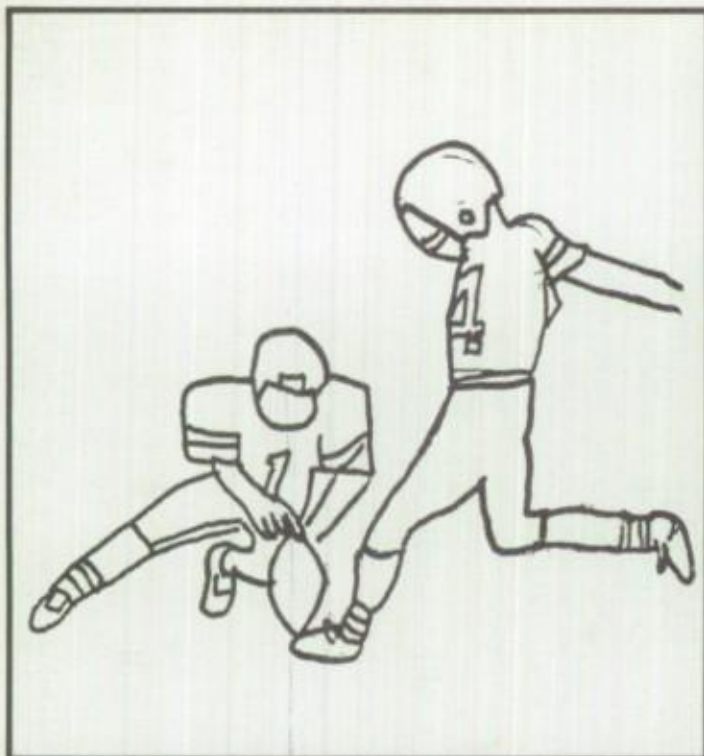

The offense was led by fullback Alex Huh who scored 15 touchdowns and rushed for over 1,000 yards. Behind the exceptional blocking of Huh, were three fine tailbacks, Kevin Kelly, Dominic Sandifer, and Andy Bell, combined together to score nine touchdowns. The passing attack was led by quarterback Mike Patterson.

The Sophomore success would not have been possible without the exceptional coaching of Octavio Estrada and Reagan Cognata. Estrada was head of the offensive attack while Cognata handled the defensive.

# Freshman Football

If you define success as having a winning record, then the Freshman Football team had little success. But if you define success as greatly improving as the season progressed and learning to play together as a team, then the Freshman team had great success. We started out by being defeated in three of the first four games. Our second game, against Agoura, showed that we could beat a team as good as Agoura and showed that we had the talent to go places. In the second half of the season, we displayed our determination against tough teams, but always managed to come out on the wrong end of the score. In several of the games the margin of loss was under seven points, which disappointed the team which had played so hard to win. After the games, there was sadness over the loss but we felt an elated sense of joy because we knew that we had played our hardest. Without a doubt, after playing together for the first year, we felt that the season was a great learning experience. Next year we should go all the way with the great talent displayed all year long.

# Varsity Cross Country

After a disappointing 1 point loss to Culver City in League Finals last year, the members of Varsity Cross Country team assembled in early September eager to prove themselves. Through searing 100 degree months of summer Varsity members trained. On one day, the bank thermometers along Ventura Boulevard read 119°. But all the tortuous training paid off. After winning its first meet by forfeit, the Saracens took their first loss to an incredible Cathedral team that was ranked 4th in CIFIA. Harvard then defeated Centennial, a league opponent, before going on to win the Bell-Jeff Invitational defeating 10 other teams. The finish was the best ever in an invitational for the Harvard Saracens. Jubilant after the win at Bell-Jeff, Harvard then proceeded to run over and post the remaining 4 teams in League before League Finals. At League, the Varsity team, consisting of Tregillis, Hon, Pajuri, Oviatt, Torrens, Hollingsworth, Halpape crushed the opposition. The top 5 runners far exceeded their projected places in League. They finished respectively 1st, 2nd, 4th, 7th, 8th, 21st, and 22nd. An unprecedented 4 Varsity runners were All-League. The next week, at CIF preliminaries the team finished 6th out of 11 of the strongest teams in CIF. Tregillis and Hon led the team to a strong start, finishing in 10th and 12th place. Matti Pajuri, the Flying Finn, finished in 19th place with Peter Oviatt and Jim Torrens completing the scoring five in 43rd and 44th place.

The Varsity members were sorely disappointed with the 6th place standing, especially since they narrowly missed qualifying for CIF finals, a feat that no Harvard team has yet achieved. Yet even though the Harvard Saracens failed to qualify, this year's Varsity finished with an incredible season, losing only to Cathedral, whom they later defeated in an Invitational, and going undefeated in League. The team's strength and depth came from newcomers Matti Pajuri, Freshman Peter Oviatt, and Sophomore Jason Hollingsworth, who was in a dogfight with Seth Silverstein and David Gales for the seventh Varsity spot. The 1984 Cross Country season was impressive, outshining all previous teams and though four of the top five runners will be gone next year, the 1985 team will be looking to match or even surpass it.

— Josh Hon

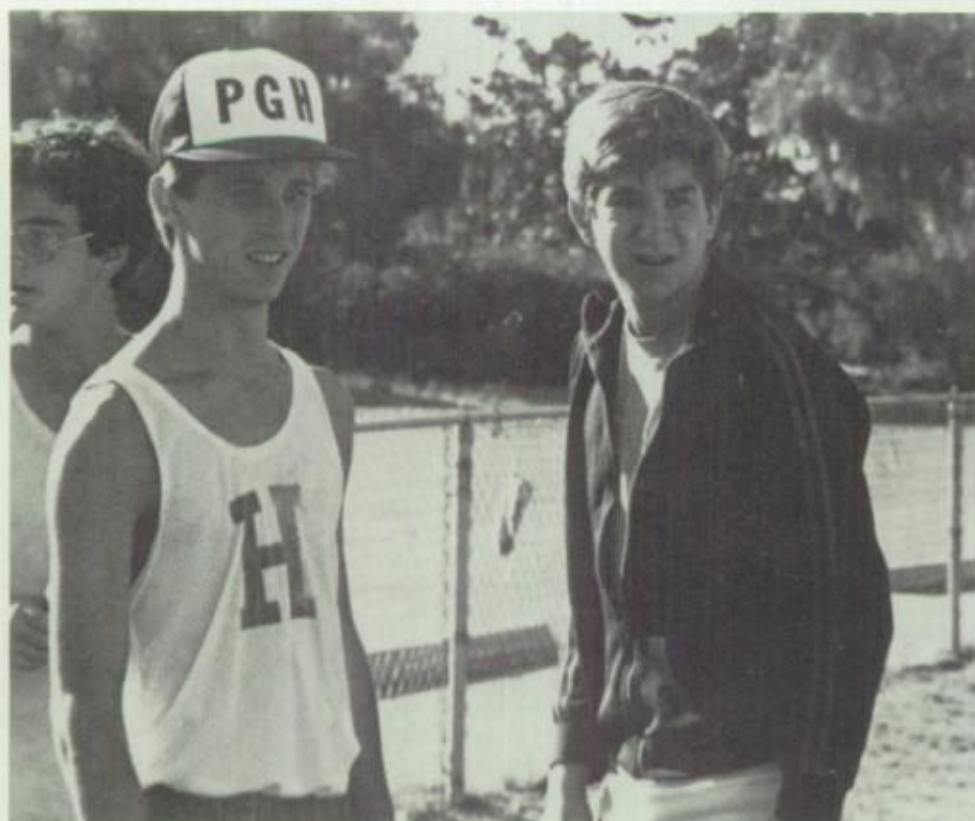

For the third year in a row, the JV Cross Country team captured the league title, dominating the other teams both in their dual meets and at the league finals race. This is no **Rocky** story, no struggle from setbacks and overcoming overwhelming odds. The team was simply awesome, beginning the league season with a victory and never looking back. Even Miraleste, billed as the greatest threat this season, fell as the Harvard racers blazed over the Palos Verdes hills to the finish line. The team also ran excellently at the important Bell-Jeff Cross Country Invitational, taking first place for the first time in Harvard history. But the real race of the season was of course the climatic league finals where the Harvard runners from all groups (A,B,C & D) endured towering hills of dirt and winding sidewalks to finally collapse at the finish line, tired, sweaty, and league champions. Led by MVP Seth Silverstein, Randy Roberts, David Daniel, and most improved runner Jon Weisman, as well as many others, the JV team was undoubtedly, in Coach Phil Sweeney's words, "the greatest cross country team in Harvard History."

# Varsity Basketball

---

Many factors went into the season (1-20) that the Varsity Basketball team experienced. One of them was the severity of the schedule. Every team that the Saracens faced, save Mojave (only victory), Brentwood, and Santa Monica's (who are in what many consider to be the hardest league in the country), made it to the CIF playoffs.

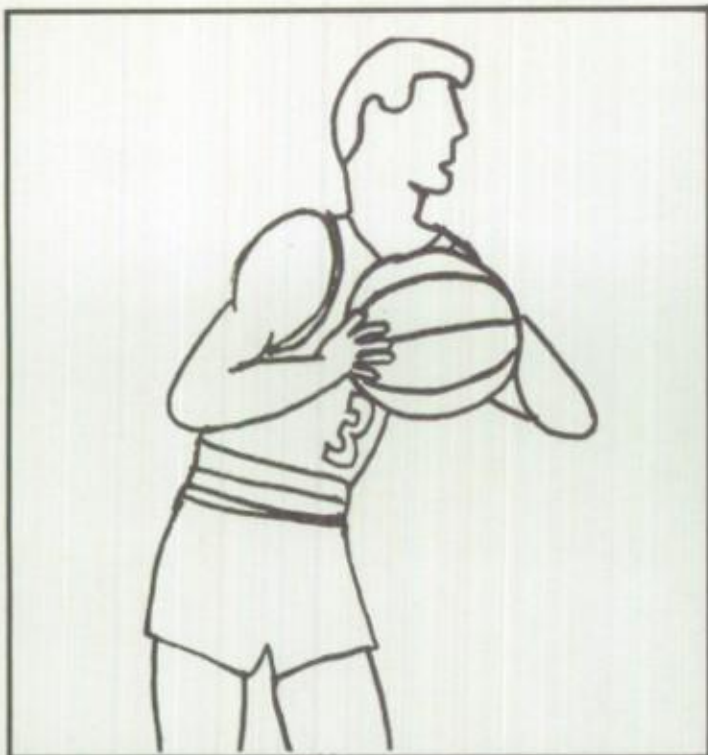

Another reason was the difficulty of the league. This year perennial basketball powerhouses Morningside, and Centennial were added to the Pioneer League to complement the other tough schools: Leuzinger, Miraleste (defending league champions & runner-up in last year's 1A playoffs), and El Segundo.

The final factor was the Varsity Squad's lack of experience, as only three played on last year's Varsity team. The remainder were seniors in their first year at a varsity level or underclassmen: this team consisted of five underclassmen. Those underclassmen, though got invaluable playing time this year, and this is sure to be a major factor in the years to come.

# Junior Varsity Basketball

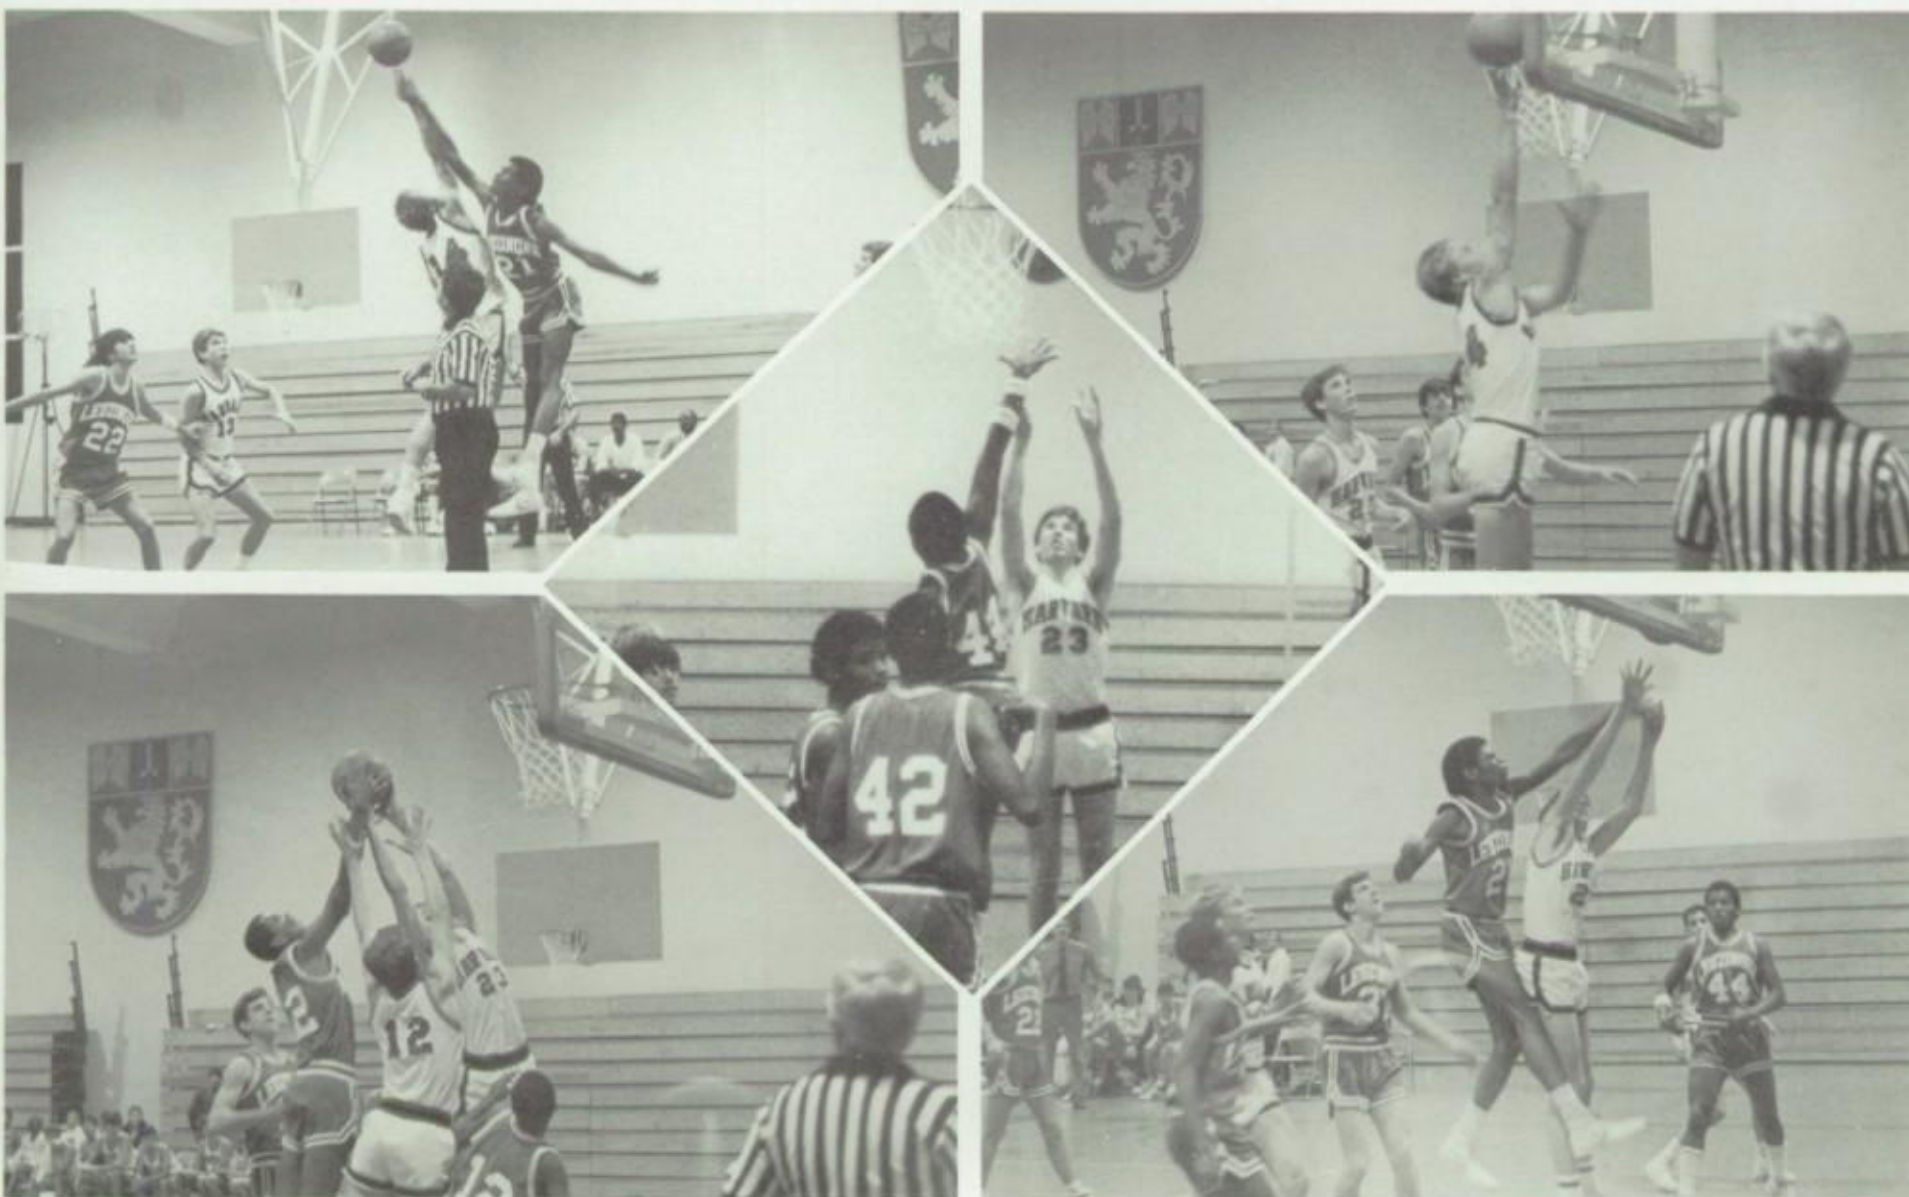

The 1985 Basketball team improved throughout their long difficult season. Our overall record ended up at 9-13. With strong team play in the pre-season and Christmas tournament the J.V. team finished with a 7-5 record. However, when we entered league play we faced teams which had great amounts of talent.

Over the 3 month period, each player contributed to the team. Consistent scoring was turned in by Mike Lowe and Steve Green while Fred Brende and Peter Andersons pulled down their share of rebounds. Consistent playing was as well found in the playing of Mike Patterson and Damon Buford. John Collins, Jimmy Cotter, John Hyams and Tony Cardoza also added to the overall team play. Although the record may not show it, Harvard's J.V. Basketball possessed a good deal of talent with good team play. The coaching of Coach Durnan helped the team enormously and had a major impact on each player's basketball skills.

Many thanks go to fans and parents who supported our team throughout the year.

Led by Coach Taplin and Assistant Coach Lyde Sizer, the J.V. soccer program was, as usual, full of talent and provided a great deal of learning experience for the members of the team. The season began in early November. The first week was dedicated to getting fit and making cuts. By December 1st the day of their first game, the team was beginning to feel comfortable together. This game, which was the first round of a J.V. tournament at Calabasas High, ended up an overtime loss of 5-4 but the team went on to take 1st place in the consolation round of the tournament. Under team captain and goalie Jacob Matthews, the team won 3 of their first five games and became increasingly hopeful of winning the Pioneer League title. Unfortunately, the team then underwent a six game losing streak which lowered both their spirits and their confidence. They managed to regain enough confidence to win or tie half of their last eight games, giving them an overall record of 5-12-2, but their league record ended up a disappointing 1-3-2. This record was neither good enough to win the league title nor an indication of the team's skill, but all the players improved both as individuals and as team members and can look forward to an improved soccer program next year, whether they return to J.V. or move up to Varsity.

The Harvard Frosh-Soph Basketball team, coached by James Liaos, had a strange season. The first half of the season was like a dream but the last half was like a nightmare. Not coincidentally, the nightmare took place during the league play.

In the first game, actually a scrimmage, Harvard defeated Calabassas despite frequent substitutions and basically no offensive plays. In the next game Harvard dominated an inferior Bel-larmine-Jefferson team and won by over 20 points. The next two games played, especially the second, should have served notice to the team as to what could happen in league play. Culver City confused Harvard with a relentless press and the team, could never get into the game. After these two lessons, Harvard hit its high point of the season by winning five straight games to post an impressive 7-2 non-league record.

In the first four league games, the team finally realized what they were up against by losing them all. In the next game against Centennial, Harvard played its best game, although it was a loss, Harvard held the Appaches to a two point lead at halftime. The season ended on a very bright note. After a demoralizing loss to El Segundo, in which a 40 foot shot by El Segundo tied it up, Harvard won its last league game of the season by playing as a team and defeating rival Leuzinger.

Bottom Row: Eric Kezirian, Jake Adams, Bill Mellinthin, Mike Huskins, Jared Wolff, Robert DeJong, Rutland Baker.

Harvard's Frosh-Soph Soccer team finally ended their long season on Wednesday, February 13.

The soccer team began the season with a disappointing and discouraging game against varsity Bel-Air Prep which defeated them 5-0. The team continued the season on a losing record of 0-4 until they gained enough stamina and skill to defeat Pater Noster on a close score of 3-2; Harvard's third goal was scored in the closing minutes of the second half. Outstanding performances were shown by forwards, James Colee ('88), David Pokress ('88), and Robert DeJongh ('88). Also showing outstanding skills were rover Dana Kravetz ('88), sweeper, Josh Geller ('88) and halfback Mike Huskins ('88). This game concluded the first half of the Harvard season.

Harvard's second half started on a surprising winning record. The team went through 5 straight shutouts, 3 of which were accredited to David Pokress, who scored the only goal in each of them. Strong performances were shown by goalie Richard Rubin ('88), fullbacks Glenn Thomas ('88), John Calame ('88) and C.B. Baumgardner ('88).

The team's winning streak was broken by a disappointing tie against Bosco Tech 1-1, thus bringing the record to 6-5-1. Coach Boualem Bouseloub said "we played a good game, the whole team played well." The two last games were very tough games for the team. The game against Cathedral was a bad game for Harvard, the whole team wasn't able to put things together and lost 3-0. The last game proved Harvard's improvement since the beginning of the season, according to Coach Bouseloub "the team started at 30% and went to about 70." The coach proved to be right and the team began the game with several shots at Crossroad's goal but weren't successful in scoring. Late in the second half, James Colee finally scored the only goal in the game, thus leading Harvard to its last victory. Good performances were shown by Robert Nishioka ('87), Greg Wolff ('88), Adam Oliansky ('88), Jared Wolff ('87) and Ted Schweitzer ('87). Outstanding performances were given by Colee, C.B. Baumgardner, John Calame, Glen Thomas, Mike Huskins, Jacob Adams, Josh Geller, Dana Kravetz, David Pokress and finally Robert DeJongh. Thus bringing Harvard's final record to 6-6-1, a great comeback.

# Varsity Soccer

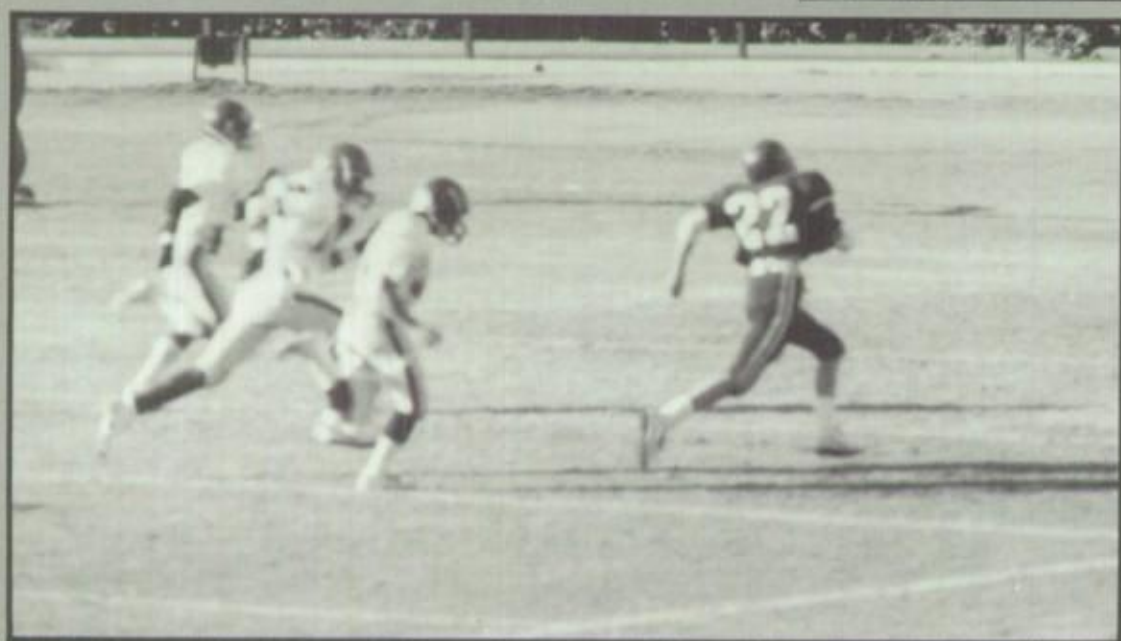

As the soccer season started, all expected great things from the 1984-1985 Varsity team. With only three returning varsity players, the team's strength lay with the many talented juniors coming up from the J.V. team. With not one "Superstar" upon which to rely, a group of players with more than average ability became a true team.

Despite a disappointing pre-league season (1-6) during which many games were against vastly superior competition, valuable experience and maturity were gained. The team went into league play with a championship on their mind, winning four of their first five games. However, due to injuries and a dampening of spirits, the team finished league play with a 4-3-1 record.

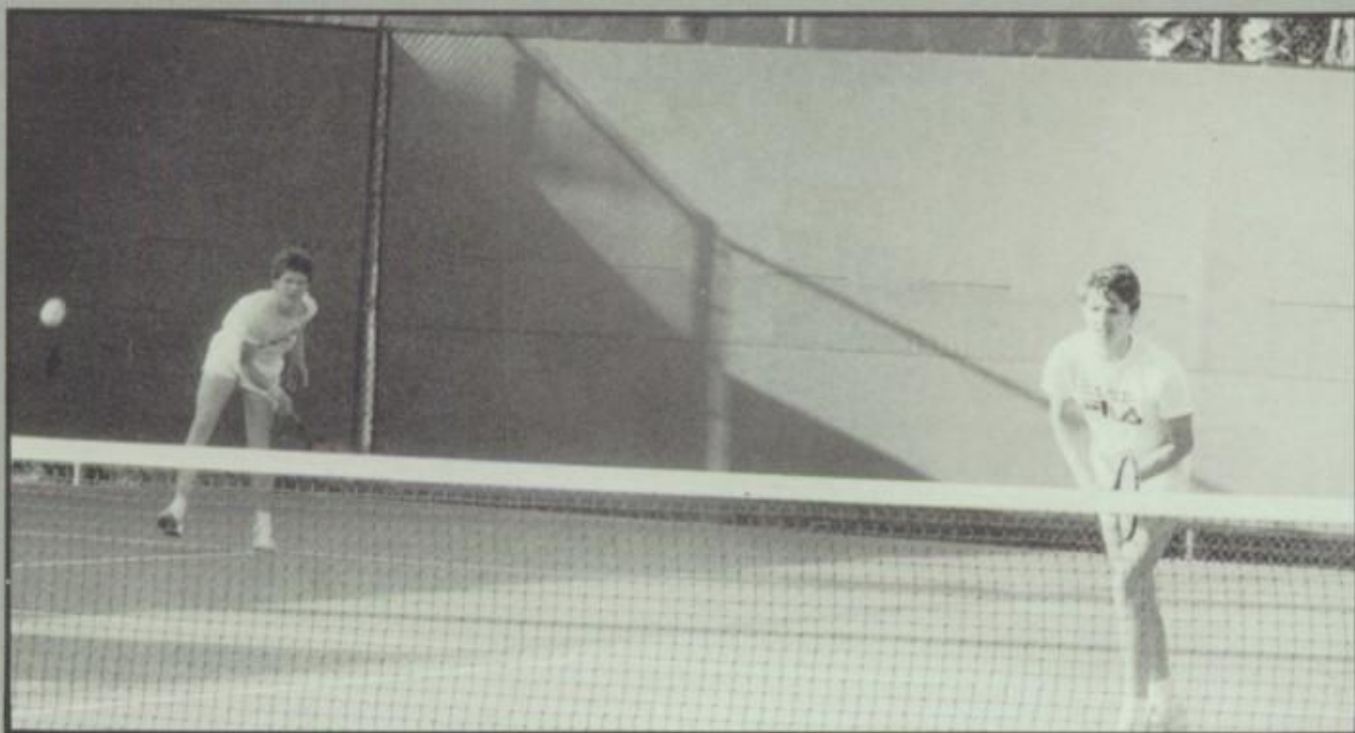

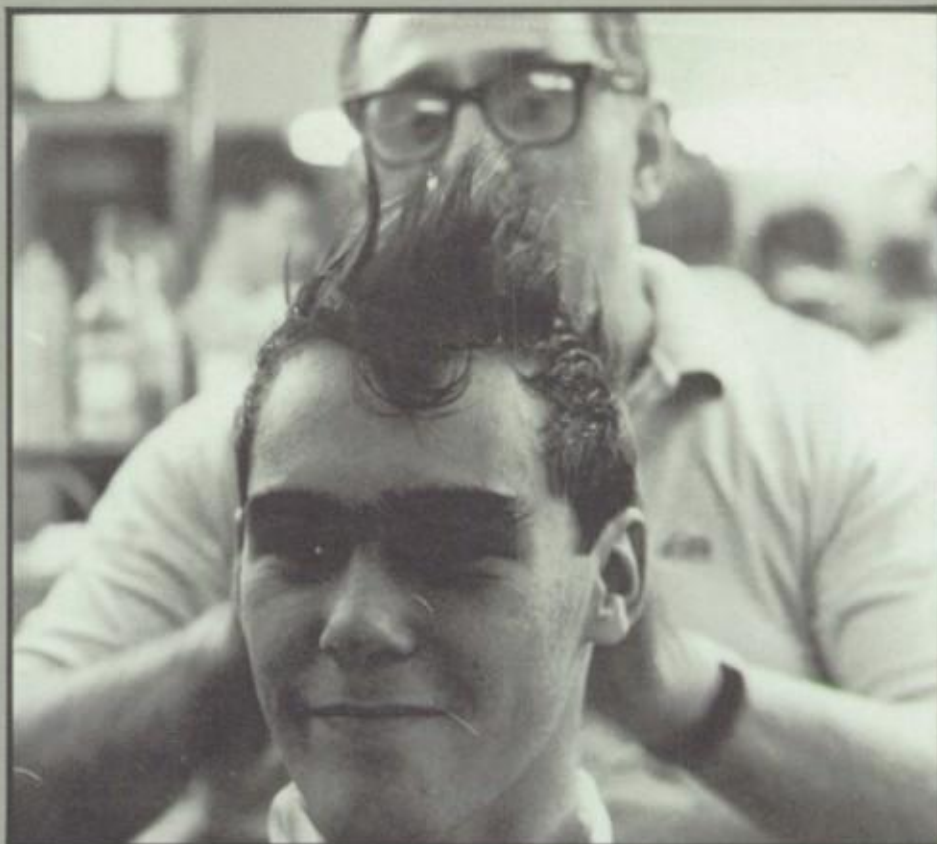

Finishing 3rd in the league, the team went to the 3-A CIF playoffs.

# Varsity Wrestling

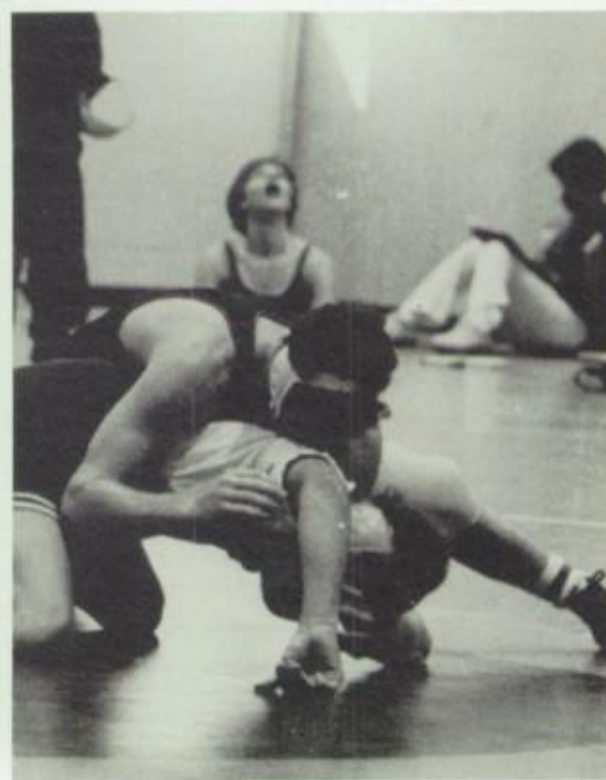

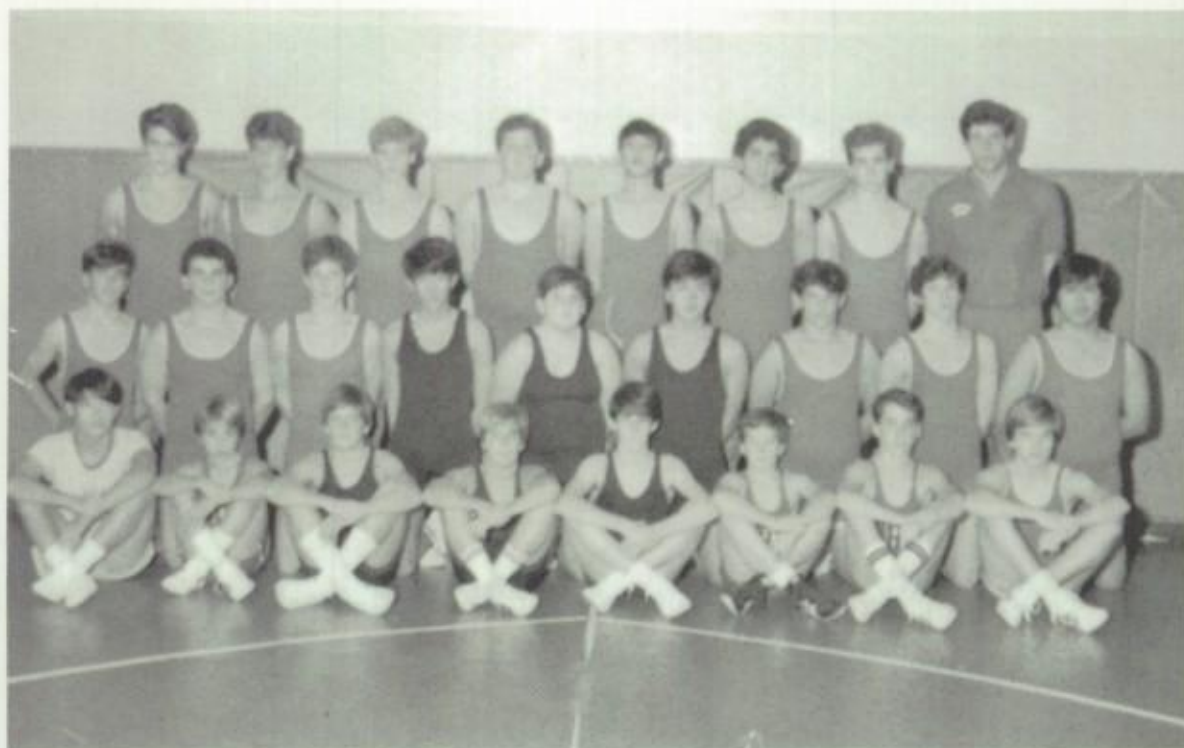

The young 1984-1985 Varsity Wrestling team placed a respectable third in the Pioneer League, behind Leuzinger and El Segundo. The team fell one match short of upsetting first place Leuzinger, and El Segundo placed a strong seventh in the C.I.F. tournament. The team showed vast improvements throughout the season, and had many individual successes. A record three freshman, and three other first year wrestlers earned their varsity letters. Several of these wrestlers did very well in dual meets and tournaments; freshmen Robin Kar placed third in the tough Alemany Invitational, and placed second in the League Finals. The team's four year wrestlers, Greg Eisenrich, David Pope, and Robert Wright, gave consistently strong performances, all three winning the Valley Five Way Tournament, and qualifying for the C.I.F. tournament. Two other wrestlers, Aaron Tuchfeld and Brian Weiss also qualified for the tournament. During the course of the season, several individual season records fell, such as three point near-falls to Wright, and two point near-falls, takedowns, and pins to Eisenrich. Pope and Eisenrich also moved into the number two and three spots respectively on the all-time win list. Next year the team should look to returning juniors Brian Treanor, Mark Inaba, and Tuchfeld for its leadership.

# Junior Varsity Wrestling

This year Harvard had perhaps one of the youngest J.V. Wrestling teams ever. Despite their inexperience and the large number of illnesses, the team became league champions after taking the league tournament. The J.V. team developed under the guidance of Coach Wayne Ezerzky from a mediocre group to a winning team. They showed pride and determination, which pulled them through when they were the weaker team. There was a great deal of support in the team, creating a very unified and strong feeling. Several freshmen, such as Mike Winkler, Ben Choi and Jon Ore were an inspiration to their teammates, while returning sophomores Chris Casparian, Will Silva, Jon Mandel and Peter Cramer lent their experience to the benefit of the team. All in all, it was a terrific season, and this year's J.V. league Champions plan another enjoyable year as next year's Varsity Champions.

#### Varsity Baseball

The 1985 varsity baseball team had a powerful season. They came blasting out right from the beginning with impressive victories over teams such as Bell-Jeff, Montclair, and the Beverly Hills' Normans, the first ever for Coach Brink over Beverly. The team was led by a strong group of seniors including Danny Andrews, Dan O'Leary, and Erik Carlson along with sophomores and juniors, including the ever talented Meritt "No Stopping" Robinson. Pitcher Robinson, along with Todd Stevenson, another senior powerhouse, have been blazing the ball past their opponents. Stevenson threw an exciting ten strike-outs against Montclair. In terms of batting, the team had their slumps but always rallied late in the game. Robinson's powerful swing and Carlson's innovative plays helped bring runners home. Overall the team had a successful year. Not only was a great team made for the year, but with younger upcoming players, the team appears to have a solid future.

#### Saracen Stadium

The parents of the Varsity Baseball team thank the Administration, Trustees, Athletic Department and the Maintenance staff for our new baseball field, the Saracen Stadium.

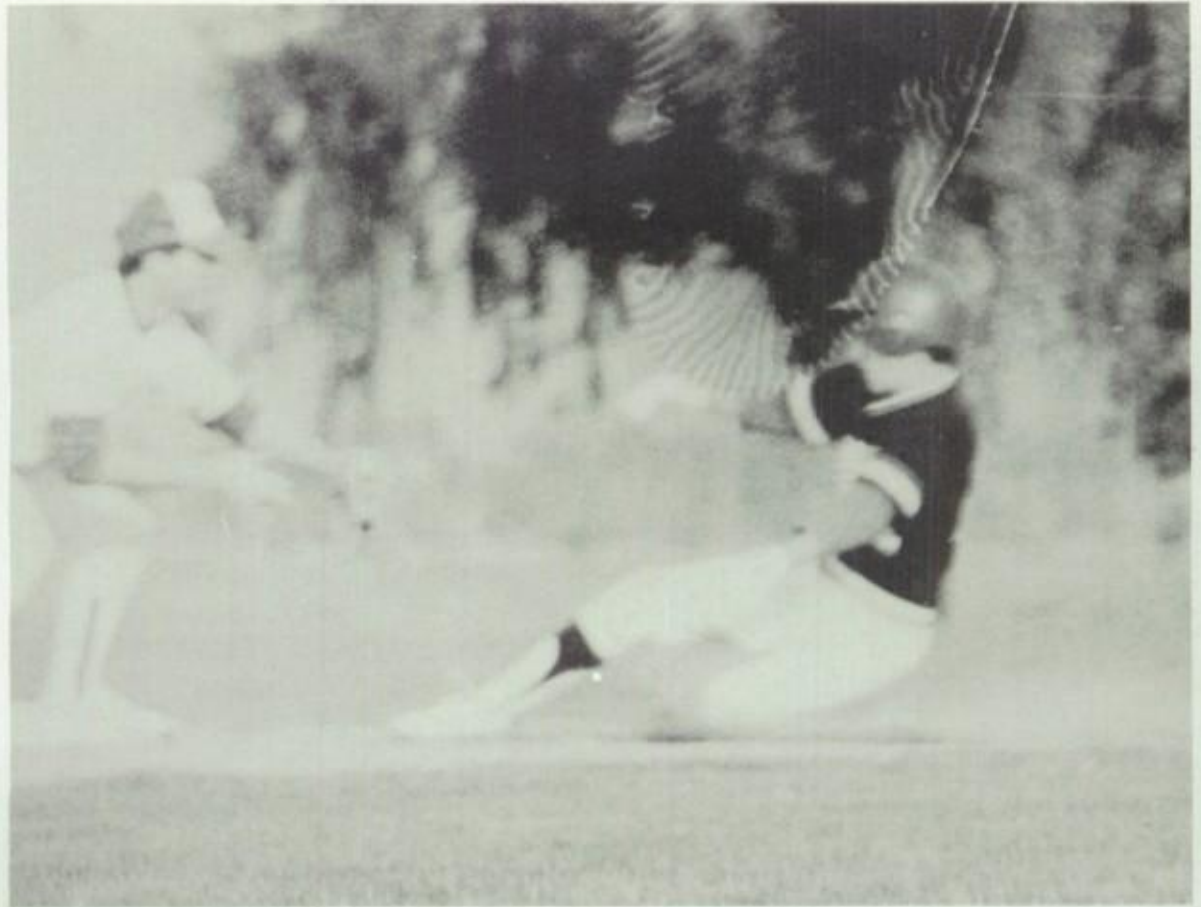

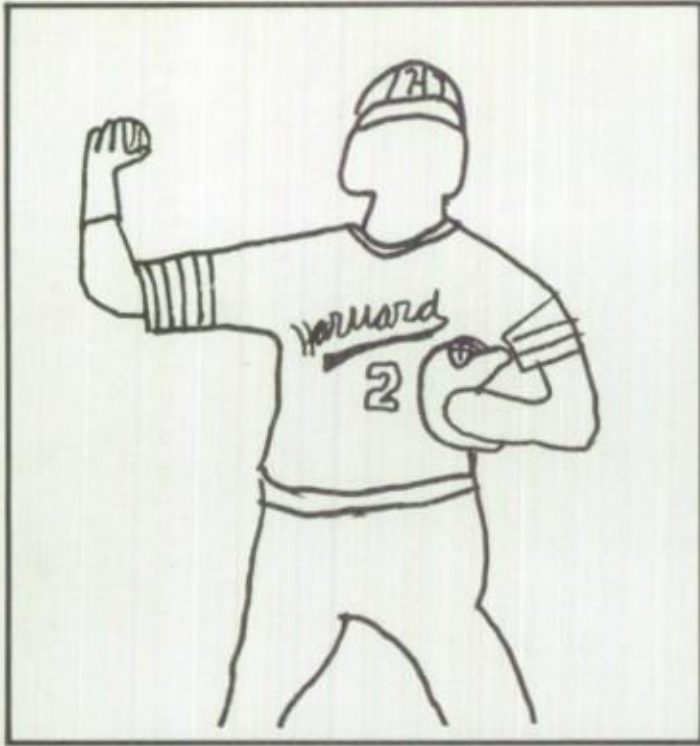

Located adjacent to Balboa Park, just east of Louise Avenue on Oxnard Street in Encino, the newest addition to the Harvard Community was ready for the first game of the 1985 season.

Congratulations are in order to the dedicated people who made Harvard's very own stadium a reality. They are Headmaster Christopher Berrisford, Rogg Collins, a member of the Board of Trustees who was instrumental in finding the land, planning the stadium, and bringing everything together, Athletic Director Mark Newman and Frank Hedge, our Plant Manager, who supervised and help build the facilities.

We encourage all students and fans to join us on the bleachers to root for Coach Brink's Varsity and Coach Grave's Junior Varsity. The boys are hoping to bring championships to Saracen Stadium in its inaugural season. So, come on out ... the price is right, there's ample free parking, and not a bad seat anywhere.

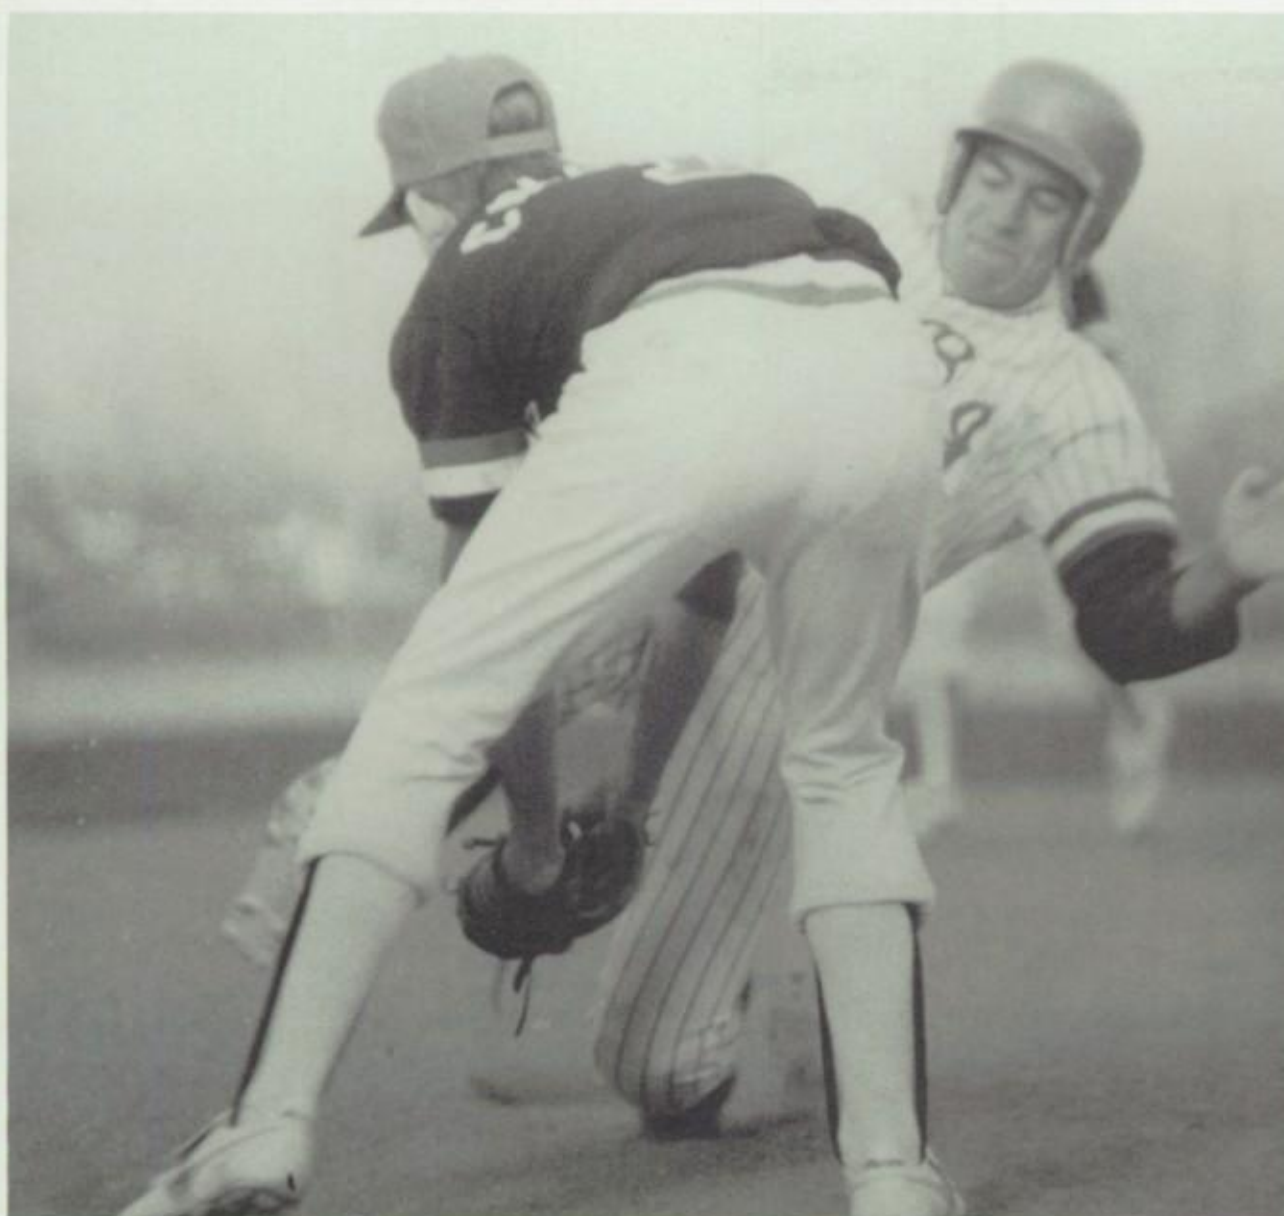

— The Parents of the  
1985 Varsity Baseball Team

# Varsity Track

1985 saw the Saracen Varsity Track team develop a more serious attitude towards their training as well as their competition. Under the direction of the new Head Coach Nigel Taplin, Harvard possessed more potential than ever before.

Although the loss of top performers from the class of 1984 undoubtedly hurt the team, the Saracens made up for it with such newcomers as John Butler, and with the help of returning Varsity Letterman Chris Tregillis and Josh Hon.

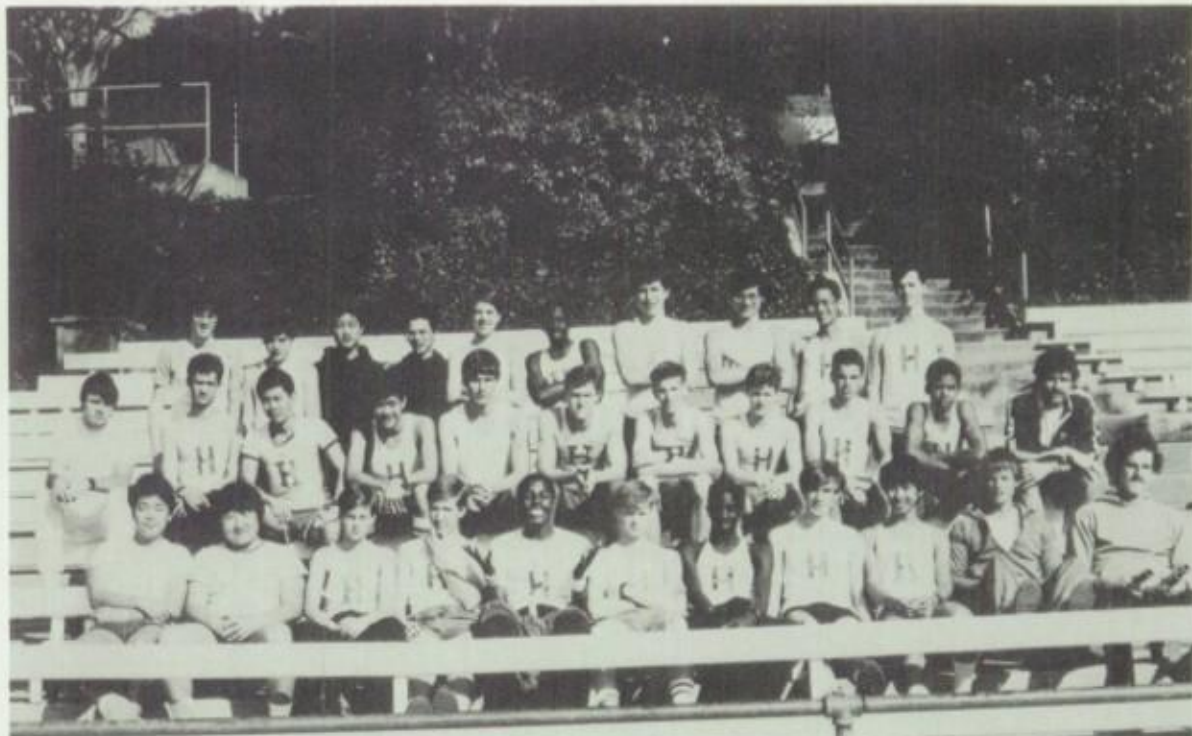

The competition during the year was very stiff, but for the most part the Saracens were up to the challenge. This year was the start of a new era for the track program as athletes and coaches took everything seriously — so seriously, in fact, that their mere presence instilled fear into the hearts of all the teams they competed against.

Therefore, what will the future hold? A tradition of quality performances that will enable Harvard to garner future League Championships.

At the beginning of the year, the Harvard Golf Team had hopes of rebounding from a disappointing 1984 season. With the same cast of players, the team had the added advantage of experience for the 1985 schedule. Five of the six starters were seniors, all of whom had played competitive golf as juniors. The team was led by Greg Abdulian '85, a three time All-Ocean League golfer. Behind him was talented sophomore Jeff Salzman, junior Danny Zimring, and seniors Gary Borden, Brian Cullen, Alex Pearlstein, and Tom Lin. Coach Thran was confident of leading his troops to a winning 1985 season. In his words, "We could go all the way in CIF this year. Our 1985 team is the most experienced in recent history!"

### "Student Council"

Unlike the past years where the student council was known to be either too serious or too lax, this year's council was both and would be described as "efficiently responsible." It was "efficiently responsible" in proceeding to fulfill its duties with the utmost care and diligence. This year's council, under the audacious leadership of First Prefect Richie Bothenberg accomplished what other councils in the past have only attempted to do, in its own quiet way. But more important than its accomplishments was its ability to set high standards for future councils to strive for. It is this goal that is so essential in improving any society and it is this goal that we achieved this year, surpassing all tangible accomplishments.

Our accomplishments were aimed at the many facets of the Harvard Community. Athletically, we aimed at generating more enthusiasm through the Pep Rally Committee. Our attempts to improve and redefine the role of student government were enacted through the Elections and Government committee. Our role as student-faculty liasons were carried out in our day-to-day duties and through the curriculum committee. We fulfilled our responsibility to the community at large by organizing charitable activities. Never before has a student council played such an active role in student affairs. Never before has a student council been "efficiently responsible."

The major student council fund raising effort this year was Feed the World Day on February 7th. After a few days of promotion, a table was set up that Thursday in front of Chalmers, where student council members received contributions from students of all grades, ranging from a few dollars to as much as twenty. The faculty also chipped in, and everyone who contributed received, along with the good feeling of giving, a large red crayon "H" on the back of his hand. The student council had originally planned to match all student contributions with funds left over from the Torch fund-raising drive last year, but the students quickly surpassed the council's 900 dollar fund. All in all, the school raised a total of 2200 dollars for the Presiding Bishop's Fund for Ethiopian Relief. All of the money went to Ethiopia. The event also got a good deal of local press coverage, namely on the local Channel 7 News and in the L.A. Times. Richie Rothenberg said it best as he and I collected money during the middle of the day. As we took money from student after student who stood around the table in a group, he turned to me and said, "This is amazing." It was.

— Brian McCuskey '85

The 1984-85 school year was the first in some time to reinstitute the office of Dean of Students. Mr. Robert Graves, of the Social Studies department, filled the office this year, acting mainly as a student/faculty liason. He worked closely with the student council, throwing ideas at them and having a few thrown back, listening to suggestions and bringing them up before the administration, and mediating the votes. Within the student council he met separately with the Prefects and Headmaster Christopher Berrisford in a "state of the community" weekly meeting in which current campus issues were discussed. Dean Graves was also responsible to a certain extent for student discipline, often admonishing the senior class with a wry smile not to "park in the red zone." The office of Dean of Students needs a man who not only commands the respect of both the student body and the administration, but also can listen sympathetically and with a sense of humor to both the student and the faculty side of the issues. Dean Graves fit right in on both counts.

## Eleventh Grade Officers

Roving Reporter E.J. Spode here, undercover among the Junior Class, observing their ways, noting their motives, watching their methods. This was the Pressure Zone. With college applications only a year away, these kids had to buckle down and "work like a demon" in a last ditch effort to salvage a sinking GPA in the hopes of tempting Stanford in the fall. They were bombarded with a progression of rows of little empty bubbles and No. 2 pencils, and were forced to memorize strings of dehumanizing numbers, the most popular of which was 052135. Well, boys, it doesn't stop there. If you've never known your Social Security number, you'll learn it, but nothing could prepare you for the experience of putting the last six years of your life on six sheets of paper and then sending the package off to a lot of people you don't and will never know. Oh, but they'll know you, yes indeed. Hey, no pressure though, after December it's all over, and Southern California is known for its beaches . . . E.J. Spode, live from North Hollywood, signing off.

Steven Lee-President, Jon

Ivan Henkovich, investigative reporter, on the scene with the Sophomore Class here at Harvard School. It seemed that tenth grade is the middle ground, the year of oblivion. Too far away from the college admissions process to be seriously concerned with it, and past the initial shock of the Upper School, these kids were free to involve themselves with the finer points of being a student. They learned that going on retreats isn't cool, that dances aren't really the place to hang out on a weekend, and Father Adams beat into their heads the intricacies of "propagation of society." But, after this, the oblivion is over, guys. You have a taste of the tidal wave of standardized tests when you sweated through the PSAT, but remember, from here on out they all count. Colleges will be sniffing at your door (you hope), and you'll have to put aside your thoughts of society propagation in favor of brag sheet propagation and the GPA. For those of you already in the throes of senioritis, cure it fast, at least for next year. Good luck from Ivan Henkovich, on the spot in Coldwater Canyon.

#### The Ninth Grade Retreat

Who would ninth graders like to be stranded on an island with? The answer was easy for those who joined the ninth grade retreat to Catalina Island in October. They enjoyed being "stranded" for the weekend with old friends and those who soon became new ones.

There is nothing like an ocean voyage to help make these friendships and to forget the cares of the classroom. This voyage began on Friday afternoon when the students boarded the ferry for the picturesque town of Avalon on Catalina. After the ferry docked, the students were given an hour's free time to roam the quaint streets of Avalon and take in the sights. Then, another ocean voyage — this time to the north side of the island and their weekend home at the Catalina Island Marine Institute.

There, until Sunday, the ninth graders spent their time snorkeling, learning about marine life and ecology, hiking through the unusual terrain, joining their friends in various sports, and mingling with the teachers who accompanied them.

With good weather, good friends, and good cheer, the students returned to Harvard on Sunday, refreshed and happy that they had joined this year's retreat.

## Ninth Grade Officers

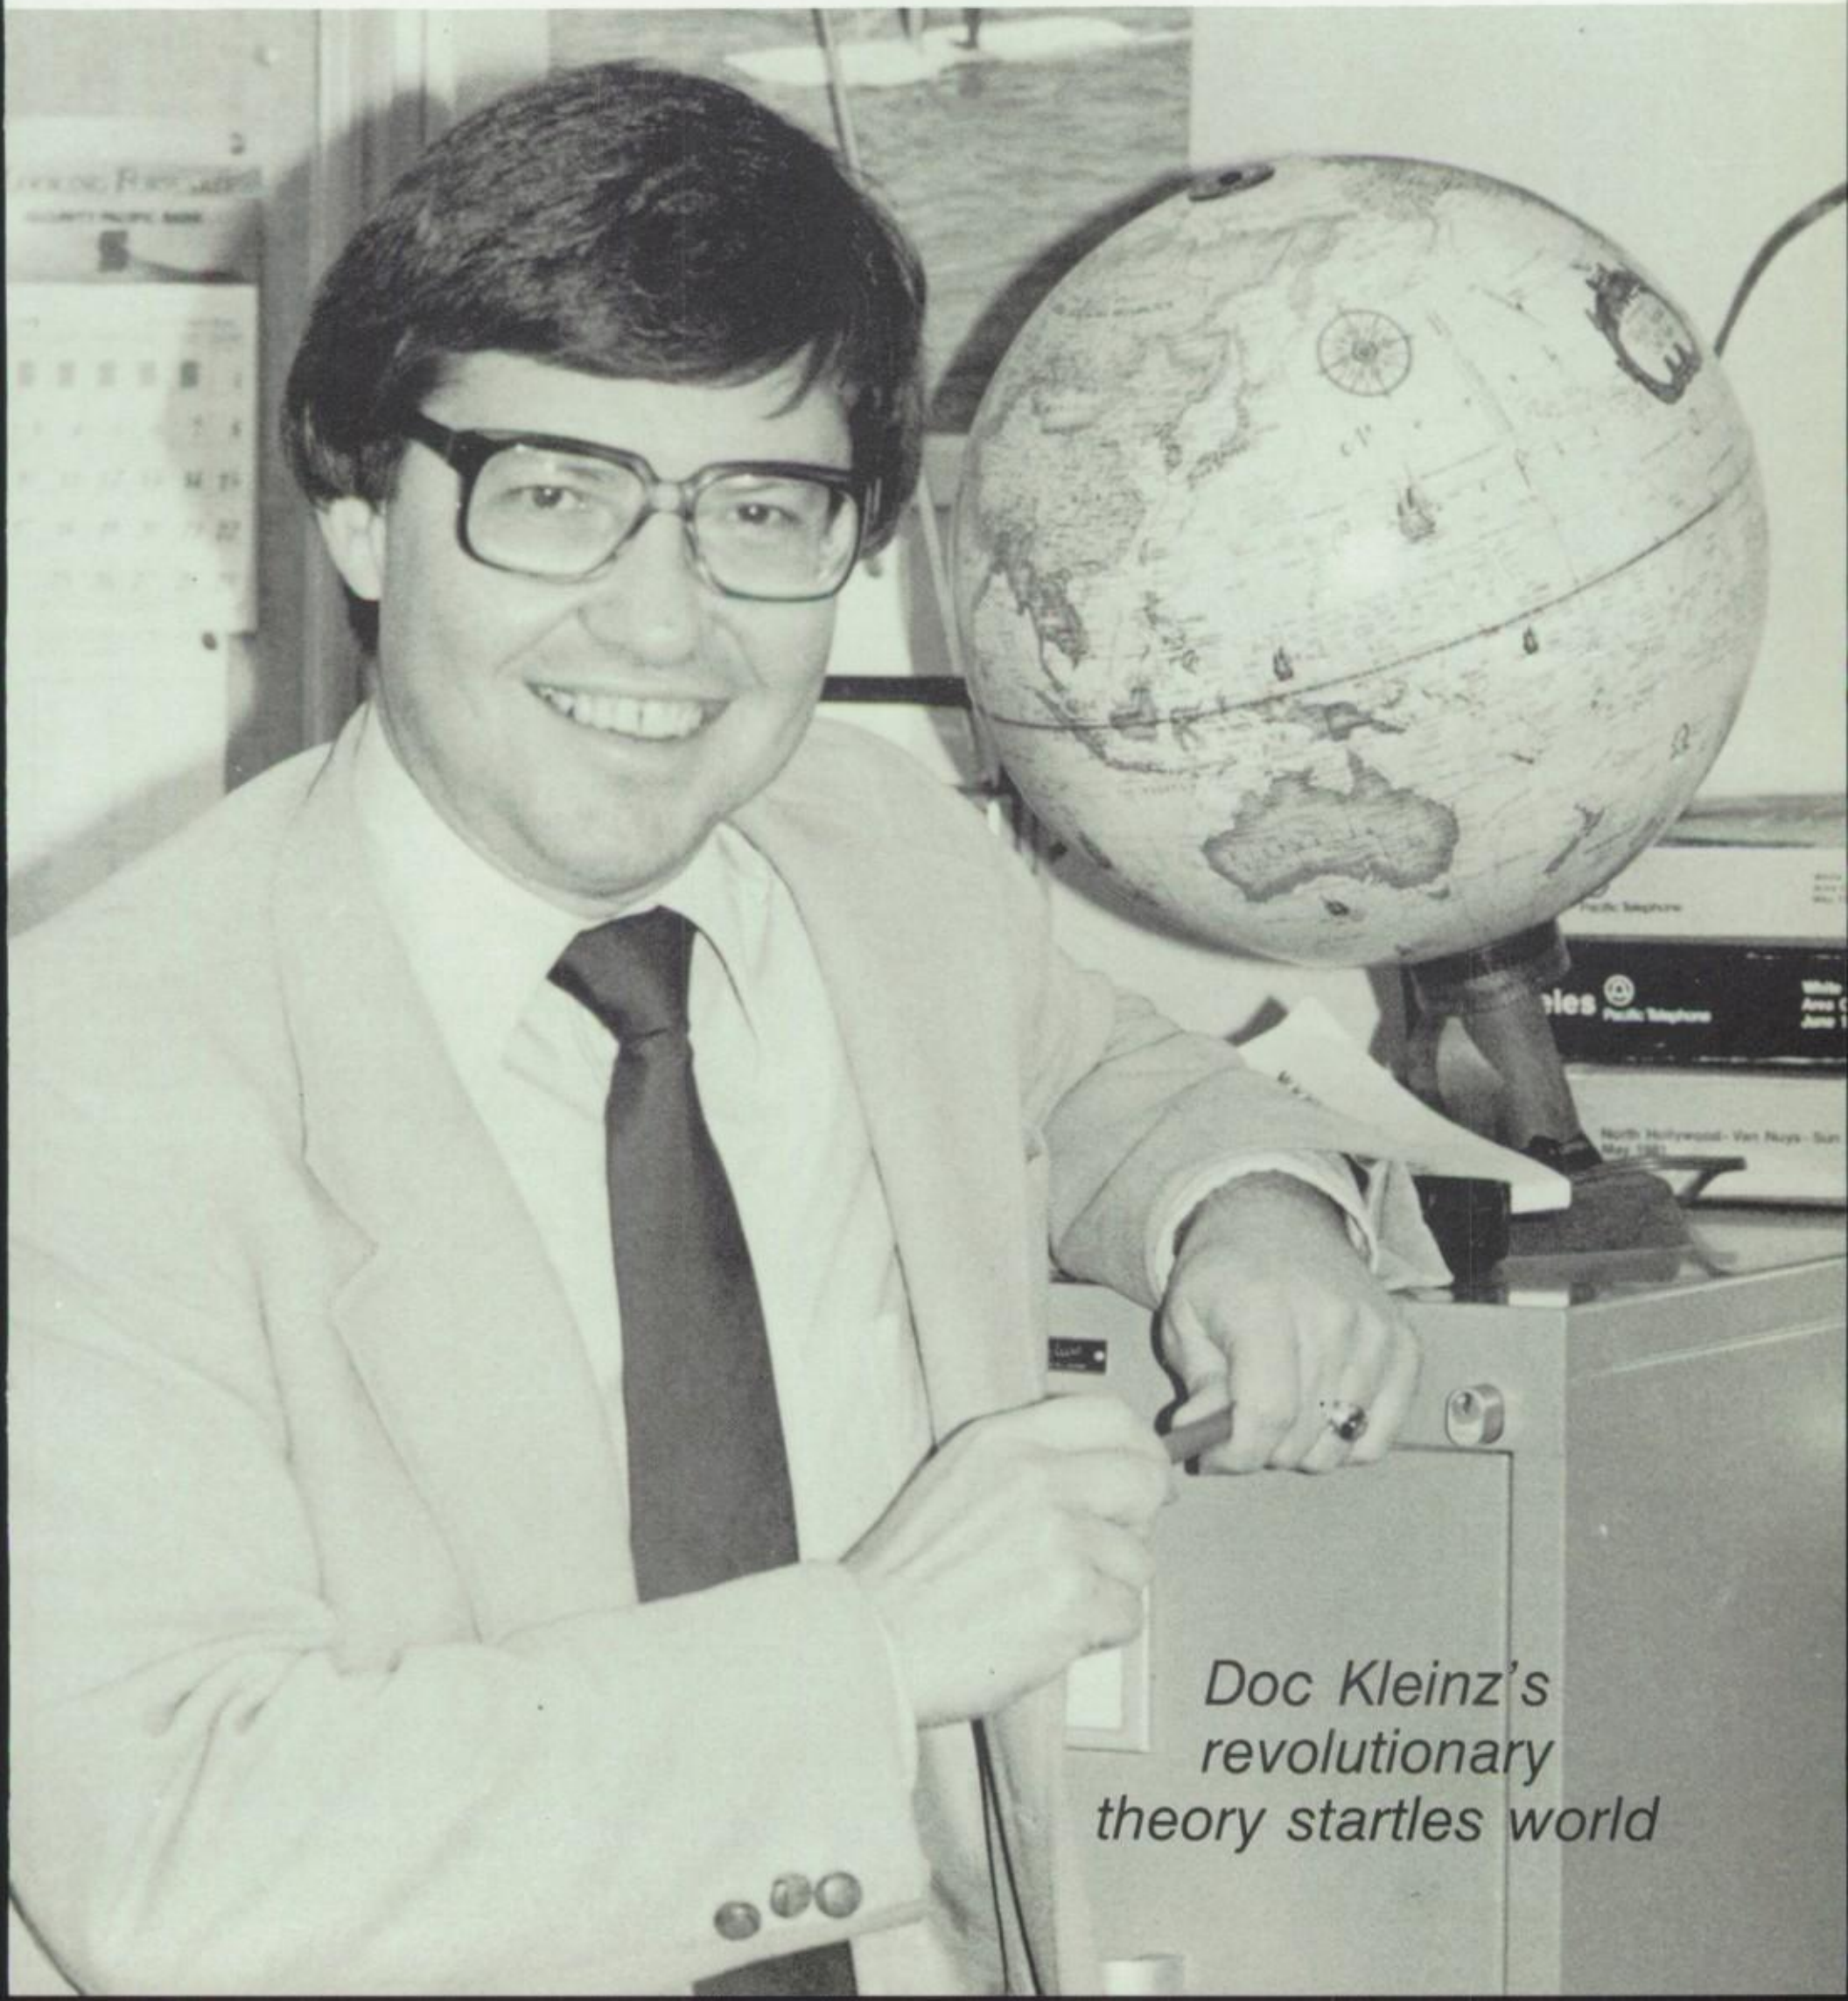

Jovial journalist Alexander deLarge broadcasting from among the Freshman Class to you kind folk out there. At the bottom of the heap once again, these kids had their first taste of real homework, of two hour final exams, and of Upper Seaver. Athletically they were treated with a bit more respect as they first had the chance to compete with the big guys. They learned to "pause and smile" in the Speech Room, and learned a few new names, like "Dworkoski" and "Flood." But, you made it didn't you, guys? Starting now the backpacks get a little heavier, and you've got a lot of steps to climb with that pack on your back. Three years of steps, as a matter of fact. And then there is learning to drive, and taking all those tests, and college applications, and, well, you get the picture. Senioritis is a long way off, so have a good time getting there. And try not to forget about your community service requirement. Big Alex over and out.

## SENTINEL PROFILES: Robert J. Dworkoski

**OCCUPATION:** Head of Upper School, Studies in International Affairs, Coach of Cross Country; Five Years

**ACHIEVEMENTS:** B.A. George Washington University, M.A. New York University, M.A. Columbia University, Ph.D. Columbia University.

**QUOTE:** "If I could appear on the cover of any magazine it would be *Runner's World*, because I would love to break the four minute mile."

**PROFILE:** Dr. Dworkoski has the unenviable job of the Head of Upper School at Harvard because he often has to take disciplinary action against infractions of the dress code and senioritis, a disease that strikes Harvard seniors and leaves them unable to attend class. Yet Dr. Dworkoski always approaches his tasks with optimism and a sense of humor; he is always willing to impart a witticism to lighten the atmosphere. Dr. D. has found time in his busy schedule to participate in a large number of activities at school. In 1979, Dr. D. founded the popular model U.N. which annually journeys to Berkeley and Georgetown. He also teaches Studies in International Affairs, a provocative quarter class that discusses Nuclear War, Nicaragua and other pressing current events. A runner himself, Dr. D. finds the time to come down and help out the Cross Country and Track teams during meets and when Coach Sweeney is busy elsewhere. He is well known for bringing bottles of prune juice and boxes of donuts to Invitational meets for the hungry runners.

If I could appear on the cover of any magazine it would have to possess the sophistication of **The New Yorker**, the flair of **Esquire**, the savior-faire of "GQ," and the raw animalistic appeal of ... uh ... **Field and Stream**.

To call Brian Wright a faculty member does not do him justice, for to the students he knew he was more than just a teacher, he was a friend. He had a lot of official sounding titles which he had accumulated during his two years at Harvard — Assistant College Placement Advisor, sponsor of New Harvard, sponsor of the Cum Laude Society, but this is the same guy who played street hockey in blue dress socks, came to school dressed in jeans and a baseball cap before he changed into his blue blazer and tie, and greeted students he knew with a casual "Hey, dude." As a former student here, it was impossible for him to isolate himself in the ranks of the faculty, and the kids who knew him knew him as a friend, not as a teacher. Mr. Wright is leaving this year, and Harvard will miss his humor, his friendliness, and his casual "Hey, dude." •

## SENTINEL PROFILES: Robert Archer

OCCUPATION: English Department Chairman

ACHIEVEMENTS: B.A. U.C.L.A., Ph. D. U.S.C.

PROFILE: Dr. Archer's insight and warmth have graced Harvard School for seventeen years. Dr. Archer is a man of many accomplishments. He holds a Ph.D. and a Bachelor of Arts degree, has played basketball under John Wooden for U.C.L.A., and has served as Department Chairman of English at Harvard. His students respect him for his ability to uncover connotative meanings and they eagerly listen to his daily lectures. Dr. Archer, who is well over six feet in height, slowly opens his tattered book and preaches to his class ... He explains the justice of Dante's Hell to his seniors and reflects upon the use of symbolism in the Great Gatsby to his junior class ... Never does Dr. Archer lose the attention of his students for his words are always crisp and they always manage to touch the individual. "Doc," as some students affectionately call him is quiet and peaceful but loves to chat with students about classics, new movies, and sports. He is both a fine teacher and a unique personality. Dr. Archer has a wealth of knowledge to share with students who approach him, and we all look up to him ... literally.

Quote: If I could appear on the cover of any magazine it would be Frequent Flyer because I love to travel and I am a walking/talking airline schedule.

Profile: While many schools have given up Latin, as a "dead language," at Harvard Latin is alive and well, all thanks to Mr. John Corsello. Perhaps this year's Senior Class has the most to thank Mr. Corsello for. A few of the Class of 1985 have enjoyed his teaching for six years and the fifteen or so veterans of last year's Latin IV Class have Mr. Corsello to thank for their incredible scores on the Advanced Placement test. Mr. Corsello's instruction in Latin is not only effective but enjoyable. Nicknames such as Grimas, Baa, and Sam seem to breed in early morning Latin Classes, as do inside jokes about the subjunctive case, Etruscan Pottery, Dido in the Aenid, Steve Kohler, and Rommel's mid-quarter grade. Though Mr. Corsello's tests leave students gasping and out of breath, his fairness and willingness to reward hard work are undisputed. Mr. Corsello gives his students a superb knowledge of not only the Latin Language, but of Roman Civilization and Literature. This year's graduating Latin scholars have received an understanding of Latin which goes beyond the mere reading of the language. As long as we have Mr. Corsello, Latin can never be a dead language at Harvard School.

**PROFILE:** Almost every student who has enjoyed Mrs. Cocker as a teacher will agree that she is one of this school's truly outstanding educators. Mrs. Cocker came to Harvard after receiving her Bachelor's and Master's degrees at Cal-State University Northridge, and teaching several courses there. It has been eight years since then, and in that time she has established an outstanding reputation among her students and peers, not only for her knowledge and teaching abilities, but also for her caring and easy going attitude. In class Mrs. Cocker is business-like, energetic, and easy to communicate with, always willing to take the extra step by stopping to clarify a confusing concept or write out a lengthy problem for the benefit of a student. In addition Mrs. Cocker shows real concern and interest for her students' accomplishments in and out of the classroom; she can most often be found after hours either helping a student understand a difficult problem or watching students compete in the gym or on the field. Not one to fall behind the times, Mrs. Cocker also is the resident authority on math-related computer software for the math lab's Apple computers, including programs which range from simple addition practice to more complicated trigonometric and geometric problem solving. Mrs. Cocker should be highly commended for her extraordinary involvement as a mother, teacher, and Harvard community member.

## SENTINEL PROFILES: R. David Bowlus

**OCCUPATION:** Science Teacher; Six Years

**ACHIEVEMENTS:** B.A. UC Berkeley, M.S. & Ph.D. Scripps Institution of Oceanography.

**PROFILE:** Dr. David Bowlus, member of the Harvard Science faculty for six years, is a mainstay of the Science Department. He teaches numerous courses including Modern Topics in Biology and the always popular A.P. Biology. He is a specialist in the field of Marine Biology, and is able to use his knowledge to help the school in his classes in Marine Biology and Oceanography. But, there is much more to David Bowlus than the man who teaches these classes; he sponsors club sports and genuinely cares about the students he teaches as well.

It is not uncommon to see Harvard's Dr. Bowlus riding up Coldwater on his bicycle, and he carries his love of cycling to the students of Harvard as well by sponsoring the cycling club for rides every Tuesday and Thursday. While riding up torturous hills, one really begins to understand who Dr. Bowlus really is. As one sees him ride back down a hill he has fought to ascend just to check on the progress of one of the slower riders, one can see his true character. This sort of compassion is carried into his classes as well, where he combines a phenomenal knowledge of his field with the ability and willingness to cater to the specific needs of each student.

During the dissection of fetal pigs, which has gained school-wide fame because of the smell, students are expected to follow the prepared diagrams and locate all the important areas of the pig. If a student makes a wrong cut or seems to be entirely clueless as to the goal he is trying to attain, Dr. Bowlus is always willing to break his own rules a little bit and help a student through a difficult problem.

Dr. Bowlus combines a calm demeanor, which always sees him with a smile on his face, with compassion and immense knowledge, which makes him one of Harvard's most special teachers.

## SENTINEL PROFILES: Dr. James Lander

**OCCUPATION:** Social Studies teacher, Sponsor of the Harvard News, Sponsor of the Chess Club; Five Years

**Achievements:** B.A. Loyola University, M.A. University of Durham, Ph.D. U.C.L.A.

**QUOTE:** If I could appear on the cover of any magazine it would be **Penthouse** because I would like Dean Graves to see it.

**PROFILE:** It has been forty minutes since Dr. Lander entered the room, and luckily he has yet to call on you. Suddenly, he strikes with a deep, piercing question. Panic wrenches your heart as you try desperately to recall the myriads of pages, or notes that were quickly scribbled in your over-flowing notebook. Once again, the skills of reasoning that you have been taught up to now pays off, as you are saved from certain doom, if not embarrassment, in front of the class. With a pleased look in his face, Dr. Lander continues on.

Since 1980, Dr. Lander has been impressing his knowledge and filtered English style on students of Western Civilization I, A.P. European History, and United States History. Dr. Lander received his primary education at Loyola University as well as at the University of Durham, compiling a Bachelor of Arts and a Master's degree. He seems to have enjoyed his college education, for he often refers to the satisfaction he received in writing a 600 page dissertation on Fortifications in the frontiers of the Roman Empire.

Dr. Lander's talents extend beyond Roman fortifications. Dr. Lander leads the ever powerful chess team into battle, as well as keeping the **Harvard News** out of trouble. Besides participating in these activities, Lander throws himself wholeheartedly into the education of young minds. He provides a student with not only the basic facts, but allows the student to understand the general concepts in history, as well as their importance to us. Dr. Lander pays special attention to providing necessary research skills and development of writing styles which are essential for a student's education.

Dr. Lander's ability is proved by the respect he receives from all who know him. His students' records in A.P. tests are unmatched, mainly due to his thorough preparation, DBQ's, and essays, that he provides. Most certainly, his thick beard in combination with his piercing eyes demand respect from all of his students. Harsh methods of individual punishment drives his students to their top performance, but Dr. Lander's good humor and insightful stories manage to keep the class light throughout.

Last January, Dr. Lander and his wife Susan gave birth (in an historical moment) to son George. Meanwhile, then Mr. Lander received a Ph.D. from U.C.L.A., which accounts for his departure after this year. All of Harvard, especially those who have yet to experience his class will miss him, but we wish him good luck in his experiences in England.

PROFILE: The generic term for Mr. Jerome Margolis is "music teacher." However, this unassuming title does not convey the enormous amount of work which Mr. Margolis must be responsible for. He runs the Orchestra, the Jazz Band, and the Pep band, as well as teaching a number of music courses including the popular Synthesizer class. Occupation: Physical Education teacher and coach of assorted teams.

ACHIEVEMENTS: B.S. Montana State University

QUOTE: If I could appear on the cover of any magazine it would be **Business World**, because if I'm on the cover odds are I'm rich.

PROFILE: Since joining the Harvard coaching staff five years ago in 1981, coach Lew Roberts has become a familiar figure to many. Presently he is the head wrestling coach, the Freshman football coach, and a Physical Education coach at Harvard. Before coming to Harvard, Coach Roberts taught mathematics and coached wrestling at Alemany High School, where he began a winning tradition. When he joined the Harvard coaching staff, he successfully brought the winning tradition with him.

Coach Roberts had had many successes as a football coach. For his first three years he was assistant Frosh-Soph coach, during which time he enjoyed many winning seasons, and even coached the 1981 team which went undefeated, and later became Harvard's legendary "Greatness" team of the 1983-1984 season. In 1983, Coach Roberts became head coach for the freshman football team, a position he still holds. In this role he has proven quite capable at preparing players for the Frosh-Soph and Varsity teams.

Perhaps his greatest achievement, however, has been coaching the Harvard wrestling team. He turned the wrestling program around by increasing interest in the sport around Harvard, and the team has actually increased in size each year since Roberts took the reins. He believed in success through hard work, but manages to keep morale up with his billion and one bad jokes. This philosophy obviously works, for his teams have always done very well. In his four years at Harvard, his wrestling teams have won league three times, and have placed as high as ninth in C.I.F. Coach Roberts has also coached many individual league champions, and several C.I.F. placers.

HIS YEARBOOK: HARVARD SENTINEL

Most students at Harvard do not know the man with the salt-and-pepper beard, usually seen in or near the computer center. He is Mr. Humphrey, who deserves more recognition by students than is generally given to him.

Those students who do know him are usually members of his classes. He teaches Advanced Placement Chemistry and Electronics. Others know him as Harvard's resident computer genius. Because most students do not take his classes as part of the minimum curriculum, they dismiss him as just another teacher.

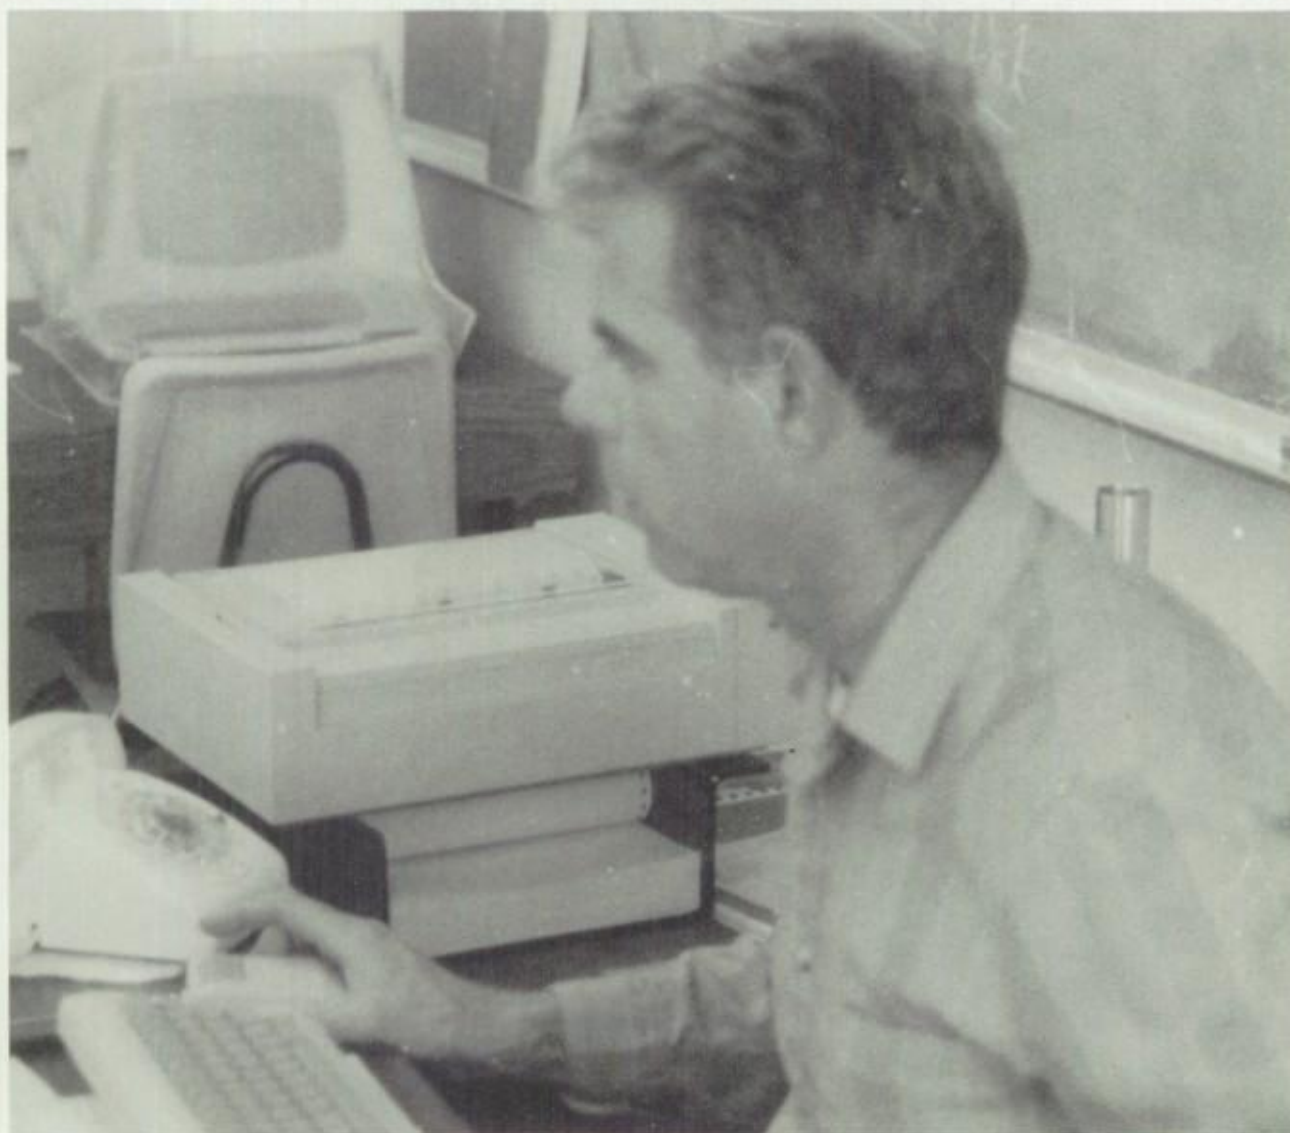

Mr. Humphrey is quiet-spoken, yet he is a dynamic teacher, who enthusiastically clarifies the wonders of science. As a sincere teacher, he learns about each of his students in order to create a better teacher-student relationship as well as being available out of the classroom as a friend. Because he recognizes each student as an individual, he can sympathize with a student's problem and try to help in any way he can. Making a special effort with each student, he teaches his courses not as something for the student to get out of his way and forget, but rather as something to be remembered.

Although he does not get the recognition that other teachers at Harvard receive, he is not just another teacher. He is familiar with the subjects that he teaches and he shares the discovery of each aspect of science with his students. Respected by the science department as a professional and well-liked by his students, Mr. Humphrey is an integral link at Harvard.

## SENTINEL PROFILES: Naomi Javitz

OCCUPATION: Librarian, Five Years

ACHIEVEMENTS: B.A., U.C., Los Angeles

PROFILE: In her five years working at Harvard, Mrs. Javitz has demonstrated her capability as one of the school's librarians. A librarian must develop a wide range of skills — from the finer points of helping a nervous ninth grader to complete his research paper to the more advanced level of surveillance, crowd control, and counterinsurgency tactics. A librarian must either master these vital skills, or become a Valium addict. Having searched her handbag, this reporter is happy to report that she is indeed a master librarian.

She monitors the senior sign-in sheet, and tells delinquent students about Dr. Dworkowski's little "See Me To-day" notes for them on the bulletin board, not to mention making sure seniors check their college mailboxes daily. ## Development and Alumni Office

Do you know where the Development and Alumni office is? Do you know who Mrs. Carpenter is and what she does at Harvard? Where is Mr. Michael Segal when he is not around the pool deck? Which of Harvard's secretaries is Natalie Breau?

The Development of Alumni office is located in Gooden Hall, where you will find Mrs. Janice Carpenter busily trying to enlist financial support to aid in Harvard's growth. For the past six years, Mrs. Carpenter has been Director of Development and Community Relations, supervising all fundraising for the school. Her office is responsible for cultivating and gaining the support of the school's main external constituencies — alumni, current and past parents, grandparents, trustees, and others. It also handles press releases and organizes various public relations events, such as Grandparents Day.

Mr. Michael Segal, '75, is an invaluable part of this organization. He directs the affairs of the Alumni office and the Alumni Association, organizes all alumni activities, and solicits contributions from that group.

Natalie Breau, for the past two years, has served as secretary to both Mr. Segal and Mrs. Carpenter, aiding them in their important efforts.

Another Trivia question — what has been accomplished? The answer again is not trivial. The funds raised among alumni and friends have renovated Rugby auditorium, helped the expansion of computer services and classes, renovated the Science and Foreign Language Departments, completed the construction of Taper Athletic Pavilion, air-conditioned Seaver, Chalmers, and Rugby, as well as much more.

She has also enthusiastically joined the Harvard community. Even though Ms. Bloksberg does not teach Harvard students, she has managed to familiarize herself with many students. Refusing to be isolated in the Business office, she has made a point to keep abreast of all events by working with some of the Prefects on the Student Council Ms. Bloksberg's determination and cheerful attitude make her a valuable member of the school.

# “They really were young?”

This year the editors of the *Sentinel* asked themselves the question which has kept Harvard students awake at night since time immemorial: “Did their teachers exist before they came to Harvard?” Then an even more vexing question rised its shining pate: “Did their teachers have hair before they came to Harvard?” Hours of wheedling by Miss Tsuda, days of delving through family albums by faculty spouses, and weeks of airbrushing on wigs produced these photographic treasures from the prehistoric past. ## Eighth Grade Officers

Community correspondent Ryan Llesew on my faithful typewriter here with the Eighth Grade in Rugby Hall. Talk about King of the Mountain — these kids knew it. The Lords of the Lower School swaggered down the long carpeted hall, persecuting helpless little scrubs and playing Foyer Football. They had a gleam in their eyes and a spring in their step, as they were free of the high school work load and long, painful exams. What a life, eh? Well, it's all over now. Have a good summer, because you're coming back to the Upper School and the base of the ladder again. So, get a nice tan, bleach your hair out, relax and enjoy yourself, because next year you'll have no one to dominate except yourself. And in four years, when you're finally seniors, you'll look back at the Eighth Grade and laugh at what your definition of studliness was then in comparison with what it will be when you all really are the King of the Mountain. Ryan Llesew, out of the scene and in control, signing off.

# Eighth Grade Retreat

The eighth grade retreat this year was marked by the determination of the record 118 participants — a determination to have a good time, a “quest for fun.” On the first day, we enthusiastically walked to the Orange County Marine Institute for an interesting and informative day. Now, if, challenged, any eighth grader can collect plankton, measure water clarity, identify fish, and tell you how *not* to pick up an angry crab. Another unique experience was the dissection of a squid. Almost as enjoyable was the guide’s impassioned speech on the differences between raw fish and raw squid. What an orator! Whale-watching was especially fun. Few people were sea-sick, and all the groups saw at least a few dolphins and sea lions. Everyone felt exhilaration at the end and eagerly looked forward to the next day. We were not disappointed. During a long hike our eighth grade energy paid off as we left our chaperones panting and gasping. But after a few words of encouragement from us, even Mr. Liston began to chatter enthusiastically about our next activity, rappelling. This was the favorite activity! It took some time to learn to trust the rope, but once we did, it was great. The eighth grade retreat. An unqualified success.

## Seventh Grade Officers

Newspaper Hack Jimmy Cooper writing from within the blissfully unaware and more than slightly nervous world of the Seventh Grade, or scrubs, here at Harvard School. I don't know whether to envy these kids or feel sorry for them. Okay, maybe the homework was a little more extensive than back in Miss Feldman's sixth grade Reading class, but these kids were blessed with an almost total ignorance of what the work in high school is going to be like, and they're still a year away from that experience. Getting scrubbed by the Eighth Grade was bad at first, but the pain gradually wore off as the scrubbees realized that it was their turn in only one year. So, my little friends, have a great year next year — it's the only truly carefree year at Harvard School, if you play your cards right. You've got a long trek ahead of you (this yearbook should show you that, if nothing else) but if nothing else you have the distinction of being the first Harvard class to graduate in the 1990's. Jimmy Cooper at Harvard School. Good day, and have a pleasant tomorrow.

## Yosemite

From October 28th to November 2nd, the seventh grade was up north in Yosemite National Park. We were split into two groups — one group went to the Crane Flats Yosemite Institute facilities, the other, to Yosemite Valley. My group went to Crane Flats first.

**The Food.** After two days of sweet-and-sour pork without the pork, we were very glad to go down to the valley where there was cafeteria food. Only on the way down from the Flats did we learn that the fodder at the Flats was all-natural (all-natural what, I wonder?).

**The Hikes.** The 4 to 6 mile hikes were interesting because each hike had a different theme, which we discussed while we headed to our destination. Some of the themes were trees (when we hiked to a Sequoia grove), survival (when we hiked to the fire lookout), and Indian cultures (when we hiked to Mirror Lake).

**The Scenery.** It was spectacular — really inspirational. Many seventh graders are trying to persuade their parents to take them back.

**The Chaperones.** The chaperones seemed to lose 10 years in age during those six days. The strange thing about it was that they immediately gained them back once they got back to Harvard. One nice thing about having our teachers with us was that we got to know a little bit about them.

All in all, I think that Yosemite was both an educational experience and an entertaining one. Ask any seventh grader about his experience, and he'll be proud to tell you about how he braved the Indian Caves, or how he climbed a mountain to get to Columbia Point.

### Initialize This

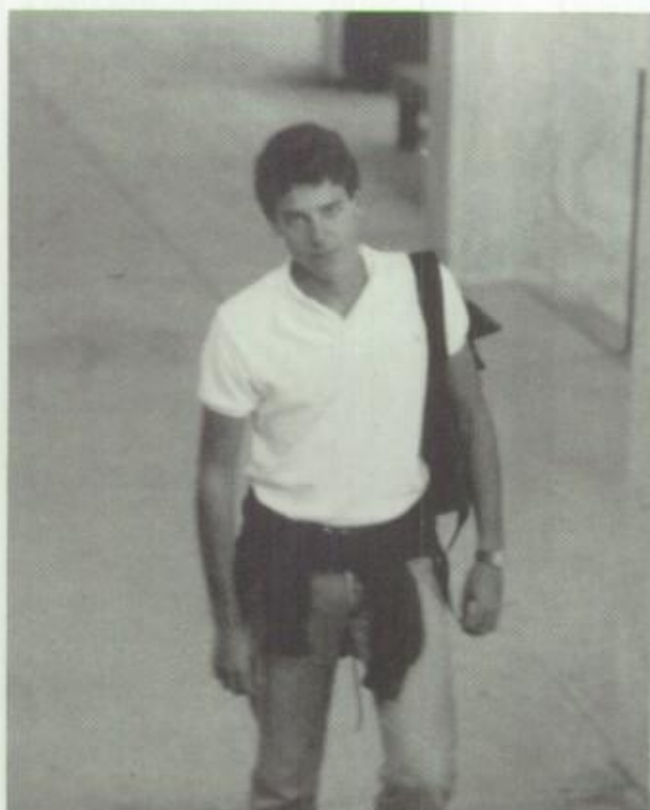

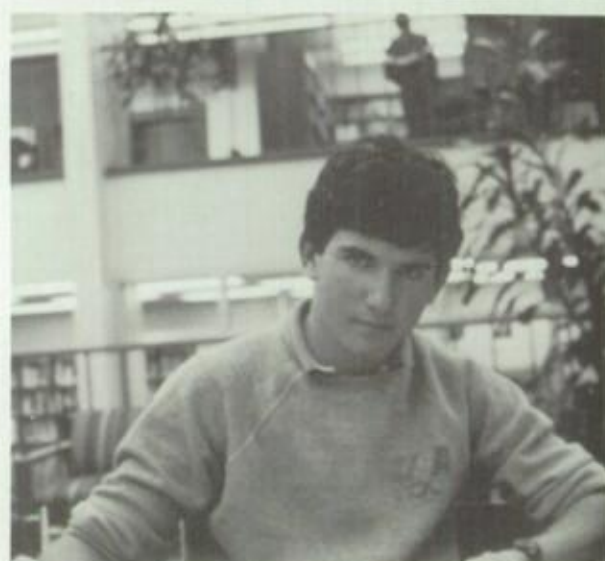

Beginning in the high school years students are deluged with a flood of nonsense letters, of esoteric, ambiguous initials, which represent different shades of a vaguely defined concept, known as "APTITUDE." This word, though little used in conversation, carries a great deal of significance for the success-oriented student who strives to advance upwards and onwards higher and higher in the various misty levels of Education and Learning, thereby increasing the student's, um, well, ah ... aptitude, I guess.

It begins with the SSAT, and continues with the PSAT and SAT, all conceived in NJ. ACH and AP tests follow. For those whose aptitude is big enough? high enough? the SSS and NMSQT sit up and keep a watchful eye on those individuals, subjecting them to an endless stream of letters from every college within a 3000 mile radius.

It doesn't stop in high school, either, for aptitude is a greedy thing, and once it has tasted the first few tests it hungers for more. It sinks its teeth into the LSAT, MCAT, GMAT, NTE, GRE, and even the MAT. For those so inclined, there is the MMPT.

And then, I believe, it finally ceases. So, I'll turn off my IBM and go home and watch some MTV. Maybe even use my VCR.

### TO OUR READERS

Everyone's folded but our pal Lucky and a mean drifter named Killer. We felt so sorry for Lucky (after the bowling accident) that we hid clues to Killer's hand all over the room. Using those clues, can you help Lucky decide whether to bet his life savings on his two pair? --The Editors  
Answer, page 66

From Ted and Davidson: We are extremely pleased with the book this year. The pictures and essays all turned out better than we thought they would at first, and the help we were given when deadline time came around showed that this years' staff was one of the most committed ever.

To Jameson: The best newspaper editor the yearbook ever had.

Scott: Here once a month like clockwork.

Ben: To you we bequeath one copy of *Mein Kampf* to base your Socialist takeover on.

Brett: Sniff. Sniff. What's burning? Did you leave the heater on?

Kevin: The first editor to get his section done, and the only person to do all his own work and never complain. Kevin, you were almost perfect. We needed more editors like you.

Chris: You were great for two reasons. One, your pictures were good, but even better because after you brought the pictures in we could do the layouts on the top of your hair!

Jason: The albino Rhino. You were the Champion.

Rommel: D&T: "Rommel, what's wrong with these pictures?" Rommel: "I don't know, it must be the chemicals."

Kurt: Fix the Vertical hold!

Steve W.: Better North Berkeley than Yearbook on a Saturday night.

Adam: Slave.

Michael Amster: See you on Saturday Mike. Don't bring your brother.

Steve H.: No ninth grader ever worked so hard on the yearbook. Thanks.

Jeff: How was your Prom date?

Brian: If anyone could win a pulitzer prize for yearbook writing you would have it in the bag.

Josh: Stick to Basketball.

Neil: What do you mean these are all the ads you got.

Ryan: Too bad you didn't show up earlier in the year. We couldn't have finished the book without you.

Miss Tsuda: Without your help and endless hours of work we could never have gotten the book in, but we really would have loved to put you in as L.N.S. just one more time.

Duke, Donal, Randy, Peter, Paul: Remember Harvard at 2:30 in the morning? You guys were terrific, without you it would have taken forever to do the book.

Outside, the darkness slips in and out of the trees, gliding across the damp field, sliding underneath the few cars in front of looming Taper Pavilion. The cars have been there long since the last red rays of the daying sun had fallen upon the near-deserted parking lot. The engines are cold, the headlights blink.

There is an island in the dark sea of night, an oasis of light and motion tucked away in the darkest corner of the campus. Electric light squeezes through the slats in the drawn shades, casting bars of soft yellow across the cold ground outside. These bars flicker as figures behind the shades move across the windows. The faint murmur of a stereo drifts in the breeze, its volume stripped away by the closed doors and thick walls.

Inside, the final night slips away, like sand through cupped fingers, as the frenzied yearbook staff wades through an ocean of crumpled copy sheets and wrinkled photos, typing, pasting, formatting, swearing, yelling, liquid-papering, and listening to Billy Joel, followed by David Bowie, followed by ... Tapes litter the desk next to the ghetto-blaster.

Randy Banchik slumps over a stack of blue layout sheets. A just-audible groan slips from his lips, and he lifts his arm again and again, penciling in lines and boxes, which, to the uninitiated observer, seem random and mysterious. To him, however, they carry a horrible significance. He will dream about them tonight, on the couch in the Emery Room, many hours from now.

Miss Tsuda hovers at Randy's elbow; a huge stack of pages to be proofed lean ominously over her head. Her eyes slowly dilate, and a mirthless grin appears on her face. "I'm going crazy." She speaks truth. The grin dissolves like Alka-Seltzer in water.

Ben Hensler suddenly stands, and announces, "I'm going for an invigorating run in the brisk night air." He jogs to the door, and disappears. Moments later a curious baying is heard by the startled staff.

On one side of the room a group of younger workers cluster around a typewriter, like bums around a trashfire. Duke Shih and Adam Gilbert furiously shuffle and reshuffle copy sheets, ordering, straightening, ordering, straightening. They look up and say in unison, "We're ordering and straightening." Little Halpape shifts morosely through a box of final layout sheets, checking and rechecking. His eyes are bloodshot and watering, and he hums softly to himself. Donal MacCoon controls the typewriter. He justifies his existence — "I'm typing ads." The rest bow to him in respect.

Davidson Pattiz, leader among men, senior among non-seniors, editor in chief among editors, stands over them with a whisper on his lips. "Halpape, type the faculty. Donal, please go get the Prefect essay, Adam order the editors' Senior Pages." His faint commands are lost in the swirl of noise around him. Still whispering, he steps back and sits down heavily on the couch. He opens an Economics textbook and begins to read, still muttering. He is a broken man.

Stan Yen stands off in a corner, tapping his foot. He says shortly, "I'm waiting for Hight." He keeps on waiting. Kevin is absent from the room, on a mission from God.

Peter Cramer is typing layout. He is whistling, and looks like he is enjoying himself. The rest of the staff avoids him.

Big Halpape contemplates a particularly disturbing key on his typewriter, trying to unravel the mystery of the rebellious Margin Release. His little brother walks by and reminds him to type the kicker. Jeff is lost. "What is a 'kicker'?" he asks his Liquid Paper.

Paul Kim chortles over a few choice Curtis Shih drawings. "Is this really supposed to be Miss Tsuda?" he asks.

Ted Weitzman, the other editor in chief, wanders up and down the room, looking for work. It looks back at him, but he pays no attention.

Chris Hayms and Kurt Woelfl confer clandestinely in one barren corner, comparing Senior Pages. Kurt is at a loss. "What do I say to R.C.?" he asks hopelessly. For these two, it has all come down to the last night. Chris is more confident than Kurt. "This is the best and the raddest Senior Page ever, in Harvard history. People will write to me at college, congratulating me, asking for my autograph, my advice, my wisdom. Maybe I should put my address at the bottom of the page ..."

Steve West's only comment is "I'm catching up on my sleep."

Ryan Donohew is unavailable for comment. He is out celebrating his birthday, big number 16, and is not at the meeting.

Mike Amster does what he does best, darting about the room, peering over everyone's shoulder, offering advice and assistance. Occasionally he alights at a typewriter for a sporadic burst of action.

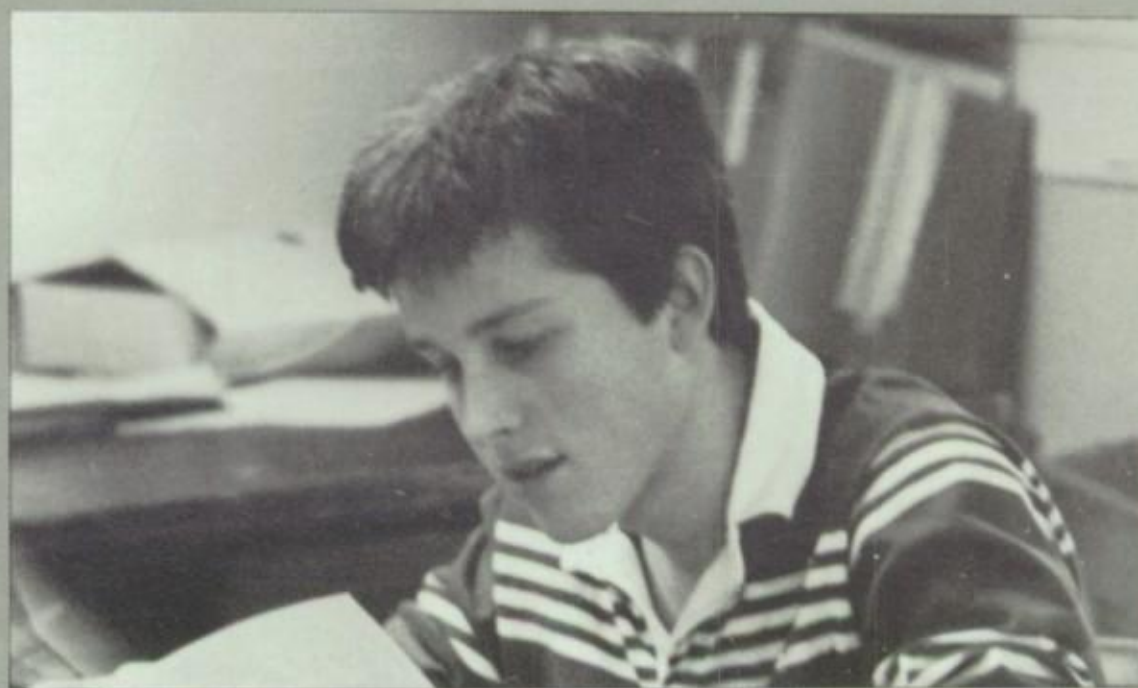

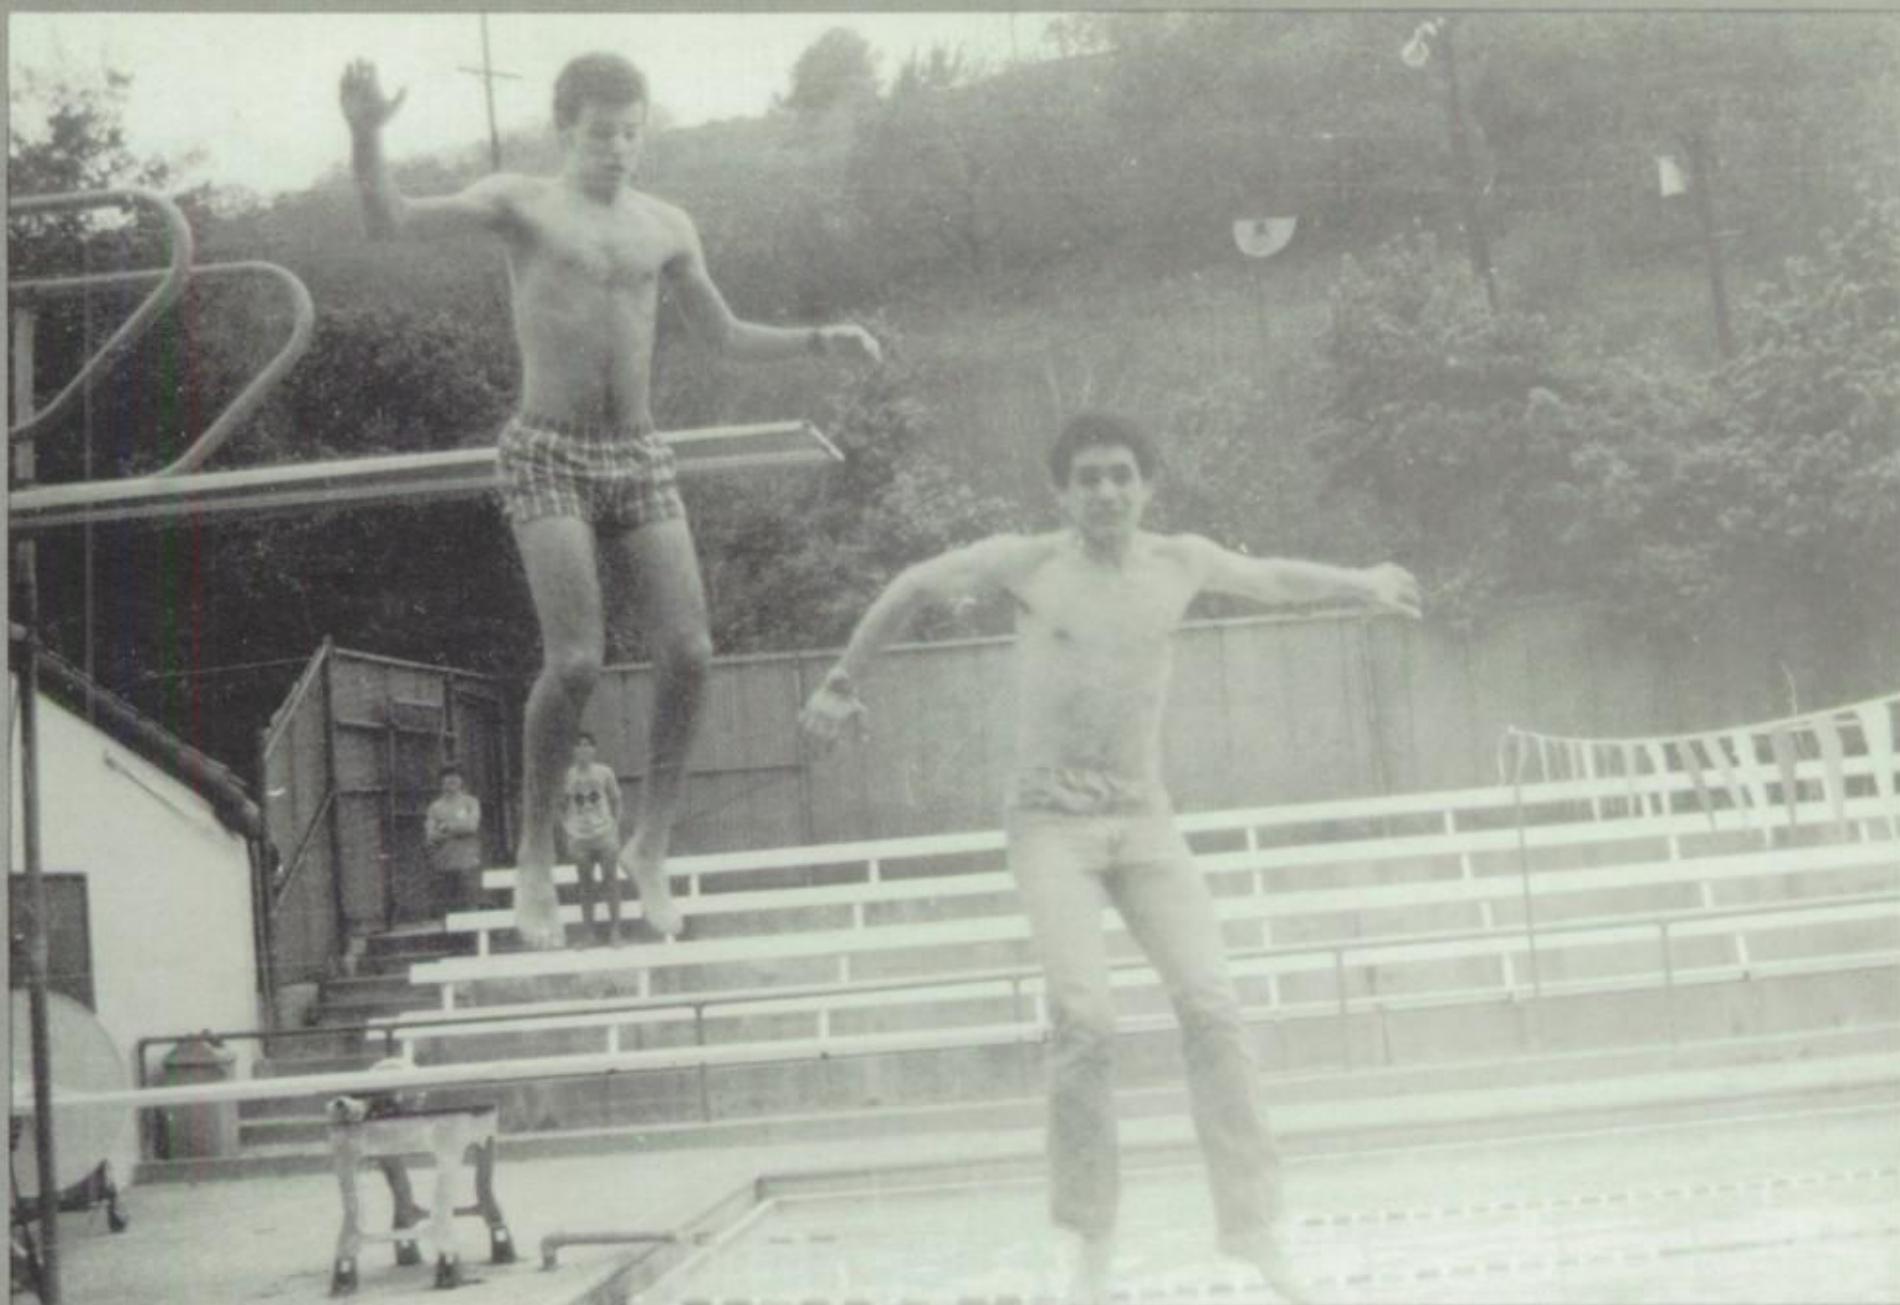

Down the hall in the darkroom, Jason Francisco works diligently on the final few photos. His skin is pale from lack of exposure to the sun in the secluded room, and as he walks about he kicks bits of fungus into dark, unexplored corners. His eyes are dilated almost completely, and he gazes at any intruders with a blank, empty, hollow stare.

Brian McCuskey is perched on a high stool, his fingers flying over an ancient typewriter. The copy sheet falls out of the typewriter, and he puts another in without really thinking. Pages and pages of type surround him. His eyes are glazed, and the mere mention of the word "essay" starts him giggling and rocking back and forth.

These are the troopers, the movers, the shakers. As the night begins to retreat and a soft glow creeps bit by bit over the horizon, they are still in that tiny room, typing, proofing, writing, groaning, giggling, and ripping pieces of paper into little tiny bits. The glow on the horizon grows brighter and redder, but not as red as the eyes of the yearbook staff as they churn out, page by painful page, the 1985 Sentinel Yearbook.

## Former Fauna

One of the joys of living on campus is being awakened every morning by a coyote chorus under my window singing their final coda of the night while the alpha male flaunts his defiance of Benson by marking a boundry on my doormat. My day thus begins with my peeling a thoroughly (by that time) schizoid great dane off the ceiling.

It is said that the coyote is the only wild animal whose numbers increase rather than decrease as man encroaches on his habitat. This seems to be born out by my experiences at Harvard, for forty years ago the local fauna that visited the campus were deer, squirrels, rabbits, skunks, and rattlesnakes, with not a coyote in sight, or sound. A quiet walk around the grounds after boarder's lights out would find several deer enjoying the gastronomic delights of the gardens (they were particularly fond of the roses). A family of rabbits, equipped with the most accurate metabolic clocks, would appear on the lawn outside the dining room doors just after dinner ended winking their noses in return for bits of bread and illegally smuggled out broccoli. A patriarchal and particularly anti-social squirrel terrorized those approaching the old Rugby by dropping monkey dates on their heads from the top of a giant fan palm. The day that he got the Sergeant is a day that that generation of students will never forget.

About a dozen rattlesnakes have in my time not been forgiven their trespasses, and the migratory bats that used the chapel as a way-station for a few weeks twice each year were an added attraction at evening service. They also reduced a bride to jibbering fury by coming to her wedding (the groom only adding fuel to the fire by pointing out that bats were as appropriate as doves at nuptials). But it was the skunks who provided the real color and life to Harvard School. One skunk epic involved Father Chalmers, his bulldog, and I. Jiggs (the bulldog) had foolishly attacked one of those little black and whites and had paid the full penalty for his sin. Fortunately no one ever saw the sequel — two reverend fathers, stripped to the buff, trying to deoderize Jiggs in the shower of Hamilton Gym. (Neither of us had heard of the tomato juice cure).

Then there was the skunk who adopted the night watchman. Every night when he came on duty Skipper would be met by his little friend who would sit on the bench beside him at 2 A.M. the skunk would sit on the bench beside him whose behavior was always well-mannered. But the

would then follow him on watch rounds all the night long, in and out of buildings and around the grounds. When Skipper had his lunch at 2 A.M. the skunk would sit on the bench beside him and share the meal. He was particularly fond of peanut butter sandwiches — Skipper always brought an extra one for his deputy, whose behavior was always well-mannered. But the never-to-be-forgotten moment is the Day the Skunk Came to Study Hall.

The study hall, to which all students on their free periods had to come for supervised study, occupied the site of the present Rugby Theater. It had been the nineteenth hole coffee shop in country club days and was really a rather beautiful room with an open trussed ceiling and french doors giving on to a green lawn. A platform from which the study hall master could invigilate (we really used that word then) the room had been placed at one end. One day, no one could ever make out how he did it, a skunk got under the platform.

He was well behaved for the first three periods but by the beginning of the fourth he was becoming a little restless and made it quite clear, by auditory rather than olfactory signals, that he wanted to get out. The sergeant, always the man to take charge, took charge. Ordering two boys to lever up one side of the platform the Sergeant kicked the opposite end with sufficient violence to frighten out the skunk. The skunk emerged, rapidly. The Sergeant, however, had forgotten one vital thing. He had forgotten to have someone open the french doors so that the skunk could escape to the outside.

Finding himself trapped, the skunk, misinterpreting the Sergeant's motives, panicked, and turning back into the study hall did what skunks are notorious for doing. It is doubtful that he missed one square inch of the room before he finally exited through a hastily opened door. The two boys who had levered up the platform were rewarded for their Good Samaritan efforts by a full blast frontal attack, and for a while we seriously considered either boiling or bury them to render them socially acceptable again.

The Sergeant, with amazing good fortune, escaped the attack entirely and emerged from the whole affair smelling, not like a rose exactly, but of Old Spice after shave lotion as he always did. The study hall itself was not quite so fortunate. It was three months before it could be used again and even then the memory lingered on.

Of course, the real Harvard animal epic is the Story of the Horse in the Classroom, but since the horse was a domesticated horse and not fauna his saga doesn't belong here.

## 1984-1985 Admissions Committee

One very important aspect of Harvard School which both students and faculty can participate in is the Admissions Committee. Split into a Lower School Committee and an Upper School Committee, the student/faculty admissions staff works together on everything from the initial application and interview process to the closed-room-with-one-small-lamp final decision meetings. Teams of one faculty member and one student tour and interview prospective candidates from October to nearly the end of the school year, and beginning in mid-February the committees begin to read and grade the files which have been completed. After that, it's only a short step to the committee meetings in which an initial judgement is made on the candidates. This list is then reviewed, and submitted to the Headmaster. Beginning in the middle of March, the letters are sent out — accept, reject, or wait-list. The Admissions Committee is one of the most rewarding activities at Harvard, both because of its importance to the functioning of the school, and because of the close student/faculty teamwork.

## The Canvas Albatross

7th grade — He scuttled down the narrow Rugby hallway, eyes fixed on a mysterious piece of the carpet which moved ahead of him, always keeping a distance of three to four feet. An unruly shock of unkept hair dangled in front of his pale face, and a trickle of sweat traced a snail's path down one chubby cheek. But it wasn't his full class schedule or his thick glasses which put an ache in his back and a bend in his posture, causing him to walk along like an arthritic old man searching for a contact lens. It was his backpack. The folds of blue canvas and chattering zippers clung to his back, wrapping nylon straps around his waists and over his shoulders, hanging from his body like the dead body of an huge albatross. The boy's burden forced him down towards the ground, bending him double, driving his face into the dusty carpet below. But he walks on, carrying the backpack, five more years of carpets unrolling ahead of him.

12th grade — He strode down the cool hallway in Seaver, his sneakers padding noiselessly on the linoleum tile. He nodded to passing friends, a bemused half-smile rising on his lips. The hair was parted now, resting smoothly across the top of his tanned forehead, and the thick glasses have vanished from the bridge of his nose. The albatross was gone, too. A faded piece of limp blue cloth dangled off a frayed strap on one shoulder. Only the weight of one spiral-bound notebook and a couple of smaller textbooks kept the rugged backpack from floating away in the air-conditioner's artificial draft. The boy walks straight and true, his pack an extraneous piece of apparel, no longer the monstrous parasite it had been. On his way to the Emery Room, the tall boy bumps into a smaller one who carries a large pack on his back and flashing lenses on his face. The tall boy stops, for an affront has been made, but finally he just laughs and walks on, five years of carpets behind him.

## Food Drive

Harvard School continued its tradition of the Food Drive this year, the ninth year of the program's existence. During the week before Thanksgiving, Harvard students bring in canned and non-perishable food goods to school and load up Richie Rothenberg's van, the Magic Bus, with shopping bags full of the food. All the goods then go to St. John's Parish, near the Coliseum, usually on several van loads. Once at the Parish, the people there distribute the food to the needy and the poor in the area. Father Adams once again coordinated the effort, with the help of the tenth grade class officers, and made the tradition a success.

As members of the largest Forensic squad in the United States, Harvard Speakers have always strived to uphold and further the squad's standard of excellence. Harvard's successes have never diminished as the completion of every tournament nearly always adds points, degrees, trophies and prestige to the forensic squad.

The action began at the 1984 National Championship Tournament in San Antonio, Texas with Harvard sending a record five representatives. They were: Bart Aronson ('84), extemporaneous speaking; Richard Cloobek ('84), dramatic interpretation; Brian Lee ('84), student congress; Jeff Rake ('86), extemporaneous and impromptu speaking; and Randy Schoenberg ('84), student congress. Each speaker advanced several rounds and Sophomore Jeff Rake placed a remarkable third in impromptu speaking. Notably, Bart Aronson's third year of national competition placed him fifth in total points in the nation.

The beginning of the 1983 and 1984 school years have yielded a novice squad with an incredible depth of talent. Summer institute tournaments were a portent of things to come as Bret Weinstein and Larry Saul both advanced to the final rounds of debate.

At the UCLA Forensics tournament Harvard turned a few heads by winning both Novice and Junior debate with the teams of Scott Saul and Travis Pierson and Larry Saul and Philip Munger given for superiorspeaking. Winners included Michael Brenner, Aden Fine, Paul Asimow and Andrew Gettelmen. Harvard's victors at UCLA debate also placed at the Tustin Invitational Debate Tournament the following week.

Harvard's Novice team continued to dominate their league as a staggering seven teams went undefeated at the Fall League Tournament. Undefeated debaters included David Smooke, Brandon Savage, Marco Black, Robert Karron, Henry Moon, Ben Choi, Miel Brenner, Rutland Baker, Jovan Marin, and Glen Summers.

Over Winter vacation, the team of Werbach and Weinstein took first place in the Junior Division of the Loyola Tournament. At the rigorous USC Invitational Tournament Freshmen Paul Asimow and Eric Kezirian earned third place trophies. Harvard Debaters should do well at District and State Tournaments this year and have a shot at sending a team to Nationals. Some speakers may also travel to the Harvard College Tournament.

Harvard's performance in Individual Events rivaled its Debate achievements. Andrew Gettelmen, Darren Codd, Anthony Kling and Michael Wigneswaran all won first place trophies at the Fall League Individual Events. At the Varsity Tournament Bret Shefter, Chris Reilly and Clifford Lo garnered trophies. Clifford Lo also advanced with his Oratory at the USC Individual Events Tournament.

Junior Michael Reisz had a banner year in Forensics. After advancing several rounds, Reisz won the county Bill of Rights contest and \$750. In addition Michael's Oratory won first place at Loyola and at USC for the second year in a row.

With the Varsity Squad's strong backbone of participants Jeff Rake, Ben Karney, Matt Henerson, Michael Reisz, Clifford Lo, and Craig Fox in addition to this years new superstars, Michael Brenner, Aden Fine, Travis Pierson, Scott Saul, Eric Kezirian, Anthony Kling, and Michael Stern, Harvard's 1984-1985 Forensics year was stellar.

With the devotion of Mr. Tedd Woods and Mr. Keith Fink the Harvard Squad has surpassed its expectations and, with their help will extend its honor and excellence into the future.

# Harvard-Tamagawa Gakuen Student Exchange

Japan is a land of magic, a land of emperors and thousand-year old castles, a land which many dream of visiting, but few ever do. For the past sixteen years, though, the dream of going to Japan has become a reality for the 10-15 Harvard, Westlake, and Marlborough students who participate in the Harvard/Tamagawa-Gakuen student exchange every summer.

The trip itself lasts what seems to be a mere four weeks, and the first part of it is spent with a host brother or sister exploring the ancient Japanese arts while attending the Tamagawa school. Each morning people ride in on the trains from the outlying districts, and meet at the school for the daily lessons which might include, learning how to be thrown by a Judo master, practicing the Japanese combat art of Kendo, or the pursuit of a more serene art such as Origami (paper folding). But, this is only part of the school experience, for one of the things the Harvard students do better than the Japanese is speak English, and much of their time is spent in English classes getting to know the Japanese students better, and helping them with their English.

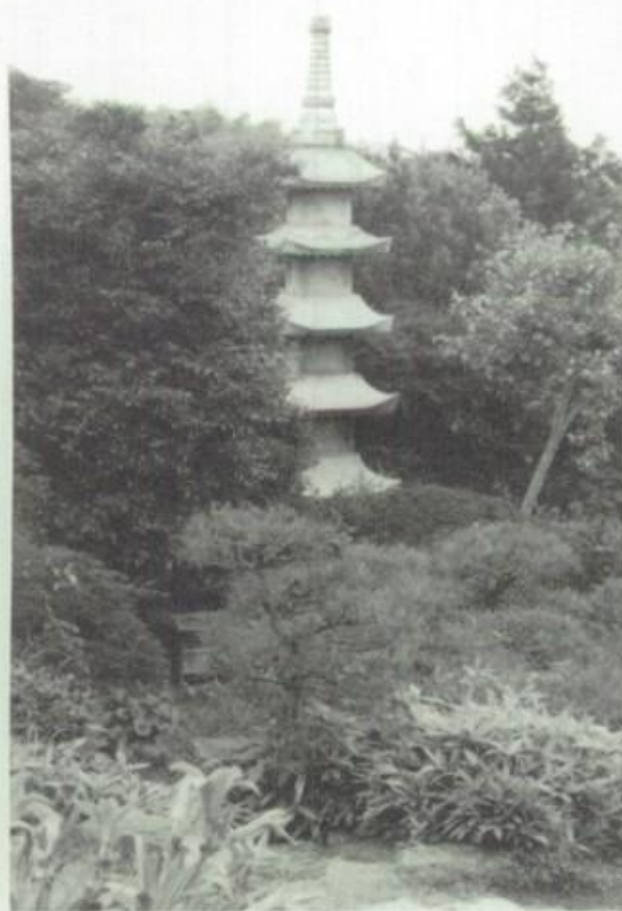

In the afternoon though, school is out and the night life of Tokyo begins. American students then get to sample Japanese foods and explore parts of the city such as the electronics centers of Shinjuku.

The second and more fantastic part of the trip involves trips out of Tokyo and to the other cities of Japan where students can see ancient temples and palaces that are the treasures of Japan. Some students have families who are able to take them to the temple city of Kamakura, where they see the 700 year old, 70 foot high, bronze Buddah as well as the ancient houses of the Buddhist priests. The entire group then spends about a week in Kyoto, Japan's first capital city, which is nearly a thousand years old, and is still preserved in all of its original beauty.

After their month-long trip, Harvard students return to Los Angeles, but contact between the two schools is not broken. In the spring the Japanese students complete the exchange program as they come to the United States and stay with their Harvard host families. Here, they visit Harvard classes specially designed for them where they will learn English, math and singing, all under the instruction of Harvard's best teachers. After several weeks spent at Harvard, they will tour the rest of the country, and the glories that America has to show them.

The trip organized by Mr. Sasaki and Mrs. Amato through CIEE is always a success as both groups have a great time and the goal of the program to promote friendship and learning for both groups and between students of both nations is always achieved in a fun and memorable way.

It is my duty to attempt to expose students to various types of drama. An original play is always exciting because we are working on a fresh canvas. Mr. Margolis has been the perfect playwright cutting and adding, as we require, in production. I am deeply indebted to his musical drama. It is with the utmost respect we dedicate our efforts to his creative gift, "Jekyll & Hyde" (the musical). It is to you the audience I mention our approach to this classic, as one of experimentation. By using two actors as Jekyll and Hyde we hope to separate the good from evil, while asking you to accept them as one. It is by separating the "evil" within us that Dr. Henry Jekyll hoped to eliminate the evil and "secrete the good" in all men.

As Director I found Sophie Orleans an equally tragic figure; loving the goodness and kindness in Henry, yet forced by convention and Victorian ethics to remain helpless and separated from the man she loves, and knowingly she must act half as smart and base her life around a man with whom she can't reveal her true self. Their love being the "good" and their society the "evil".

The greater challenge has been coordinating orchestra, technical aspects, and artistic elements with many novice members, who have given us headaches, heartaches, and enjoyment for they will inherit the productions of the future; and how we train them is vital to our program. I applaud all who have assisted. — Thank you.

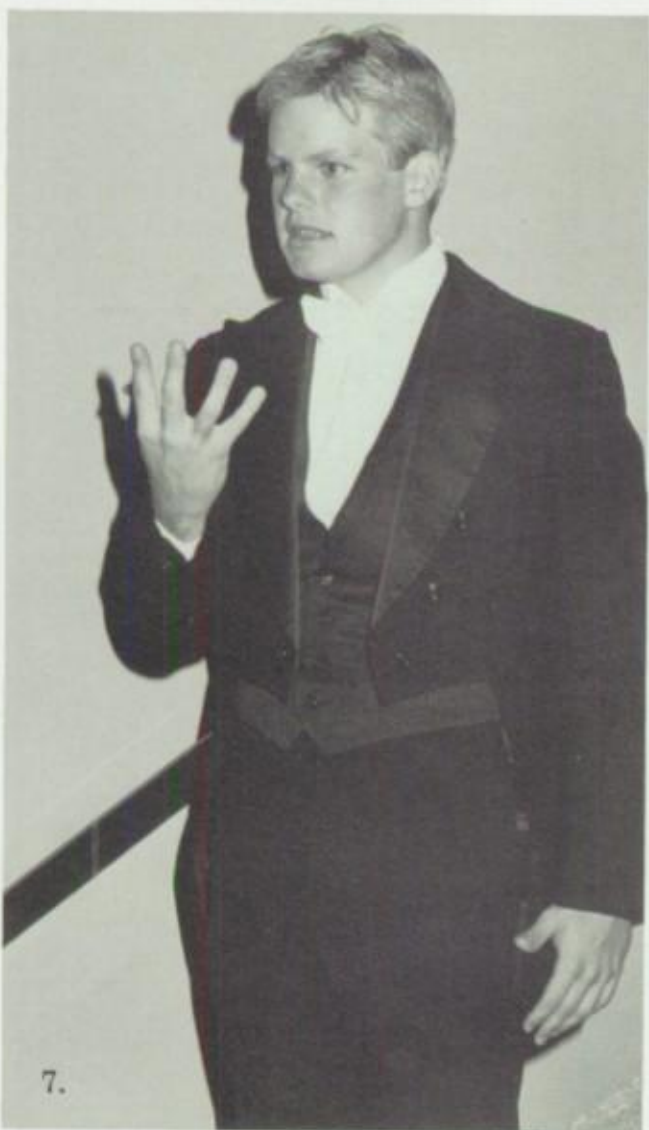

— Mr. B. Lee Drew

Robert Louis Stevenson's classic, like all great works of fiction, opens up infinite possibilities for interpretation and inspiration. I wanted to deal with the qualities of anguish, human frailty and scientific research... Jekyll's consuming passions and his loss of control. Stevenson, here, is not merely a narrator but an artist who sees his carefully measured work transformed and manipulated by others. In this way he speaks, perhaps, for all artists. The endless allegories, the opposite sides of objects and characters, the endless analyses drawn by teachers and critics may, however, be part of the gift that each great work offers us. As Stevenson, himself, says: "And in this way my little story lives on and continues beyond my grave."

This, my third original musical for Harvard ("The Play of Moses", 1977, "Hostages", 1980) reaffirms my conviction that our students work best when challenged the most. The entire company (cast, orchestra, and technical crew) have impressed us all with their dedication, discipline, talent and inventiveness. Without recordings, video or other models to rely upon they have approached "Jekyll and Hyde" with the same enthusiasm and zeal that they have brought to the music theatre, classics like "South Pacific", "Stop the World", "Man of La Mancha" and "Fiorello". I am not only proud of their achievements but honored to have a work of mine realized in their most capable hands. To all involved I offer the sincere thanks and congratulations.

To Lee Drew, our esteemed director, many thanks for being wonderful at your craft and for your friendship. To Liz Freston, our resident impresario, thanks for the endless energy and organization. To Ken Mellman, our assistant music director, bravo for the hundreds of hours and promising future. And to my adorable Ann... thanks for being Sophie when I was Jekyll.

In its first year; Chamber Music Workshop is designed for those musicians who wish to play music in a small ensemble and learn chamber music repertoire. There are seven groups who meet once during the week in preparation for a concert on March 16. These groups perform the music of Haydn, Mozart, Telemann and Milhaud. Next year Chamber Music will be offered as part of the curriculum.

## Chamber Music Workshop

## Tower Building Contest

The Fourteenth Annual Tower Building contest was held this year. The event which drew twenty-five entries demanded that each person build the strongest possible tower for its weight out of the balsa wood and glue provided. Mr. Clark who created this contest as a project for his Engineering Principles class has created a strict list of constraints which the towers must meet before they are eligible to be mercilessly crushed by a drill press. The towers were judged for aesthetic design by the student body during a week-long display period in the library. Though the record of 7007 times the tower's weight was not beaten, this year marked the first entry by an alumnus. The winners were — Aesthetic Design: 1st place Chris Tregillis, Strength to weight ratio: 1st place Mike Amster, 2nd Jeremy Rosen, 3rd Dave Fisher with strength to weight ratios of 4303, 3783, and 2853 respectively.

## Long Live Rock

Among all the various activities which students participate in when not attending classes, there is one event which stands out as the pinnacle of any possible weekend experience. The rock concert. For three hours, the students shed all attachments to Harvard School and become one with a screaming, sweating, dancing, yelling, bobbing, singing mass of humanity. They assume their individuality halfway to the car in the parking lot outside, voices hoarse, legs sore, eyes bloodshot, hair mussed, and clothes damp. In the car, on the freeway ride home, the brain cells which had been dislodged by the deluge of sound begin to settle again. A thought is formed, gradually coalescing. The battered nervous system kicks into gear, sending signals to the vocal chords. A word is associated with the thought, and the mouth gives it life. "... awesome."

This school year included several major U.S. tours, and at every Los Angeles show Harvard students joined the multitude of screaming fans. The purple pageantry of Prince and his private players. Bruce "Boss" Springsteen stopped in L.A. on his way across the U.S.A. he was born to run in. General Public, known as English Beat II to the uninitiated, gained recognition on their first tour, which included a generous free concert on the steps of U.C.L.A. And of course, the acclaimed Jacksons tour and all the type that went with that, although no Harvard student admitted to attending that one ...

So, back at home, relaxing with a cool drink at one in the morning, the concert-goer rubs palms which ache from clapping hard all night, and taps his foot to a soundless beat, ignoring the persistent ringing in his ears. The ringing will be gone by Monday morning, but the beat goes on.

On Friday afternoons, when most Harvard students rush to the beach or to a party to begin their well deserved weekend, a few students rush to a slightly different place: the Chess Club in Chalmers 110. For those of us who find a relaxing break from the week's stress and mental exertion, the Chess Club offers a unique opportunity. Whether 5-minute "blitz" games or two-hour marathons suit one's fancy, the Chess Club can always provide a challenging, ruthless, and entertaining battle of mind against mind.

## Italian Studies Club

This club, sponsored by Dr. Kleinz, is composed of students who wish to enlarge and sharpen their knowledge of Italian Affairs. The members come in contact with Italian customs by learning the language (mostly slang), keeping well informed on Italian sports cars, and most of all, by frequenting restaurants specializing in Italian cuisine.

## New Harvard

New Harvard is the school's bi-annual, award-winning literary magazine. The magazine publishes contributions from both students and faculty — poems, short stories, essays, as well as photos and drawings. The occasional piece of music also shows up. This year, faculty sponsor Mr. Brian Wright was assisted by two editors-in-chief, seniors Brian McCuskey and Jason Wolff, as well as a small staff of assistant editors — seniors Michael Moore, David Forst, and Steve Patterson. This group chose the magazine's pieces and laid them out for the printer, and finally distributed the finished issue. The magazine published a wide variety of pieces; the only criteria being that they be intelligent, well-written, creative, and entertaining.

## Homecoming

Homecoming! ... A crisp November day ... friends mingling on the campus, enjoying the opportunity to talk outside the classroom ... a chance to meet your classmates' families (and often, beautiful sisters!) ... music from the Harvard band filling the air as the Saracens march and pass to victory on the football field (if I were on the team, that beautiful sister might notice me!) ... the traditional seventh grade Egg Drop accompanied by cheers and groans as the eggs, in their ingeniously devised cradles, are dropped from the top of Taper Pavilion ... colorful field booths stocked with refreshments served by parents and students (why did I spill mustard on myself in front of that beautiful sister?) ... the half-time appearance of the incomparable Harvard Kazoo Band ... the Mexican Fiesta and feast in the evening, complete with a strolling Mariachi band in authentic charro outfits (after all my studying, why can't I remember how to say "I love you" in Spanish to the beautiful sister?) ... a chance to try your luck at one of the tantalizing game booths ... an evening dance in Taper to the beat of Native Sun, and the renowned group from the movie "Animal House," Otis Day and the Knights (Hey! I think the beautiful sister wants to dance with me!) ... All these, and more, combined to make Harvard's 1984 Homecoming an unforgettable experience (I hope the beautiful sister found me unforgettable, too!).

## Egg Drop

The infamous Egg Drop is an old tradition among seventh graders at Harvard School. The objective is simple — drop an egg off the Chalmers stairs onto the cement below, a distance of about thirty feet, without breaking the egg.

When the tradition was just starting, the students were given a free hand in protecting their precious eggs. Eggs were encased in sleeping bags, or in Tupperware containers full of Jell-O. Since then, the rules have become somewhat more refined. Only organic materials can be used to protect the helpless egg. This rules out parachutes and suitcases stuffed with foam rubber; both of which were commonplace in the old days of Egg Dropping. However, the rules still leave the interesting territory of cottage cheese to be more thoroughly explored. Who knows what the future will hold?

The culmination of the Egg Drop competition takes place on the day of Homecoming, when the finest of the contraptions are dropped off the roof of Taper onto the track below. Obviously, Egg Dropping is a spectator sport, but uninitiated readers should be warned that these competitors, though small in size, are carefully trained and that such an event should not be attempted at home.

— Brian McCuskey

## Rugby

The only notable thing about the start of the Rugby Club's season was the near complete lack of experience of the players. Despite retaining only a few performers from last year's extremely successful team, Coach Lee Carlson was hoping for some kind of miracle from the new recruits. But, it took no miracle! His fine coaching created a precision team of near professional quality, which overwhelmed many of its weaker opponents. Onfield leadership was provided by seniors Mike Kananack and Erik Carlson.

Highlights from the season included several successful tournaments, and the bright, if brief, career of Eric Lipin.

## CPR Training

When picking up their pencils to begin an important exam, many ninth graders joke that they feel as if they need CPR! However, they take the vital skill of cardiopulmonary resuscitation seriously, realizing its value to the community. All ninth graders attend a session of intensive CPR training, which is administered by Healthwatch, arranged through the Physical Education Department. The ninth graders spent an entire school day in November training with mannequins, and learning the different methods of CPR. After the instruction, the students were given an exam. Those who passed the test became certified to administer CPR.

## E.S.U.

Harvard continued the long-standing English speaking Union program with two seniors this year — Giles Brown and Evan Harris. Giles Brown attended Harvard for the first semester and was actively involved in the music program as a talented saxophone player. Evan Harris attended from Christmas break on, and enjoyed the drama program here at Harvard, performing in "As You Like It?"

Dr. James Lander was once again the director of the E.S.U. program at Harvard, which coordinates travel and housing for British students to come to America, and visa versa. The students stay with the families of kids at the school, and this makes it very easy for them to get adjusted to the new school.

In the beginning, there were only the leaves.  
They hung from drooping branches, drifted in the canyon winds, and carpeted the steep hillside. They shifted and rustled on the dusty ground, always advancing into the quiet valley.  
Then, bricks were laid, foundations of concrete poured, walls erected, and driveways paved. The Harvard School came into being. Where the leaves had once disintegrated happily into the moist earth, they now died a brittle death on expanses of asphalt. Where they had roamed free across the ground, they now collected in stale piles, trapped by steel grates.  
But, the leaves vowed not to be beaten.  
And so, each day they lie, dead only to the human eye, slowly drifting across the parking lot, or falling harmlessly from an overhanging tree. But at night they slip from the protective bushes and trees to reconquer the campus, covering driveways, climbing stairways, and creeping along rows of lockers.  
And each morning, the humans blast the tide of leaves back with tremendous air guns, forcing the leaves back into the trees and bushes, away from the cement and asphalt. It's an endless task.  
The school won't always be there.  
But the leaves will.

## Club Dees

Fred Brende turned up casually dressed to receive the "Sparkling Conversationalist of the Year" award here on the campus of Harvard School. His fame results from his amazing, almost instinctive habit of taking any word spoken to him and hurling it back at the would-be partner in conversation with the suffix "Dees." The delivery is essential ONE EYEBROW SLIGHTLY RAISED, MOUTH TWISTED IN A MOCKING GRIN. When asked what name he would like for his club, he responded true to form — "Club Dees!" We complied.

Due to the dedication and commitment of this year's staff of over 150 students, the paper has greatly increased its respect in the student body. Students anticipate each issue and look forward to its content. Not only has the format of the paper changed physically, but the content of the paper has also expanded. This year the Student Government system at Harvard has been analyzed in a series of editorials, interviews, pools and surveys. The paper has also striven for timeliness, accuracy and consistency in its news and sports coverage while also bringing controversial issues into the open. The paper has also provided interesting features in its efforts to gain the interest and concern of the student body.

## Six Days of School

School is out on Friday at 1:10. Or is it? On Saturday at Harvard School the campus is hardly dead; at times it can almost be as busy as on a regular school day. Here is a sample . . .

In the lunch area a group of about ten students deftly construct a mountain of PBJ sandwiches in preparation for the Downtown Project of the day.

In front of Chalmers a large group of small kids mill about, clutching pointed pencils, all No. 2 Ticonderoga. Mr. McGrew and his admissions staff register the prospective candidates and send them into the dreaded SSAT. Some Saturdays the little kids are replaced by equally nervous juniors and seniors who arrive to take the SAT just one more time.

Up in the Admissions Office, a couple of diligent staff members continue to read the never ending flow of applications in preparation for the Monday night meeting.

There are many other things which go on on a Saturday at Harvard School. In fact, as this writer writes, a group of 800 AP teachers chatter and wander about the Chalmers lunch area, snacking on donuts and coffee and comparing notes. I hope they'll go inside soon. Then I can go steal a few donuts for the dedicated yearbook staff, who are here this Saturday morning.

## The Six-Year Club

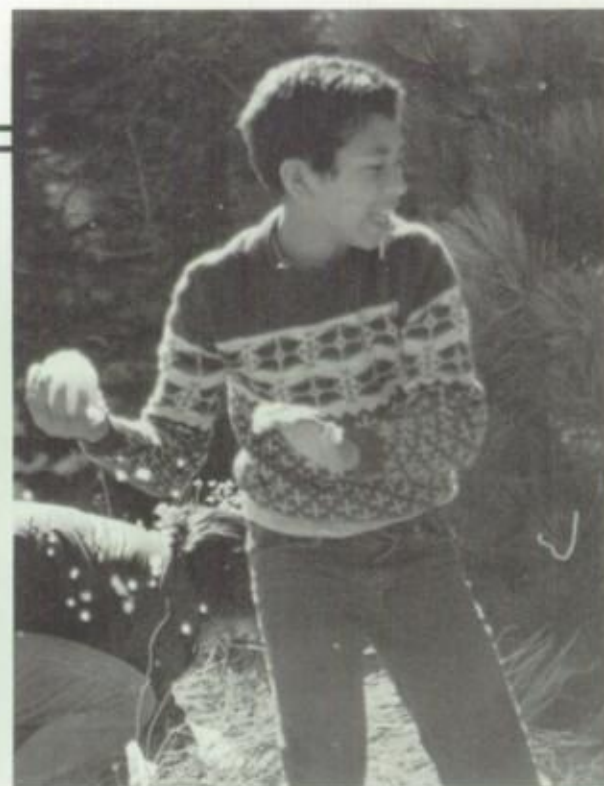

These are the die-hards, the hardcores. Six years have elapsed since they first walked down the long hall in Rugby, since they first found the elusive "C-LAB," since they first played Foyer Football. Five years from the first time they ever scrubbed anybody or tripped an unsuspecting seventh grader. Four years since they found out what real finals are and realized that they were at the bottom of the ladder again. Three years since Merv muttered, "Howz come" and everyone realized that going on retreats isn't "cool." Two years since the pressure really began to build, since the endless progression of "raw scores" and "composite SAT percentile rankings." And then there was this year — begun on a wave of college applications, last minute test-taking, and frantic attempts to salvage the old GPA. The wave subsided on the Magic Day of December 18th — when Rommel Nobay's magic number (Days Left Until the Senior Summer) ticked away to zero, and we surfed through the rest of the year. Six long years of hard work finally paid off in full. And next year, it all starts again ...

## Downtown Project

## The Spirit of Helping

Before a Harvard student graduates, he must devote at least thirty hours to helping others in his community. Although it is a required service, he enjoys the opportunity to make life a little better for the less fortunate.

Among the programs students can become involved in is assisting the elderly patients at Cedar Sinai Hospital. Another is the Downtown Project, under the direction of Mr. Repsher and Mr. George Roberts. Students from Harvard and Marymount join to take twenty-five underprivileged children from the downtown Los Angeles area on day trips to such places as the beach, the La Brea Tar Pits, and Disneyland. The youngsters are chosen by the Missionaries of Charity, a program started by Sister Teresa.

Another program is the Dixie Canyon Tutorial. Harvard students get a chance to assist kids from the Dixie Canyon Elementary School, helping them with their classwork.

Through these and other programs, Harvard students become involved in the larger community and realize that helping others is not only good citizenship, but also important in being a good human being.

## Death Valley

Every time Christmas vacation rolls around, Harvard School sponsors a small trip to Death Valley. About fifteen people go each year, and with the use of one of the school's small buses, they go to, travel around and come back from the valley.

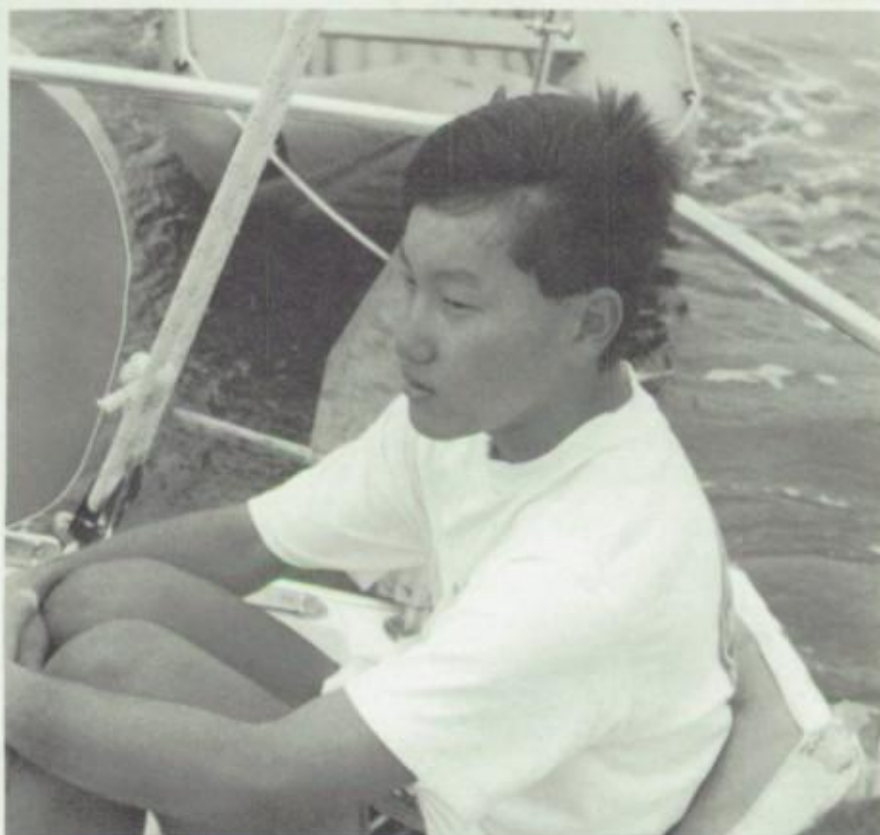

During the trip, the participants are given a chance to see some of the most interesting, unusual and beautiful scenery that Death Valley offers. The trip also offers relaxation. You camp in tents and cook your food, but only a few hundred yards away is a hotel, swimming pool, and civilization.

The Death Valley trip is relaxed, free and easy, but it also allows one to admire the rugged and preserved beauty of nature.

## Summer Sailing

Summer Sailing is a program designed to give a boy a vacation and time to relax and have a good time while learning the fundamentals of sailing. Activities are left up to the students' imagination and range anywhere from relaxing and reading a book to jumping off high cliffs into deep pools below. We visit many different areas from as far North as Santa Barbara, through the Channel Islands, all the way down to Ensenada. When sailing you might be at cities like San Diego or the ever popular Avalon one day and be at uninhabited islands such as Santa Cruz the following day. Overall, it's a hot trip with varied things to do, places to visit and people to meet.

## Tech-Man Society

Members: Steve "Moe" Grannick, Vance "Larry" Herron, Brian "Schemp" Codd, Chris "Curly" Hyams.

Tech-man, the unsung hero of the theater, uses his innate, brute strength to almost miraculously move sets from place to place, ensuring that the production runs smoothly. This elite, dedicated group of individuals gather together to pay tribute to this remarkable breed of man, and they often sing:

"I am tech-man,  
He is tech-man,  
I am tech-man,  
He'll put you in his own band,  
I am tech-man,  
He is tech-man,  
I am tech-man,  
And all the brothers slap his hand."

## Foreign Outlook

This year's Foreign Outlook magazine was composed of various poems, essays and editorials written in several languages: Spanish, French, Latin, Russian, Hebrew, Japanese as well as some articles in English. Jonathan Loeb, this year's Editor-in-Chief, and his staff devoted much time in producing the two issues over the course of the year. The articles and artwork were reviewed, edited, and submitted to the printer for final production.

Dad,

I really appreciate all the things you've done for me. If you weren't here, I would be resting on my dirty bed in my messy room. I would be looking at many piles of leaves on the patio and three bags worth of fallen fruit in the wayback. The plants would be dead too.

Thank you for being here and helping me grow up to be a responsible person.

Reach out and grab the future—  
You young ~ to whom it still is unknown  
    MAKE THE PERILOUS MOVE!  
Climb up beyond the limits of the sky  
You young ~ to whom it is still a mystery  
    TAKE THE PERILOUS STEP!  
We have reached out and we have climbed,  
And when we did we relied on those who  
    stepped before us . . .  
    We support you now  
    We shall not let you fall  
    Go ahead !

It seems to me I am trying to tell you a dream — making a vain attempt, because no relation of a dream can convey the dream-sensation, that commingling of absurdity, surprise, and bewilderment in a tremor of struggling revolt, that notion of being captured by the incredible which is of the very essence of dreams . . . No, it is impossible; it is impossible to convey the life essence of any given epoch of one's existence — that which makes its truth, its meaning — its subtle and penetrating essence. It is impossible. We live, as we dream — alone . . .

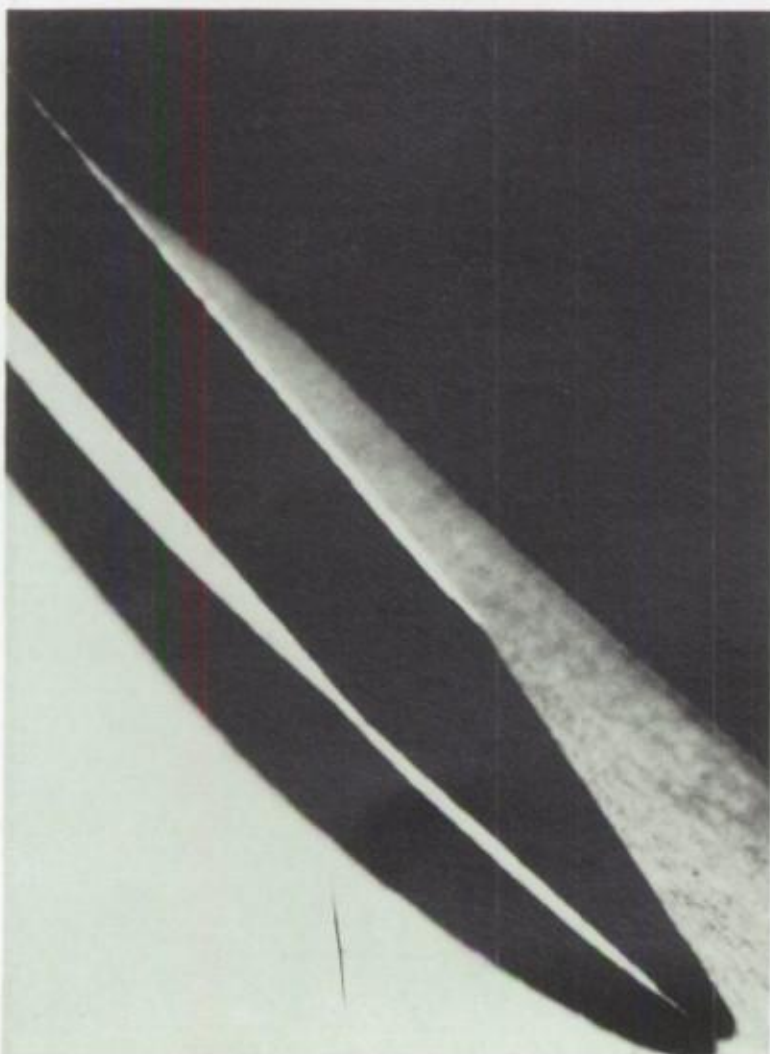

— Joseph Conrad

#### Answer

That you are here — that life exists and identity, That the powerful play goes on, and you may contribute a verse.

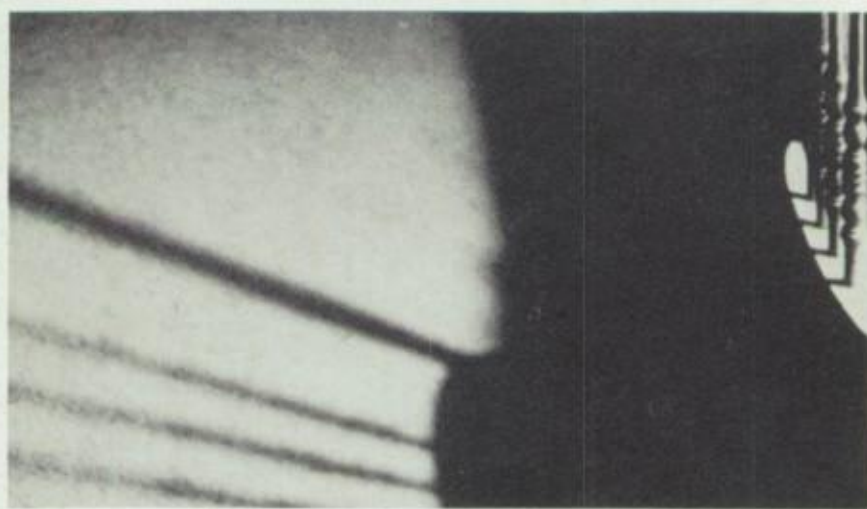

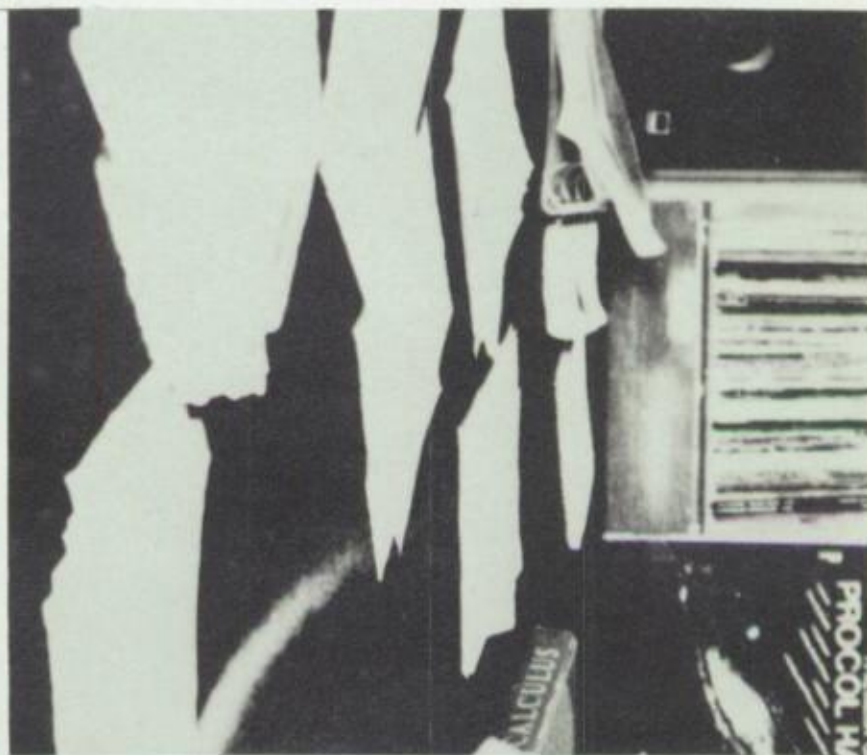

— Walt Whitman
